# DASGIP® Gassing Modules

## DASGIP MX4/1, MF4, and Rotameters Performance Plans

Bioprocess systems include several sophisticated technologies. Peak performance requires smooth interplay of the subsystems and fully functioning consumable parts. Regular maintenance by qualified engineers helps to ensure reliable operation, while deferring it can cause unreliable results, expensive repairs, and prolonged downtime.

The DASGIP MX4/1 gas mixing system supplies one culture vessel with an individual mixture of air, N<sub>2</sub>, O<sub>2</sub>, and CO<sub>2</sub>. The DASGIP MF4 gassing module allows mass flow-controlled gassing of up to four vessels with individual flow rates. DASGIP Rotameters WRM and RX2/4 provide four-

channel rotameter gassing at an adjustable flow rate from one and two gas supplies, respectively. Regular maintenance is crucial to ensure a reproducible and reliable gas supply. Fast calibration of your gassing system can be performed on-site, which minimizes down time.

Eppendorf Bioprocess Performance Plans help you to maintain the optimal performance of your equipment over years of frequent use.
