

Hygiene measurements

The SCCD Conference will follow the 3G rules and only accept participants with a complete vaccination (plus 14 days), recovered or officially tested, confirmed by the Corona Warn-App, the CovPass App or certifications of vaccination.

Hand disinfection stations will be installed at the entrance and at different locations at the event location. Participants need to wear masks whenever a distance of less than 1.5 m cannot be guaranteed.

The hygiene concept might be adapted to the current pandemic situation and local standards.
