# 60 years of the Microlitre System

From introducing the first modern-day pipette in 1961 to unveiling the first Eppendorf tube in 1963, Eppendorf revolutionised how the scientific community handles liquids in the microlitre range. Our innovations continued with the launch of the first microcentrifuge in 1964, completing the comprehensive microlitre system where sustainability is seamlessly woven into our design language and usability.

## A History of Quality and Innovation

### 1961 Marburg Pipette

In 1958, a German physician filed for a patent describing a 'device for the fast and exact pipetting of small liquid volumes'. Eppendorf recognised this invention's potential and developed the world's first modern piston-stroke pipette on this basis. This alternative to mouth pipetting changed scientific research forever.

### 1978 Multipette 4780

Another 'world first' with the introduction of the Multipette® in 1978. Series pipetting and dispensing became a reality for the first time. In addition, the associated consumable, called 'Combitip', enabled dispensing of viscous and highly volatile liquids with the highest precision.

### 1994 Reference® 4910

The first fully autoclavable pipette with a unique one-button design provided the highest precision and accuracy with low failure rates and high durability. With its successor Reference 2, this is still the only pipette in the world that operates with just one button.

### 2020 Move It®

The adjustable tip spacing pipette 'Move It' offers an efficient and safe solution for synchronous pipetting of a series of samples between different vessel formats, such as between tubes and plates. It is the first of its kind, designed without any tubing connections between the cone and piston-cylinder system for increased precision and durability.

### 2021 Pipette Manager®

A transformative year for the Xplorer electronic pipette as it embraces digital innovation through the Pipette Manager. This extension enhances flexibility, enabling swift and reproducible pipetting. Researchers can effortlessly adjust settings for intricate protocols, while also recording and sharing customised liquid handling protocols across the lab.

## Celebrating 60 years of Centrifugation

1964 marks the launch of the first microcentrifuge at Eppendorf completing the famous microlitre system. Ever since then, Eppendorf has been developing, producing, and distributing high-quality centrifuges for you with user-friendliness, quality, and longevity as guiding principles. Rely on 60 years of Eppendorf's centrifugation expertise.

You deserve the best laboratory equipment to ensure that your separation tasks run smoothly every time. That's why our goal is to provide optimised solutions for you and your requirements: From microcentrifuges and benchtop centrifuges to high-speed floorstanding- as well as ultracentrifuges, our extensive portfolio now offers comprehensive solutions in the areas of molecular biology, biochemistry and cell biology.

With our complete centrifuge portfolio, we give you the promise of separation at ease, enabling you to focus on what matters most: your research.

### 1964 Centrifuge 3200

In 1964 Eppendorf presented the Centrifuge 3200, the first centrifuge to form an integral part of the Eppendorf Microlitre System, thus revolutionising global research in the field of life science.

### 1989 Centrifuge 5415 C

In 1989 Eppendorf launched the legendary centrifuge 5415 C, which was one of the first of many small, lightweight and silent Eppendorf microcentrifuges to come.

### 2006 Centrifuge 5424

The first Eppendorf microcentrifuge with OptiBowl® design for quiet operation, even without a rotor lid.

### 2009 Centrifuge 5430 R

The first compact microcentrifuge with high capacity to spin max. speed up to 30,000 x g for 1.5 and 2 mL tubes and with rotors for 15 and 50 mL conical tubes and plates.

### 2023 Centrifuge 5427 R

Our first centrifuge with natural refrigerant (hydrocarbon cooling) to protect your samples and the planet.

## Key Milestones Over 60 Years of Eppendorf Tubes®

### 1963 - The 1st Eppendorf Tube

Introduced in 1963, this tube quickly gained popularity in German medical and bioscience laboratories. Eppis® enabled laboratory workers to fill and store small sample amounts easily and practically, becoming a standard companion for any laboratory all over the world.

### 1988 - Safe-Lock Tubes

Another standard for sample safety for scientists that are performing assays at high temperatures to prevent lid pop-up, sample leakage and sample evaporation with a secure Safe-Lock lid.

### 2004 - DNA & Protein LoBind®

One standard after another continues to be established by Eppendorf with the introduction of two low binding tubes that are respectively made specifically for preventing DNA and protein loss.

### 2019 - Eppendorf 25 mL Tube

A new volume standard was introduced to fill the gap for medium-sized volumes that is occupied by the conical tubes 15 mL and 50 mL. The new volume makes it easier for sample processing and management of samples between 5 to 25 mL. Available in both snap cap and screw cap variants to cater for different applications.

### 2023 - Eppendorf Tubes® BioBased

These are the first ever plastic conical tubes made from 2<sup>nd</sup> generation renewable resources to help you meet your sustainability targets. Our tubes are ACT labelled for transparency and certified ISCC plus as a part of the circular economy that enables traceability along the entire supply chain.

## Your Future Lab Perspective - NEW BioBased Consumables

Meet your own sustainability targets with Eppendorf Tubes® BioBased, epT.I.P.S.® BioBased and twin.tec® PCR Plates BioBased.

Since oil-based plastic consumables have replaced glass consumables, they have become irreplaceable in laboratories around the world, providing quality standards needed in increasingly demanding research. This is the growing challenge in respect to sustainability. Thus, Eppendorf not only focuses on the development of new products but also on new, more environmentally-friendly manufacturing materials. We now offer Eppendorf Tubes® BioBased, epT.I.P.S.® BioBased pipette tips and the first twin.tec® PCR Plates BioBased with a polycarbonate frame and polypropylene wells, which are made from certified plastic based on renewable reused raw materials.

## NEW Mastercycler® X40

Evolve your PCR experiments together with the new Mastercycler® X40. Take the next step to a digital lab and keep a small footprint with reliability and flexibility.

**Absolute Confidence**  
[www.eppendorf.com/mastercycler-service](http://www.eppendorf.com/mastercycler-service)

### Protect your samples from evaporation

SafeLid applies ideal pressure to your PCR consumables.

### Consumable flexibility

The aluminum block can be used with 0.1 and 0.2 mL PCR tubes and tubestrips, as well as any kind of 96-well PCR plate (unskirted, semi-skirted and skirted).

### 7 inch LCD Touchscreen

The sensitive colour touchscreen is covered with an easy-to-clean glass surface.

### Import and export protocols

Easy access of USB port on the front of the device.

### Intuitive software

Easy programming and editing of programs with the well-proven user interface of Mastercycler X50.

### 12-column gradient

Optimise temperature steps in your PCR protocol efficiently by testing 12 different temperatures from column 1 to 12.

**WhatsNext Promotion - Purchase a Mastercycler® X40 Thermal Cycler and receive 3 packs of twin.tec PCR plates for free.**

Description	Order no	List Price (excl. GST)
Mastercycler® X40, 100-240V, AU	6381000069	\$7,903.00

Description - Receive 3 packs of twin.tec plates for free. Select from either of the following:	Order no
twin.tec 96, LoBind skirted, clear PK/25	0030129512
OR	
twin.tec 96, unskirted, clear, PK/20	0030133307

## epT.I.P.S.<sup>®</sup> 384 - Micropipette Tips

epT.I.P.S. 384 micropipette tips with the innovative SOFTattach technology are optimised for use with Eppendorf Research<sup>®</sup> plus 16- and 24-channel pipettes, as well as 20  $\mu$ L and 100  $\mu$ L Move It<sup>®</sup> adjustable tip spacing pipettes. Process 384-well plates manually with the highest level of tip tightness and alignment but extremely low operating forces.

Description	Order no.
epT.I.P.S. <sup>®</sup> Set epQuality, 0.1 – 20 $\mu$ L, 1920 tips (5 trays x 384 tips), 1 reusable box	0030076273
epT.I.P.S. <sup>®</sup> Set epQuality, 5 – 100 $\mu$ L, 1920 tips (5 trays x 384 tips), 1 reusable box	0030076281
epT.I.P.S. <sup>®</sup> Reloads 384, Eppendorf Quality <sup>™</sup> , 0.1 – 20 $\mu$ L, 3,840 tips (10 trays x 384 tips)	0030076044
epT.I.P.S. <sup>®</sup> Reload 384, Eppendorf Quality <sup>™</sup> , 5 – 100 $\mu$ L, 3,840 tips (10 trays x 384 tips)	0030076052
epT.I.P.S. <sup>®</sup> Reloads 384, PCR clean, 0.1 – 20 $\mu$ L, 3,840 tips (10 trays x 384 tips)	0030076001
epT.I.P.S. <sup>®</sup> Reload 384, PCR clean, 5 – 100 $\mu$ L, 3,840 tips (10 trays x 384 tips)	0030076010
ep Dualfilter T.I.P.S. <sup>®</sup> , PCR clean and sterile, 0.1 – 20 $\mu$ L, 3,840 tips (10 racks x 384 tips)	0030078853
ep Dualfilter T.I.P.S. <sup>®</sup> , PCR clean and sterile, 5 – 100 $\mu$ L, 3,840 tips (10 racks x 384 tips)	0030078861

**WhatsNext Promotion - Enjoy 20% off the RRP of epT.I.P.S.<sup>®</sup> 384.**

## Move It<sup>®</sup> Adjustable Tip Spacing Pipettes

Do you frequently transfer samples across different vessel formats, such as between tubes and plates, and strive for more efficient and safe solutions? The new adjustable tip spacing pipette 'Move It' accelerates and simplifies synchronous pipetting of a series of samples. A unique design without tubing connections results in increased precision and durability as well as user and sample safety.

**WhatsNext Promotion - save 20% on Move It<sup>®</sup> Adjustable Tip Spacing Pipettes**

# Xplorer® Electronic Pipettes - Simple, fast and precise with untiring battery power

Achieve more and get better results thanks to the intuitive operating concept and ergonomic design of the Xplorer® pipette, supported by the Eppendorf PhysioCare Concept®, setting new standards in simplicity, precision and reproducibility.

The quality of your results is significantly influenced by the precision and accuracy of your pipettes. Our calibration service ensures that our stringent and validated procedures for pipettes and dispensers comply with the highest possible standards. To learn more about our calibration services, visit: [Pipette Service and Calibration \(ISO 8655 and ISO 17025\) - Eppendorf Australia.](#)

**WhatsNext Promotion - Purchase any single channel Xplorer® Pipette and receive a free 3x4 Calibration\***

### New Pipette Calibration cat. no. 0082000273

- > Routine test for 3 volumes, 4 measurements per volume
- > Issuing of test report without expanded measurement uncertainties and test documentation label

\*Calibration conducted prior to delivery

## Celebrating 60 Years of Centrifugation

1964 marks the launch of the first microcentrifuge at Eppendorf completing the famous microlitre system. Ever since then Eppendorf has been developing, producing, and distributing high-quality centrifuges for you with user-friendliness, quality, and longevity as guiding principles. Rely on 60 years of Eppendorf's centrifugation expertise.

### Find your perfect fit

You deserve the best laboratory equipment to ensure that your separation tasks run smoothly every time. That's why our goal is to provide optimised solutions for you and your requirements: From microcentrifuges and benchtop centrifuges to high-speed floorstanding- as well as ultracentrifuges, our extensive portfolio now offers comprehensive solutions in the areas of molecular biology, biochemistry and cell biology.

With our now complete centrifuge portfolio we give you the promise of separation at ease, enabling you to focus on what matters most: your research.

# Sustainable Solutions for Your Lab

With our climate strategy, we aim to cut carbon emissions in Eppendorf operations down to zero before 2028. That means striving for the shortest delivery distance, the most sparing consumption of resources, the solution that produces the least waste, and the sensible re-use and recycling of materials.

Ask your account manager about sustainable lab consumables and devices for your lab.

- > BioBased consumables made from renewable materials
- > Centrifuges with low global-warming potential
- > ULT Freezers with green cooling and low energy consumption

\*EcoVadis is the world's largest and most trusted provider of business sustainability ratings
