# Reuse or Dispose

How to become more sustainable in your lab

Balancing the requirements of modern science with the environmental concern about plastic waste is a key challenge in managing a life science lab. Plastics are ubiquitous in modern life – and the world of laboratory consumables is no different. With the choice of reusable epT.I.P.S.<sup>®</sup> boxes you can reduce the running costs, produce less waste and save space in your lab.

It's worth it:

- > Reusable; can be autoclaved up to 100x helps reduce waste
- > Contact-free transfer of trays to the working box reduces risk of contamination
- > Optimized for use with multichannel pipettes increases pipetting efficiency
- > epT.I.P.S. Reloads and epT.I.P.S. boxes are entirely autoclavable and thus offer extended flexibility

Reduce, reuse, recycle
