16 and 24 Wells in Just One Step!

Pipetting into 384-well plates made easy

Do you work with 384-well plates and strive for more efficient pipetting methods? Your worries are over! The new 16- and 24-channel pipettes plus pipette tips from Eppendorf for ergonomic and safe working with 384-well plates.

Safety and reproducibility

The extraordinary coaxiality of epT.I.P.S.[®] 384 and their extremely fine tip shape ensure safe plate maneuvering and liquid transfer. Start 16/24 reactions simultaneously.

Time-saving

Alternate well pipetting with 8 or 12-channel pipettes is a thing of the past. Fill a complete 384-well plate in just one minute.

Special Offer

Receive 5 trays of epT.I.P.S. for FREE with Eppendorf Research[®] plus or Eppendorf Xplorer[®] plus Starter Pack (includes reusable box).

No of Channels	Volume	Available as
16- or 24-channel	1–20 µL	Eppendorf Research [®] plus or
16- or 24-channel	5–100 µL	Eppendorf Xplorer [®] plus

Order your starter pack online and receive additional 384-well sample plates for free. Click and buy: www.eppendorf.com/whatsnext-starter-pack

The perfect fit with innovative epT.I.P.S.[®] 384

New Eppendorf epT.I.P.S. 384 now with elastic forming grooves. These allow the tips to stretch as much as necessary to enable a perfect seal.

- > Outstanding and reliable tip fit and tightness
- > Reduced tip attachment and ejection forces

More Volumes. More Flexibility.

Additional volume variants Eppendorf Research[®] plus and Eppendorf Xplorer[®] plus

All the benefits you already know now exactly in the volume you were always looking for.

Product	Volume	Colour code
Eppendorf Research [®] plus	0.25-2.5 mL	Red
Eppendorf Xplorer [®] / Xplorer [®] plus	1-20 µL	Light gray
Eppendorf Xplorer [®] / Xplorer [®] plus	10-200 µL	Yellow
Eppendorf Xplorer [®] / Xplorer [®] plus	0.125-2.5 mL	Red

Eppendorf Research[®] plus – 8 and 12-channel 0.12-1.2 mL coming soon

Good to know – Pipetting facts and much more: www.eppendorf.com/handling-solutions

Special Offer

Explore new volumes: Buy any of the new volume Eppendorf Xplorer[®] plus electronic pipettes, with programming functions, and receive a free charger stand.

Our virtual Pipetting Ninja has been helping you during the past two years to fine-tune your pipetting techniques.

Tell us how you have personally improved your pipetting techniques and turned into a real Pipetting Ninja.

Our Pipetting Ninja has now been brought to life and would like to go on an adventurous trip. The first 100 customers who share their story will be awarded a Pipetting Ninja trophy.

Details on our challenge: www.eppendorf.com/ninja-challenge

Is it Really DNA You Are Measuring?

Most of the time you have one chance to get your experiment right. Samples are precious and unique. So you need to ensure the plastics you are using don't interfere with your samples.

Are you aware of the many substances that leach from plastic consumables?

The most critical leaching additives are

- > Slip agents
- > Biocides
- > Plasticizers

False positives, wrong appreciation of biological results, waste of time and costs, and unreliable measurement are some of the outcomes.

Unfortunately, leachables are easily detected in UV-absorbent measurements, interfering with spectroscopic analyses such as those employed during DNA quantifications.

Not all consumables are the same

Eppendorf is committed to manufacturing only the highest quality of plastic consumables without the use of slip agents, plasticizers or biocides, giving you peace of mind about your results.

View more information at:
www.eppendorf.com/eppendorf-quality

Find our "General Quality Certificate for epT.I.P.S.[®], Eppendorf Tubes[®], Eppendorf Plates[®] and UVette[®]" here:

Save 15 % – Eppendorf Tubes[®] 5.0 mL

Eppendorf Tubes 5.0 mL with snap cap or screw cap - the missing link for volumes smaller than 15 mL but larger than 2 mL.

See it for yourself. Take advantage of **15% OFF** for a limited time period only on a selection of tubes.

For the Real CellXpert[®]

The new CellXpert CO₂ Incubators make your culturing more efficient, safe, and comfortable. Long-lasting quality made in Germany.

Full control and easy documentation

- > Quick recovery times < 5 min. without regulation overshoot
- > Multiple integrated temperature sensors for optimized homogeneity
- > Connect your lab and remotely monitor all your devices within the new VisioNize[®] connected lab system

What Makes a Green ULT Freezer?

Many people focus on energy consumption when considering how sustainable a ULT freezer is, however, the story is far more complex than that! Many other factors can affect how green a product is. Eppendorf freezers have a reputation for lasting longer and performing better. The high manufacturing quality of Eppendorf freezers translates to lasting peace of mind for you.

Did you know Eppendorf manufacture their ULT freezers in Europe? Less shipping means less CO₂!

Find out more about the Eppendorf drive to reduce our environmental impact at: www.eppendorf.com/sustainability

Eppendorf has led the way with high-performance, energy-efficient freezers, such as the new CryoCube® F740hi upright 700 L freezer. This approach combines green manufacturing techniques with an ongoing drive to reduce our environmental footprint.

Eppendorf freezers: protecting both your samples and the environment!

Improve your sample management with Eppendorf ULT freezers!

Effective sample management can also help improve your freezer efficiency:

- > Locate your sample quickly
- > Reduce the time the door stays open
- > Significantly reduce the energy required to return your ULT to -80°C

€ 1,000 Free Freezer Racking

Special Offer

To help you, manage your samples, Eppendorf will give you € 1000 of Eppendorf freezer racking free of charge with every purchase of a green Eppendorf ULT freezer F740hi during the WhatsNext promotion.

Contact your Eppendorf green team to arrange a quotation now!

A Silent Companion: New Centrifuge 5425

Centrifuge 5425 is the successor of the legendary “lab standard” Centrifuge 5424. This 24-place centrifuge has been engineered to be extremely quiet. Short runs up to 12 minutes are whisper quiet at an average of 45 dB(A).

This is sufficient for centrifugation steps of most routinely used DNA/RNA purification kits. During longer runs the cooling fan works at full capacity to dissipate the heat for the remainder of the run. Even so the Centrifuge 5425 is still the quietest non-refrigerated microcentrifuge on the market with a noise level below 51 dB(A).

What's new?

Low noise operation

Quietest non-refrigerated microcentrifuge on the market for stress-free work.

Extended rotor program

Comprehensive range of 6 rotors for all your applications.

Uncompromised safety

Aerosol-tight Eppendorf QuickLock® lids for simple and safe handling.

More information at www.eppendorf.com/centrifuge-5425

Special Offer

For a limited time only! Take advantage of this great bundle offer.

- Centrifuge 5425 non-refrigerated, with rotary knobs
- + 1 x Rotor FA-24x2, aerosol-tight rotor with lid for 24 x Eppendorf Safe-Lock® Tubes 1.5 mL or 2.0 mL
- + 1 pack of 1,000 Safe-Lock Tubes, 1.5 mL, colorless

Click and buy:

www.eppendorf.com/whatsnext-centrifuge-5425

A Versatile Companion: Centrifuge 5910 R

Tired of changing rotors? Centrifuge 5910 R offers its new swing-bucket rotor S-4xUniversal with great versatility thanks to its universal adapters which accommodate bottles, plates, and more 15/50 mL conical tubes than the standard 3 liter multipurpose centrifuge.

Centrifuge 5910 R convinces through versatility and capacity, complete with swing-bucket and fixed-angle rotors.

It takes care of your sensitive cells

Hardware and software features manage energy efficiency and sample protection. This saves energy and time.

Innovative safety features

Automatic rotor recognition and built-in imbalance sensors protect the centrifuge, your sample and – most importantly – you.

Excellent user convenience

Centrifuge 5910 R features a low noise level and a soft-touch lid for stress-free instrument closing.

www.eppendorf.com/centrifuge-5910R

Improve Your Flexibility

The new SmartExtender is a comfortable incubation accessory that is easy to use as an add-on to your existing SmartBlocks and the Eppendorf ThermoMixer® C.

- > Up to 12 vessels (1.5 mL) for higher throughput and higher flexibility
- > Independent heating function for a second temperature
- > Parallel usage of SmartBlock and SmartExtender

Using different vessel sizes within your workflow?

Flexibility has never been this easy. Eppendorf offers a broad range of 13 SmartBlocks for tubes from 0.2 mL to 50 mL in volumes as well as plates (MTP, DWP, and PCR plates 96 / 384). All SmartBlocks are equipped with the Eppendorf QuickRelease™ system that makes the block exchange quick and easy – no tools are necessary.

www.eppendorf.com/smartblocks

Special Offer

Eppendorf ThermoMixer® bundle – save 25 %

- Eppendorf ThermoMixer C
- + Eppendorf SmartBlock™ 1.5 mL
- + SmartExtender

Wall of Fame

Experience the world of Eppendorf automated pipetting systems. They have been designed to bring value to your daily work life by providing "high efficiency", "ease of use", "peace of mind", and "versatility". They are Friends for Life!

Ease of use

epMotion® 96 is your best friend in replication of microtiter plates, cell-based assays, ELISA, magnetic bead-based applications, handling of 96/384 well plates, etc. Leave the tedious pipetting to epMotion 96.

High efficiency

epMotion 5070 is designed to be intuitive, self-explanatory and easy to use. PCR and qPCR set-up was never easier. Minimize reagent usage, reduce errors, and improve results. Serial dilutions, re-formatting, and normalization made easy.

Peace of mind

epMotion 5073 is an affordable solution to make NGS library preparation easier than ever before, in offering you a walk away liquid handling solution, allowing you to focus on more important tasks.

Versatility

epMotion 5075 brings you one step ahead in your daily work life. It offers you fully automated solutions for almost all existing applications in your lab. Stay ahead!

Win a friend for life!*

Win a brand-new epMotion 5070

We are looking for the oldest automated pipetting system in life science across Europe.

Take a picture of your old automated pipetting system (all brands), send it to WhatsNext@eppendorf.com and state for which applications you use it.

*Competition closes 30th June 2019. Participation conditions can be found at: www.eppendorf.com/friend_for_life_contest

Providing Peace of Mind!

Service from the experts!

Did you know that the success story of Eppendorf began way back in 1945 as a small medical instrument repair workshop on the grounds of the University Hospital Eppendorf in Hamburg, Germany?

Today, more than seven decades later, our highly qualified team of service professionals supports customers around the globe. Our vision: we strive to make our customers feel confident and proud when they use our products and services

Compliance when you need it!

Our Installation & Operational Qualification services are designed to support compliance with your laboratory guidelines and with manufacturers' specifications.

Regular verification and adjustment services are highly recommended, especially where reaching defined temperatures within an instrument is crucial for correct and reproducible results.

Our services include:

- > On-site preventive maintenance
- > Installation and certification
- > Calibration and verification
- > Repair and breakdown
- > Technical support
- > Software updates

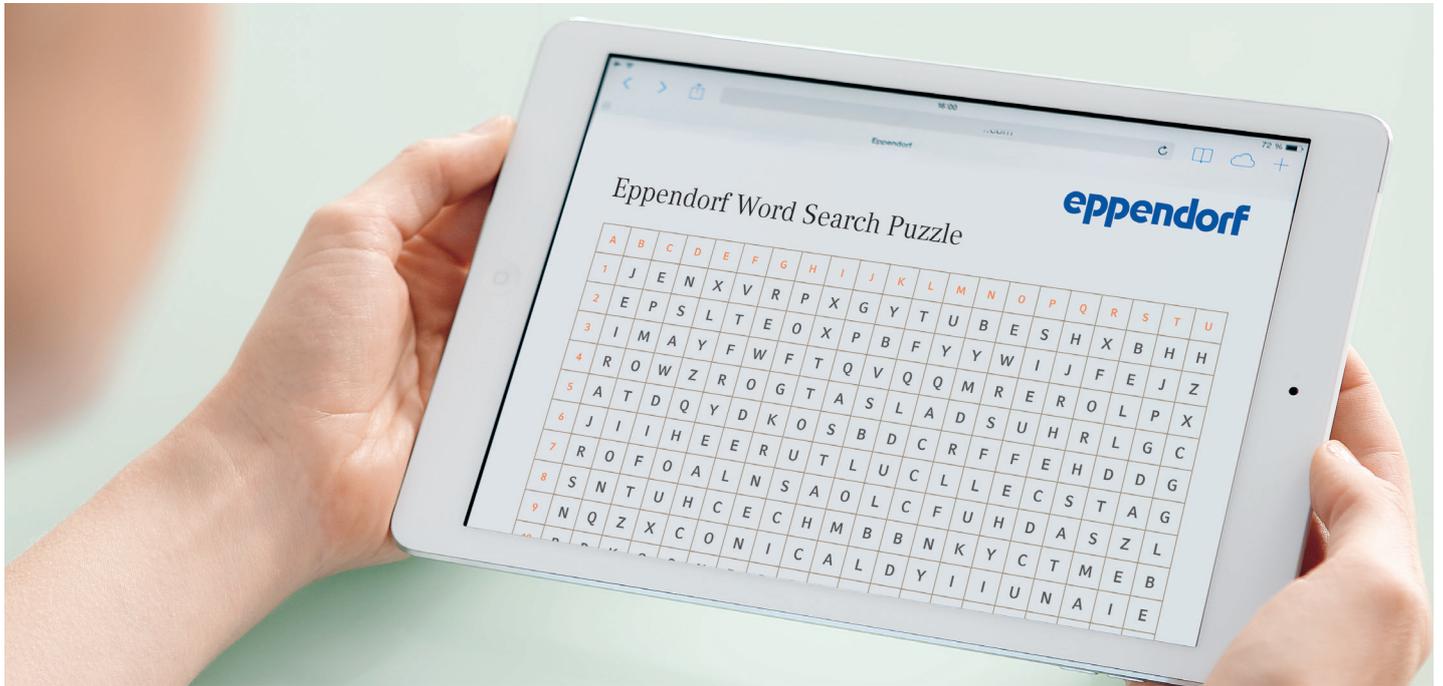

» *Eppendorf epServices personnel are specialists with technical expertise, but also partners who listen and enable us, year after year, to meet the requirements of accreditation.* «

Christophe Lehobey, Biomedical Maintenance Manager, Institut Curie, France.

Get expert care for your total peace of mind!
