

## Peter Selvig

Co-Founder & CFOO  
StemMedical

Peter Selvig is the Co-Found & CFOO of StemMedical, a newly founded company in April 2021. He is responsible to develop and lead an entrepreneurial biotech company with multiple brands to scalable and profitable commercialization of stem cell regenerative treatments within medicinal & aesthetic indications.

In 2016 he was the Co-founders of Stemform and as Managing Director he was responsible to build up a new biotech company and drive the commercialization of new natural treatments within plastic surgery.

From 2005 till 2016 Peter worked in several roles for Shell, where he started as Business Analyst, then moving into the roles of Nordic Delivery Promise Implementation Lead and Business Improvement Manager. In 2009 Peter became the EU Marketing Executive responsible for developing & implementing Nordic Bulk Fuels yearly marketing plan, and in 2011 Sales Derivative Manager for Shell Trading.

Peter Selvig holds a BA in Social Studies and Business Administration from Roskilde University and a MSc, Management of Innovation and Business Development, from Copenhagen Business School.
