Smart Separation for Your Workflow

Exceed your limits with the Centrifuge CP-NX Series

Combine Safety and Efficiency With Simple Operation

Ultracentrifugation can be challenging, thus user-friendly and safe operation is crucial. Therefore, the flagship of our ultracentrifuge portfolio has been designed to make ultracentrifugation as safe and convenient as possible. With speeds of up to $803,000 \times g$ (100,000 rpm)^{*1}, it is the optimal solution for the separation of nucleic acids, proteins, protein complexes, vesicles, and viruses, just to name a few.

*1 The CP-NX models are available with max. speeds of 100,000 rpm. For details see last page.
*2 Except Rotor P21A2
