

Leveraging Device Monitoring Data in Clustermarket with VisioNize® Lab Suite

Why Asset Monitoring

Being able to track the program status of your biological shaker or monitor the centrifugation step from afar can help you to be more productive and use your valuable time in a more meaningful way. Up and downtimes are quickly seen and alarm and event notifications prevent further harm, e.g. sample or data loss.

With the VisioNize Lab Suite integration in Clustermarket, you gain access to live information from your instruments while managing your instrument fleet in your leading equipment booking software.

Connecting Lab Instruments

The Eppendorf IoT platform connects Eppendorf and non-Eppendorf devices – from freezers to pipettes.

So called "Connect Ware" might be needed depending on the type of instrument. Consult us for precise planning and order placement.

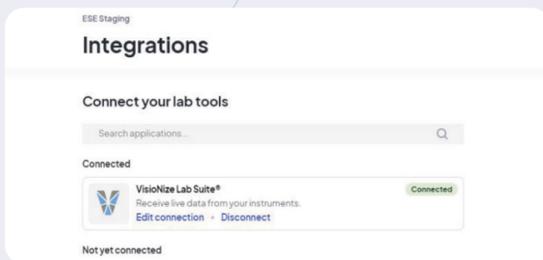

Activating your integration on Clustermarket

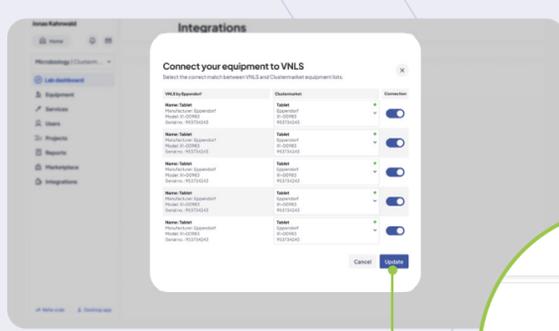

To activate your live data navigate to the integrations page within Clustermarket and search for "VisioNize Lab Suite". Click on "create account" and link your equipment. When you click "Connect" you will be moved to the VNLS login page to type in your login credentials.

Once you are logged in, you will be routed back to Clustermarket and should see VisioNize Lab Suite listed as "Connected".

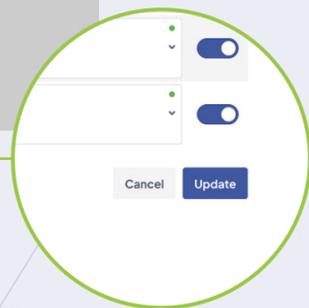

Managing Your Connected Equipment

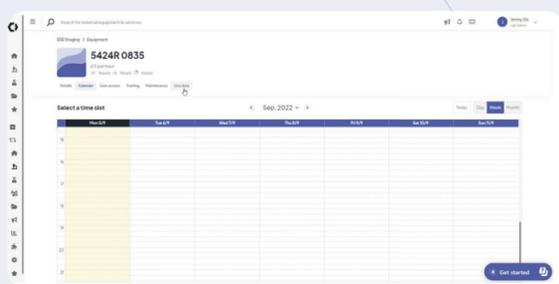

You can manage your connections anytime by clicking on "Edit connection" to view and choose your device from VNLS to match to your equipment in Clustermarket. Scroll to the bottom of the page and select "Update" to save the changes.

When your VNLS equipment is successfully connected to your Clustermarket equipment you will see a green connected icon.

Live Data Selection

Select up to three of the tiles to permanently display them in the top right corner of your device pages.

[More about Clustermarket](#)

Navigate now to the "Equipment overview" within Clustermarket and select one of the connected equipment. You can decide individually which live data are of interest. By clicking on "Live Data" in your equipment view, you find the real-time monitoring parameters.
