

Decontamination Certificate

The fully completed decontamination declaration is a prerequisite for the acceptance and further processing of your order. If this declaration is not enclosed with your shipment, processing will be delayed until receipt of your decontamination certificate.

Biological safety level

Please specify the safety level of the laboratory where the instrument was used:

S1 S2 S3 S4

I hereby confirm that:

- The instrument (s) mentioned above has/have not been in contact with hazardous substances.
- The instrument (s) mentioned above has/have been in contact with hazardous substances.

Description of the measures for the decontamination of the listed objects:

We hereby declare that the objects to be serviced have been carefully cleaned and decontaminated prior to shipment. All objects (instruments and all other objects sent to service) are free of harmful chemicals, infectious or radioactive substances, as well as health-threatening proteins, DNA or bacteriological contamination. All instruments listed above are safe to handle and ship.

Additional information on pipettes

The manufacturer's limits are used by default as the basis for evaluating the measuring results, which includes testing according to ISO 8655.

Please specify below if you require a different basis of evaluation:

- Evaluation according to EN ISO 8655
- Evaluation according to a SOP (please enclose once)

Which services?

- Calibration / Conformity renewal⁽¹⁾
- DAkkS calibration certificate⁽²⁾
- As-found report (10/30)⁽³⁾
- Quick check (4/12)⁽⁴⁾
- Other: _____

Which service interval?

- 3 months
- 6 months
- 12 months
- Other: _____

Information about the repair order

- I hereby agree to a repair of up to € _____ per pipette.
- Please send me a quotation in advance.

⁽¹⁾ Calibration/Conformity renewal involves maintenance and calibration and includes a report with 1 (fixed volume) or 3 series of measurements (variable volume) of 10 measured values each.

⁽²⁾ The DAkkS calibration certificate contains information from the measurement report as well as information about the extended uncertainty of measurement, and the DAkkS logo. The DAkkS calibration certificate allows traceability to the standard.

⁽³⁾ The "as-found" report (10/30) is generated before maintenance and documents the actual state or "as found" state of the instrument with 1 (fixed volume) or 3 series of measurements (variables volume) of 10 measured values each.

⁽⁴⁾ The Quick check (4/12) is created as an "as-found" measurement before maintenance and calibration and also documents the actual state 1 (fixed volume) or 3 series of measurements (variables volume) of 4 measured values each.
