

# Decontamination Certificate

The fully completed decontamination declaration is a prerequisite for the acceptance and further processing of your service. If your shipment is not accompanied with this declaration, processing will be delayed until receipt of your decontamination certificate.

## Laboratory safety level

Please specify the safety level of the laboratory where the device was used:

S1  S2  S3  S4

## I hereby confirm that:

- The device(s) or product(s) mentioned above has/have not been in contact with hazardous substances.
- The device(s) or product(s) mentioned above has/have been in contact with hazardous substances.
- The above mentioned device(s) have not been in contact with the SARS-CoV-2 corona virus
- The above mentioned device(s) has/have been in contact with the SARS-CoV-2 coronavirus\*

\*Extract from "Recommendations of the RKI on hygiene measures in the context of the treatment and care of patients with an infection by SARS-CoV-2 (as of 1.4.2020)": Thermal disinfection methods should be used preferentially whenever possible. If this is not possible, disinfectants with proven, at least limited virucidal effectiveness should be used.

Description of the measures for the decontamination of the listed objects:

- We hereby declare that the objects to be serviced have been carefully cleaned and decontaminated prior to shipment. All objects (instruments and all other objects sent to service) are free of harmful chemicals, infectious or radioactive substances, as well as health-threatening proteins, DNA or bacteriological contamination. All listed devices are safe to handle and ship.

Signature of authorized person

Company / Department

City, Date

Important information: If dosing units (or parts thereof) are autoclaved, they must be thoroughly dried before shipment. Internally moist dosing units cannot be calibrated accurately, as the residual moisture affects the volume. Please refer to your operating instructions for further information.

# Additional information on pipettes

By default, the manufacturer limits are used as a basis for evaluating the measurement results, which includes the test according to ISO 8655. If you would prefer an alternate basis of evaluation, please specify this here:

---

## Wich Services?

- Calibration / Conformity renewal**  
Calibration / Conformity renewal entails maintenance and calibration including a (final) report with 10 measurements for 1 (fixed) or 3 (variable) volumes.
- DAkkS calibration certificate**  
The DAkkS calibration certificate contains information from the measurement report as well as information about the expanded measurement uncertainty and the DAkkS logo. Traceability to the standard is possible with The DAkkS calibration certificate.
- Preliminary report (10/30)**  
The preliminary report (10/30) is created as an "as found" measurement before maintenance and calibration and documents the state of the instrument in 10 measurements for 1 (fixed) or 3 (variable) volumes.
- Quick Check (4/12)**  
The Quick check (4/12) is created as an "as found" measurement before maintenance and calibration and documents the state of the instrument in 4 measurement for 1 (fixed) or 3 (variable) volumes.
- Other:** \_\_\_\_\_

## Which service interval?

- 3 months
- 6 months
- 12 months
- Other: \_\_\_\_\_

## Information about the repair order

- I hereby agree to a repair of up to € \_\_\_\_\_ per pipette.
- Please send me a quotation in advance.

## Updates of electronic Eppendorf devices

Existing settings and programs may be overwritten or deleted during the update of electronic devices. Errors that arise due to a denied update, are in the liability of the client.

- I do not want an update of electronic Eppendorf devices.
