CelliGen[®] Pro

CelliGen Pro Performance Plans

Bioprocess systems include several sophisticated technologies. Peak performance requires smooth interplay of the subsystems and fully functioning consumable parts. Regular maintenance by qualified engineers helps to ensure reliable operation, while deferring it can cause unreliable results, expensive repairs, and prolonged downtime.

The CelliGen Pro bioreactor is a modular system designed for quick delivery, dependable operation, and system flexibility. Systems are available in four vessel sizes with

working volumes from 19 L to 520 L. All CelliGen Pro bioreactors utilize industry-standard components including an Allen Bradley Compact Programmable Logic Controller (PLC).

Eppendorf Bioprocess Performance Plans help you to maintain the optimal performance of your equipment over years of frequent use.

Bioprocess maintenance —
see the advantage!
