Advanced Solutions for Vaccine Discovery and Development

**LEAD CANDIDATES IDENTIFIED**

Evidence that a manufacturing process will be scalable manufacturing process. These studies are designed to assess the immune response (cellular or humoral). Antigen discovery and immunogen design and ensure the safety of all laboratory materials, SOPs, product and process design.

**CLINICAL DEVELOPMENT**

Clinical trial applications are prepared for entry into clinical development phase. To learn more about Eppendorf solutions for vaccine discovery and development, visit:
