DASGIP® PHPO and OD4

DASGIP PHPO and OD4 Performance Plans

Bioprocess systems include several sophisticated technologies. Peak performance requires smooth interplay of the subsystems and fully functioning consumable parts. Regular maintenance by qualified engineers helps to ensure reliable operation, while deferring it can cause unreliable results, expensive repairs, and prolonged downtime.

The most common reasons for failed experiments are

incorrect sensor readings or defective sensors. Therefore, it is essential to identify and eliminate these risks before they arise. Preventive maintenance of electronics, cables, and sensors notably diminishes in-process failure.

Eppendorf Bioprocess Performance Plans help you to maintain the optimal performance of your equipment over years of frequent use.
