Corporate Form

Eppendorf AG was restructured into a European Company (Societas Europaea, SE) under the name Eppendorf SE, effective October 19, 2021. This change of legal form to an SE does not affect any existing business relationships with our partners; our existing contractual relationships in particular continue unchanged. The Eppendorf AG company address also remains unchanged as a result of the reorganization.

Dear reader,

... new situations require new solutions.

Even if we have adapted to working together in new ways, new communication and exchanging ideas via digital media, we all still hope for more personal contact in **future** at exhibitions, in the offices and in the laboratories.

To remain part of your everyday occupational routine until then, we have designed our catalog to be significantly more **digital** for you. You can read for yourself exactly what that means on the following pages. We have compressed certain content down to its essentials, and provide further information digitally. To this end, this catalog contains a number of **links** and **QR codes** that lead to a plethora of useful information. Let us surprise and inspire you.

We at Eppendorf work every day to support you with our products and services to the fullest in your everyday routine. Of course, our environment receives due consideration in our efforts. Sustainability aspects play a large role during development, in production and in our commercial processes in this. On **page 8**, you can learn more about our **sustainability initiatives**.

More innovative solutions have also been added. New and exciting information on these and other interesting topics have been put together in special chapters. For example, we have ensured better communication between you and your devices.

Upgrade your laboratory to the latest digital standard, for example with the digital laboratory solutions from our VisioNize® range. On **pages 18–21**, you can learn all about the field of **Digital Lab Management**.

Not only are we better connected with all these new developments, your devices are, too. Your everyday routine is becoming more digital and more sustainable - and so is Eppendorf.

Let's keep working successfully on the future together.

Your Eppendorf catalog team

Follow us on    

Welcome!

Eppendorf is a life science company that develops, produces and distributes systems for use in laboratories worldwide. The product range includes, for example, pipettes and automated pipetting systems, dispensers, centrifuges and mixers, as well as consumables such as reaction vessels and pipette tips. In addition, Eppendorf offers ultra-low temperature freezers, fermenters and bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, tubes, micro test plates and disposable bioreactor vessels complete the range of premium products of the highest quality.

New Highlights 2022

Visionize® Lab Suite

Enhance your lab routine tasks! Explore our digital platform and its service applications to connect, manage and monitor lab equipment and processes. Benefit from remote monitoring, alert notifications, maintenance planning, device or experiment documentation & more.

See page
18

CellXpert® C170i: Door lock for GMP/GLP-compatibility

The CellXpert C170i supports cell culture work in GMP- and GLP-environments, e.g. by a certified ISO class 4/Grade A cleanroom compatibility, an extended production certificate of quality, a 180 °C disinfection with certified effectiveness and more. The new retrofittable door lock extends the list.

See page
263

High-speed floorstanding centrifuges

The ideal solution to complement workflows and collect small to production size batches of cells, sub-cellular organelles, and nucleic acids. For customers handling biomass we offer preconfigured solutions.

See pages
204 - 207

Ultracentrifuges

The fastest centrifuges in our portfolio. These versatile ultracentrifuges and compact micro-ultracentrifuge will fit your precious lab space and enable speedy separations of nucleic acids, proteins, cell organelles, viruses and nanoparticles.

Eppendorf Conical Tubes 25 mL

This special format will be completed with variants of Eppendorf Protein LoBind® and Eppendorf DNA LoBind® to minimize sample loss and in Amber for UV-light sensitive samples. These new tubes will be available with either SnapTec® cap or screw cap.

See page
114

Eppendorf Conical Tubes SnapTec® 50

The new Eppendorf Conical Tubes SnapTec® 50 allow easy single-handed opening and closing without compromising the safety of your samples during centrifugation, mixing or heating. Try for yourself how this tube accelerates your workflow.

See page
117

CryoCube® F440 series

Green freezer required? The 440 L ULT freezer is now completely equipped with future-proof green cooling liquids and green insulation foam. Benefit from further improved performance: Down to 6.8 KWh/ day enable fast pulldown within 200 min and fast recovery.

Sustainability

Our commitment to people and the environment

To achieve sustainable success, we consider not only financial but also environmental and social aspects in our business activities and strive to harmonize these three dimensions. Sustainability has always been an integral part of our company:

Our products are becoming ever more sustainable and help ensure that research can be carried out optimally all over the world. We are continuously working on protecting the environment and are aware of our significant responsibility as an employer towards our employees.

Our commitment to society manifests itself in many ways and is closely linked to our core competencies. Compliance with laws and regulations is more than a matter of course for us.

Sustainability Vision

A Systematic Approach to Sustainability

Our mission "to improve human living conditions" requires us to positively transform the Eppendorf Group to operate safely within the planetary boundaries and respecting humanity: We shall become climate neutral, minimize the use of natural resources, and improve human well-being throughout our value chain. This vision is part of our strategic approach to take responsibility and contribute to a sustainable development.

Stakeholder-, Impact- and Success-oriented

For years now, Eppendorf has taken its corporate responsibility very seriously. In order to systematically integrate environmental and social aspects even more strongly into the Group's activities, Eppendorf has set itself a clear strategic framework.

Our Management Team is committed to ensure successful implementation, each member of the Board of Management has assumed responsibility for a guiding theme. Overall responsibility for strategy and governance is taken by Co-CEO Eva van Pelt.

The basis of the strategic framework is a combination of integrating different perspectives on 20 responsibility topics relevant for Eppendorf: The dialog with various stakeholders, a data-based determination of our environmental and social footprint using an impact analysis and a success-oriented assessment.

Sustainability along the entire value chain

For Eppendorf, corporate responsibility does not begin with its own incoming goods, nor does it end at the sales table. Instead, the focus is on the entire value chain. Thus, the strategic framework includes many topics in the areas of climate change, natural resources, social compliance, human well-being, digitalization, and society - and this from the raw material supplier to the customer.

Sustainability in the Lab Concerns Us All

Sustainability is becoming more and more important in public life. Wherever we interact in our personal area, there is a growing number of sustainability topics. The same holds true for our interaction with you, our customers in the labs worldwide. Whereas just a few years ago the topic of sustainability was mainly driven by dedicated employees in academic institutes and research-based companies, there has been a noticeable change for some time now. Purchasing departments as well as procurements systems request information. We see a growing interest in Eppendorf and our approach to sustainability.

Retrospect

In 2010, our centrifuge team started a green sustainability project. We found that a new centrifuge provided a far higher energy saving than expected. We were proud of the results. But the concept came too early: Energy efficiency in the laboratory was not yet the focus at that time. Meanwhile, more and more customers expect sustainability facts about our products.

How Far can We Go? Safety First

The use of new, innovative technologies can optimize both resource consumption during production and power consumption during use. Even small improvements optimize the longevity of devices and thus contribute to greater sustainability.

Despite all needs for improved sustainability, there is a special situation in the lab: The safety of the employees, combined with safety for the samples, is the focus, embraced by sustainable progress.

The safety of valuable samples is always our top priority. For example, the set temperature for centrifuging sensitive RNA samples must be maintained accurately throughout the process to ensure data reliability and reproducibility.

Beyond Green

The green idea may be the most familiar one, but in fact sustainability encompasses many environmental, social, and economic factors.

At Eppendorf, we consider the entire supply chain and define our impact on sustainability in areas such as climate change and the use of natural resources, social compliance and human well-being, as well as with regard to data security and our role as responsible citizens in society.

This consideration begins before the product; it encompasses Eppendorf as an employer as well as a customer vis-à-vis our suppliers. Thus, our own Code of Conduct sets the bar. Our social behavior includes treating each other with respect, paying heed to the intellectual property of others, sticking to facts, and making ourselves reliable partners for our counterparts. These expectations are clearly defined and subject to continuous improvement and learning.

Ergonomics - It's About You!

Workflows in today's laboratories are becoming ever more condensed, and the strain of laboratory work is constantly increasing – making the ergonomics of laboratory devices and the entire work environment more and more important.

Personal health status or corporate sickness levels of employees due to back bone trouble or handwrist load – everyone tries to reduce the stress.

Ergonomics goes far beyond the "ergonomically designed chair". At the beginning of the 1970s, Eppendorf began optimizing the ergonomics of its laboratory equipment. In 2003, we launched the PhysioCare Concept®, which was focused on liquid handling devices such as our pipettes. Today, the PhysioCare Concept® implemented in all Eppendorf products supports the well-being of our users.

Trust in Others: Independent Validation

As Eppendorf, we respect external test procedures and external independent test results of our products. Besides external test house checks for e.g. the ULT freezers, we ask for independent validation by third party organizations like ENERGY STAR® or My Green Lab. Eppendorf collaborates with My Green Lab, an international NGO that validates and certifies lab products with "ACT - The Environmental Impact Factor Label" since 2017.

We are proud of the Eppendorf 25 mL tubes and several CryoCube® ULT freezers which are already certified, more products will follow.

100% Renewable Energy for Assembly

Stepwise, our production facilities have been changed to power supply from renewable sources. Since 2021, we can proudly announce that nearly all products within the Eppendorf factories are assembled by 100% renewable power. But the product assembly is just one part of the energy story – the usage of lab instruments also requires energy. Did you already check the power origin in your lab?

Limit Your Power Bill

Electricity is also required for usage of lab instruments. ULT freezers are top of mind, they need to combine efficient cooling with energy savings. Get reliable -80°C while minimizing energy consumption. Eppendorf ULT freezers like the CryoCube® F570h keep -80°C with 7.4 kWh / day. Spend some time on easy maintenance of your freezer like de-icing or cleaning of the heat exchanger grid for less energy consumption and a longer lifetime.

You can reduce the power consumption of your Eppendorf centrifuge by features like programmed pre-cooling, automatic eco-shut off of the compressor, or light rotors. Fast PCR cyclers can also save energy by design. Check the Eppendorf Mastercycler® nexus.

What Comes After the End?

Despite good ideas, lab waste still cannot be recycled efficiently, e.g., due to regulatory requirements for biological, chemical or radioactive hazards.

Disposal of packaging

The packaging of the products contains different materials. This includes mainly cardboard, plastic covers or bags, and some foam parts. Recycling of materials becomes more and more important. Our packaging cardboard material already consists of a high ratio of recycling material. Please support the global sustainability initiative of recycling valuable raw material by also collecting the packaging material and disposing of it in the appropriate collection containers at your organization. We suggest you to contact your local waste hauler or facility management team to understand the available recycling options for your organization.

Disposal of instruments

Our instruments last for many years, but if they need to be replaced, we kindly ask you to fulfill local requirements for disposal of these instruments. We strongly recommend a certified local recycling partner with experience in instruments from the lab. Keeping it "local" reduces the impact of transportation, and the „certified“ aspect is recommended due to the safe and sustainable removal of all parts.

How can I Reduce My Plastic in the Lab?

Single-use tubes and tips are mandatory in many labs due to purity and risk of samples. However, this generates a lot of plastic waste.

Despite good ideas, this plastic waste still cannot be recycled efficiently, e.g., due to regulatory requirements for biological, chemical or radioactive hazards. But there are ways to reduce the plastic load in the lab, like:

- > Reload systems for tips – Eppendorf introduced the comfortable concept of plastic-saving concept already in 2002
- > Change the tube volume class where possible. A change from 15 to 5 mL can result in plastic savings of about 50% and up to 100% more storage space in the ULT freezer

Steps Forward for Filter Tips

- > For ep Dualfilter T.I.P.S.®, we have decided to completely re-design our racks to greatly reduce the use of polypropylene granulate by up to 35% by modifying the design without risking the tip quality, sterility, and purity.
- > Slim rack size – easy to carry also for small hands
- > Lid with locking option – can be re-closed after use for more tip and handling safety
- > Optimized stackability – all rack sizes can be safely stacked on each other

Remember 2008? Hydrocarbons - Green Cooling of the Future

As one of the very first advocates of green gases at -86 °C, Eppendorf now has more than 14 years of experience with hydrocarbons in R&D, production, logistics, and service in the field. In 2008, the Premium U570h ULT freezer was one of the very first commercially available ULT freezers driven by green cooling liquids.

Replacement of the HFC based cooling liquids for refrigerated instruments is needed as global warming needs to be slowed down. The preferred hydrocarbons are also known as green or natural gases. The two major representatives are propane and ethane (known as R290 and R170).

Due to this goal, we at Eppendorf clearly plan to replace all classic cooling in our portfolio within the next years. This is not limited to freezers but also includes the refrigerated centrifuges and refrigerated shakers.

Sustainability: Our On-Going Journey

Science is based on facts. Statements such as "Our product is more sustainable compared to others" are questioned by researchers in many ways. Analyzing and improving sustainability issues requires knowledge and intensive work. None of the sustainability challenges can be solved quickly or easily. But they all require manufacturers and customers to listen to each other and work together.

This work is never over, but an on-going journey in which we communicate in constant dialogue with our stakeholders. We are researching new technologies, alternative materials and concepts. Each of these changes has the potential to contribute to progress in sustainability.

Pharma

Reach your 100% - Your Partner for Biopharma Research

Pharma research comes with considerable costs and lengthy processes. Reducing both and accelerating time to market is crucial for staying competitive. As a reliable partner at your side, we use all our experience, competence, and industry insights to effectively guide you through every step, from development to debut. We know and value the immense amount of work done in laboratories around the world,

which is why we offer a wide product and service portfolio that enables concentrated, relaxed work tailored to your specific needs. Whether it's monoclonal antibody drug discovery or vaccine research, we help you to find the solutions you need to get a stay ahead in the market. Let's work together to make our world a better place.

Faster workflows

You need to rely on products and services that ensure maximum efficiency at every step. Our products are designed with faster workflows in mind to accelerate time-to-market and create a lasting competitive advantage. Eppendorf high-quality solutions are all engineered around the kind of functionality and intuitive performance necessary to speed up workflows, and accelerate the desired results.

Streamlined processes

In optimal pharma research and development environments, every step and function is effortlessly connected to the others. With our process-improving aspects like advanced equipment, intuitive features, and reliable process monitoring, we help you to streamline your processes; for more productivity across the board, so that researchers can focus on what matters.

Reliable results

You want reliable results with the required accuracy and reproducibility you need for your assurance. Our high-quality products and service portfolio ensure that. For 75 years, Eppendorf has stood for absolute quality, reliability and robust performance. We are committed to continuously drive pharmaceutical innovation and best-equip all those finding tomorrow's breakthroughs.

Compliance with requirements

When it comes to aspects such as documentation, quality management, sustainability, calibration or qualification, you want a reliable partner on your side. We embed compliance requirements and quality assurance into all our products and services. Whether it's ensuring compliance with standards or providing documentation, we are there to support you in any way. Only then can you get the peace of mind required to keep making a difference.

Monoclonal Antibody Drug Discovery - Excellence at Every Step

Monoclonal antibodies have become increasingly popular within the biopharmaceutical market. Today, their production is more sought-after than ever. Our solutions streamline workflows while reducing procedural steps and costs. No matter if it's providing optimal

centrifugation for fast, reliable results, ultra-low freezers for cold storage, high-performance shakers, or bioreactors to optimize cell growth and antibody generation, our portfolio keeps efficient drug discovery on track.

OEM

Your Product, Our Technology – Your Global Partner for OEM Solutions

With Eppendorf OEM as your partner, you can take advantage of decades of competence and experience in developing and manufacturing high-tech laboratory products with premium quality. Find an OEM product or component that perfectly fits to your requirements and applicational needs and start partnering with us today.

Searching for a manufacturer capable of producing your OEM solution in a high volume?

- > Production scalability at high volumes can be achieved through our proprietary precision molding technologies
- > Automated quality checks measure coaxiality and residual volume of tips as well as 100% in-line filter inspection
- > Manufacturing sites in Germany and the US secure delivery on-time, worldwide
- > Fully automated manufacturing facilities ensure a low level of contamination
- > In-house development and manufacturing of injection tools results in high quality production with extremely low failure rates

Planning your OEM project?

Please contact us at oem@eppendorf.com

Your Benefits when Partnering with Eppendorf OEM

Fast time to market

High scalability

Variety of in-house capabilities

OEM partnership at eye level

At Eppendorf, we believe a long term partner is always at your side; able to ensure business success and compliance within every market, specially for IVD and clinical diagnostics. With customers of over two decades, we understand the importance of covering the entire lifecycle from prototype to production and support with our world-wide logistics.

Quality down to the tips

Using only the purest raw materials and performing quality and functional checks throughout the entire production process, Eppendorf OEM products always come with premium quality.

Since our production is fully automated, contamination is reduced as far as possible.

ISO-certified for your confidence

Eppendorf is certified according to worldwide recognized and accepted ISO 9001, 13485 and 14001 standards.

This gives you the confidence that all processes in product design, manufacturing and marketing are defined and monitored in order to ensure consistent products and services.

Your OEM Solution

Eppendorf OEM is covering the full lifecycle as an expert partner from concept and design to production, logistics and beyond. Our services include:

Requirements & specification

- > Analysis of requirements and specification definition
- > Central project management & complete documentation
- > Agile development

Product management

- > Product lifecycle management
- > On-market support – manufacturing, regulatory and change management
- > End of life product support

Infrastructure

- > Worldwide distribution centers
- > Manufacturing on multiple continents
- > Global regulatory & quality management systems

Design & prototyping

- > Material development
- > Polymer chemistry
- > Electronics design
- > Pilot runs for manufacturing
- > 3D printing & in-house tool making

Packaging

- > Packaging design
- > Transport studies
- > Sterile packaging

Performance test

- > Development of test systems
- > Documentation
- > Quality assurance

Customized Consumables

Eppendorf offers a broad range of consumables including a broad diversity of plates, tubes and tips. Whether you choose one of our standard products with a specific packaging or you prefer a customization, for example, a specific surface treatment, please contact us. We will support you with an optimized solution.

Customized tips for automation

Countless liquid handling workstations in the world work with Eppendorf conductive or non-conductive tips, benefitting from our high quality standards. Eppendorf tips for automation can cover a broad range of tasks in all major life science applications. Upon request, Eppendorf tips can also be equipped to comply with specific requirements.

Customized plates

Eppendorf offers a wide variety of plates: PCR, MTP and DWP. Plates can be customized, even to include specific barcoding using our automated barcode system. Plates can be provided in a number of customizable configurations: from labels, to 1D/2D barcodes to customer specific packaging.

Whether you choose one of our standard products with a specific packaging or you need a customization, please contact us.

Customized Instruments

Eppendorf offers you a choice from a variety of instrument configurations; covering your requirements for versatility, throughput, and speed (e.g. our epMotion® workstation). Request your customized solution today.

Digital Lab Management

Be prepared for tomorrow and ready for today

There are numerous starting points for optimizing laboratories and for improving the use of existing assets through digital applications. This will not be accomplished for example by using physical calendars to reserve a device or a workstation.

General lab tasks such as device monitoring, maintenance planning or device and experiment documentation are more efficiently solved in the form of software application systems with visualization. Explore the Eppendorf Digital Lab Solutions and make the switch to Digital Laboratory Management Solutions.

More about Digitalization at Eppendorf

www.eppendorf.com/digitalabsolutions

Overall Digital Lab Management with VisioNize® Lab Suite

One platform designed to empower you to focus on your next scientific breakthrough. VisioNize Lab Suite (VNLS) enables overall digital lab management including remote device monitoring, notifications, maintenance planning, device documentation as well as experiment management options to improve sample safety, boost your lab's efficiency, enhance reproducibility as well as conformity with increasing compliance pressures. This gives you time to focus on what is important, science!

Explore the gains of a digital, connected lab in our White Paper
www.eppendorf.com/whitepaper-lab-digitalization

Learn more about VNLS
www.eppendorf.com/visionize

Why to switch to VisioNize Lab Suite

Evolve your maintenance routine and realize optimal device performance.

- > Setting of recurring tasks for devices or groups of devices
- > User defined reminders for upcoming tasks
- > Logging the completion of all tasks in the software
- > Booking of instruments in your lab

Streamline your internal audits and eliminate your paper-based documentation.

- > Quickly create reports for devices including:
 - > Time, date and user details
 - > Maintenance history
 - > Events, alarms, notifications acknowledgement
 - > Device trend data
- > Benefit from detailed audit logs with device performance data, such as parameters, user interventions & setpoint changes

Facilitate reproducibility and time-savings with one solution for all your experiments. Eliminate human errors through guided execution and benefit from automated high-quality documentation.

- > Automatically generated documentation available after the execution
- > Create and manage protocols and workflows more convenient
- > Plan experiments and assign to the executing person
- > Execute experiments with full guidance and structured, automated data capture

Know that your samples are secure and be on the safe side with precise decision making.

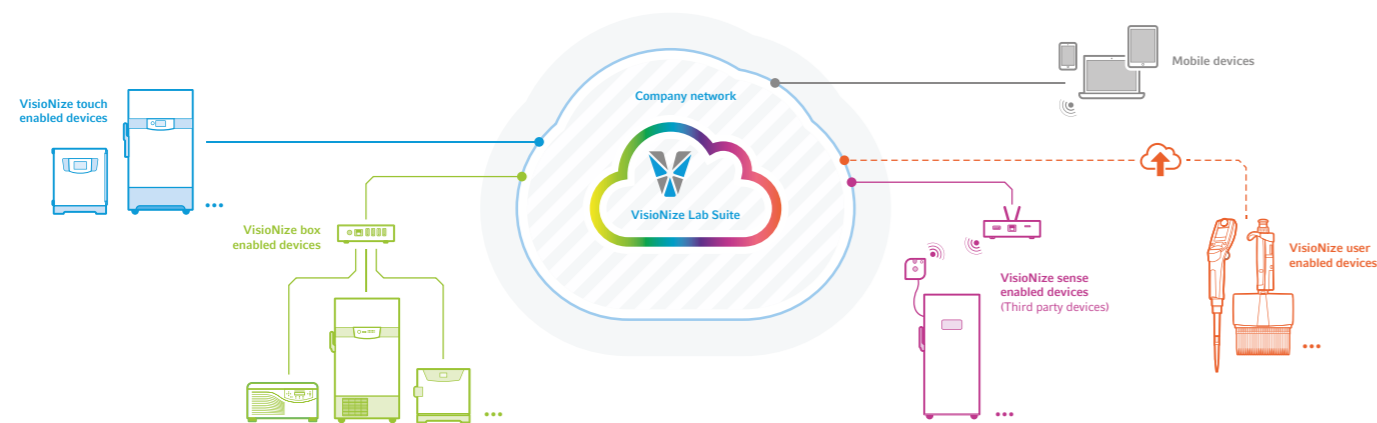

- > User defined notifications of alarms, events and more
- > Real-time device data on your internet connected computer, tablet or smartphone
- > User defined alarm escalation scheme & acknowledgement for absence or assets with high value samples

VisioNize Lab Suite provides a universal laboratory digitization solution to researchers for monitoring instruments from pipettes to freezers irrespective of their manufacturer and minimizes unintended instrument downtime. Furthermore, the platform consolidates many digital tools and is designed to be an open platform for sensor integration, platform integration and more.

Enable connectivity for remote device monitoring

VisioNize sense is an all-in-one sensor system that works with VisioNize Lab Suite and other platforms to monitor the real-time status of devices and protect integrity of samples. The system can capture, record and transfer even the smallest changes in your environmental conditions and can be used to monitor your lab rooms, CO₂ incubators, fridges or freezers from any supplier.

It includes an environmental monitoring sensor that measures ambient temperature, humidity, pressure & light, and a PT-100 extension that can measure temperature of any device (including ULT freezers) within the range of +60 to -90 °C.

All-in-one Electronic Lab Notebook and Sample Management with eLabNext

Struggling with a paper-based documentation system? Or constantly lost in samples? Explore the eLabNext solutions for your laboratory.

More than just an ELN

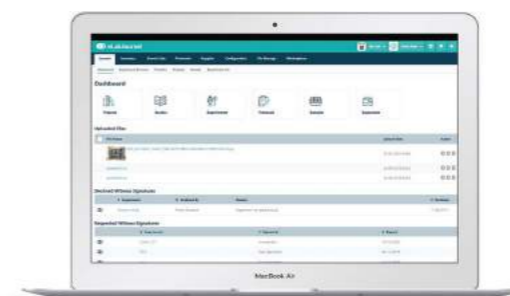

eLabJournal® offers an intuitive and flexible solution to document experimental information in your lab. This all-in-one Electronic Lab Notebook also includes modules for sample tracking and experiment documentation. The software is suitable for any lab ranging from small academic laboratories and start-up companies to large academic institutes and globally operating companies.

- > Fully customizable to fit your workflow
- > Collaborative access to any data
- > Secure & compliant

Flexible sample management for laboratories

eLabInventory offers an intuitive and flexible solution for inventory management in laboratories. This highly customizable software organizes any sample type in the lab and can be fully configured to work in your unique environment. It is available standalone or integrated into eLabJournal.

- > Visualize your inventory storage
- > Organize & optimize your lab
- > Maintain a full audit trail for every sample

Pipetting

Eppendorf – Your Expert Partner for Liquid Handling

As the first company to launch a microliter pipette, we at Eppendorf have over 60 years' experience in precise manual and automatic pipetting & dispensing to transfer the smallest quantities of liquids. Today, liquid handling systems from Eppendorf are used wherever accuracy, precision, and absolute reliability are important.

To make your lab work more efficient, ergonomic and less cumbersome, we offer a wide portfolio ranging from award-winning mechanical single- and multi-channel pipettes over (connected) electronic pipettes and dispensers to fully automated pipetting robots. Rest assured that you'll find the right liquid handling solution with Eppendorf.

How to Select the Right Liquid Handling System

Selecting the right pipette or dispenser can be the key to success in your work. It can boost your efficiency and throughput and ensure reliable results for different use cases. Here is a quick introduction to the basics:

Air-Cushion Principle

Air-cushion pipettes are most commonly used in labs around the world and ideal for liquids with physical properties similar to water. In this instrument type, the piston is separated from the liquid sample by a small air cushion. Temperature or humidity changes, as well as the physical properties of different liquids can affect the performance of air-cushion instruments. To reduce these risks however, Eppendorf air-cushion pipettes work with extra small air cushions and may be adjusted temporarily to different liquid types.

Air cushion principle

Positive Displacement Principle

In positive displacement systems, the piston is part of the tip and in direct contact with the liquid. There is no air cushion that may be affected by liquid sample properties. These tools are therefore ideal for liquids with varying viscosity, volatility, surface tension or density as well as hot or cold liquids. The disposable tips with integrated pistons also prevent contamination and help to keep user and instrument safe when working with hazardous liquids.

Positive displacement principle

Not sure which Liquid Handling system to choose?
Check out our selection chart
www.eppendorf.com/LH-Selection

When Should You Use an Electronic Instrument?

The most important general benefits of using an electronic instrument are: better ergonomics by requiring almost no operating forces, a higher precision and reproducibility and an additional efficiency gain due to various operating modes (such as e.g. pipetting and dispensing with only one tool). Furthermore, electronic instruments are the basis for digital lab solutions supporting scientists with choosing settings for different liquid types, collaborating across the lab or documenting steps.

When Should You Think About an Automated Solution?

Automated liquid handling systems such as the epMotion® family are ideal to take over routine and repetitive pipetting tasks that are commonly found in many molecular biological applications. They are ideally suited whenever complex processes need to be standardized, help to reduce the risk of manual pipetting errors, increase reproducibility and free up your valuable time for other tasks.

Eppendorf Pipettes and Pipette Tips: An Unbeatable Combination

The mere fact that a tip fits onto a pipette cone is no guarantee for the performance of a liquid handling system, which comprises of the components instrument and tip. Eppendorf micropipettes and pipette tips are designed to work in perfect unison and to ensure a maximum of precision and accuracy. With our wide portfolio of variants and sizes as well as certified purity grades, our pipette tips offering is tailored to various requirements in today's labs.

Learn more at page 46

Ensure Consistent Results with our Maintenance, Calibration & Adjustment Services

Pipettes and dispensers are precision instruments with moving parts subject to normal wear and tear that may lead to imprecision over time. Therefore, regular maintenance and calibration are fundamental to the precision and accuracy of your instruments. We provide sincere, reliable services to help you maintain premium performance, and maximum safety of our instruments and your applications.

Learn more at page 306

Your Transition to the Lab of the Future – with Eppendorf

Digital solutions can make everyday lab work even safer and more efficient for you. Keep track of your instruments & samples and plan your next pipette calibration with our digital lab solutions or evolve your electronic pipettes with the VisioNize® pipette manager to work faster, more accurate and in collaboration with your fellow researchers.

Application	Pipetting of aqueous liquids with serological and volumetric pipettes
Volume range	0.1 – 100 mL
Available options	1-channel
Autoclavable	yes
Consumables	Eppendorf Serological Pipets & other serological pipettes
Purity grades of consumables	> Sterile, pyrogen-, DNase-, RNase-, human and bacterial DNA-free. Non-cytotoxic.

Designed to work in perfect harmony with your Easypet® 3 or Pipet Helper®
In combination with a mechanical or electronic pipette controller, Eppendorf Serological Pipets may be used to aspirate and dispense liquids within a volume range of 0.1 mL to 50 mL. These serological pipettes are designed to work in perfect harmony with your Easypet 3 electronic pipette controller or Pipet Helper mechanical pipetting aid but may also be used with any other standard pipette controller. The pipettes offer precise graduations overlaid on the ultra-clear pipette material to facilitate quick and easy reading of the volume. Available in six volume variants, the pipettes are individually wrapped and come packaged in a robust dispenser box to ensure consistent premium quality.

Connected Electronic Pipettes

Evolve your electronic pipette with the VisioNize® pipette manager

Be part of a new generation of pipette managers. Boost your individual pipetting skills while bringing teamwork up to a new level. The VisioNize pipette manager is a standalone touch server that reacts in real-time with Eppendorf Xplorer®, Eppendorf Xplorer® plus and Xplorer® plus Move It® connected pipettes via WiFi technology.

What connectivity can do for you:

- > Transmit settings and other parameters quickly to connected electronic pipettes and start pipetting right away
- > Get guidance from the software-embedded Liquid Manager when working with liquids of different viscosity, volatility or foam building liquids
- > Choose from predefined Eppendorf liquid types (e.g. Acetone) or create your own
- > Manage your pipette fleet more effectively within your working group and enhance collaboration (e.g. through sharing created liquid types)

The VisioNize pipette manager will continue to evolve to include numerous updates and additions.

Learn more about the VisioNize® pipette manager:

www.eppendorf.com/visionize-pipette-manager

VisioNize pipette manager

External touch server to enable communication with connected electronic pipettes as standalone systems.

Convert the Eppendorf Xplorer®/Eppendorf Xplorer® plus pipette into a connected electronic pipette.

Connect tablets (Android® & iOS®) to work in parallel.

Apart from the operation via the VisioNize pipette manager, users can connect tablets allowing access to the software and it's features.

The embedded software is based on the VisioNize touch interface concept that has been extensively tested by customers to reduce learning and adjustment time. It is used across different Eppendorf instruments, like the CryoCube® F740hi ULT freezer or the Mastercycler® X50.

Get Ready For Move It®

Move It® doubles your pipetting performance

Do you frequently transfer samples between different vessel formats, such as between tubes and plates, and strive for more efficient and safe solutions? The new adjustable tip spacing pipette Move It® accelerates and simplifies synchronous pipetting of a series of samples. A unique design without tubing connections results in increased precision and durability as well as autoclavability, increasing user and sample safety.

Product features

- > 4-, 6-, 8- and 12-channel air-cushion pipettes with variable volume and adjustable tip spacing option
- > Available as mechanical (Research plus) and electronic (Xplorer plus) adjustable tip spacing multi-channel pipette
- > For plates (384-, 96-, 48-, 24- and 12-well), tubes (1.5 and 2.0 mL), agarose gels and more

Applications

- > ELISA
- > Cell culture
- > Cell-based assays
- > (Real time) PCR
- > Mouse genotyping
- > Blood analysis
- > FACS analysis
- > Media transfer
- > Dilution series
- > Screening

Multiple sample transfer between different formats becomes fast and secure with Move It

Instead of pipetting many times, move 4 – 12 samples simultaneously. Reduce throughput time while increasing your performance.

More about Move It®

Please use the QR Code.

www.eppendorf.com/move-it

Increase your 384-well plate efficiency

www.eppendorf.com/ready-set-pipette

Move It pipettes work without any tubing connections. Your benefits: fewer moving parts and a smaller air cushion increase durability and precision. Furthermore, the unique design makes autoclaving possible.¹⁾

¹⁾ (Research plus variants fully, Xplorer plus lower part only).

The pipette head may be rotated by 360°. Work ergonomically and benefit from perfect readability of the display at any pipetting angle.

Move It pipettes are extremely well-balanced to minimize hand and body fatigue. Experience the difference!

Move It® - Adjustable Multi-channel Pipettes

Eppendorf Research® plus

The ultra-light pipette for effortless pipetting

The Eppendorf Research plus mechanical pipette is the result of over 50 years of experience in liquid handling and is one of the most commonly used pipettes in the world. Thanks to the pioneering Eppendorf PhysioCare Concept®, the Research plus is highly ergonomic and protects your health in the laboratory. It features very low weight and operation forces, is extremely reliable, fully autoclavable and easy to use.

With a variety of options available, including single-channel pipettes with fixed or variable volume, multi-channel pipette options with 8-, 12-, 16- or 24-channels, and our Research plus Move It® adjustable tip spacing micropipettes (see page 32), we are confident that we can offer the right choice for your application.

Product features

- > Mechanical air-cushion pipette for accurate, easy & ergonomic pipetting of aqueous solutions
- > Feel the difference in weight and pipetting forces: this ultra-light pipette is designed according to the Eppendorf PhysioCare Concept® principles
- > Enjoy minimal tip attachment forces due to a spring-loaded tip cone (available for all pipettes up to 1 mL) that reduces stress without sacrificing tip tightness

Applications

- > Forward pipetting
- > Reverse pipetting
- > Removal of supernatants
- > Sample mixing
- > Phase extraction
- > Filling of plates, gels, and reaction vessels

A joy for your eyes - The display
4-digit volume display with magnifying window. Easy to read. Allows for more accurate volume setting.

Eppendorf Reference® 2

A premium pipette that delivers extraordinary precision and accuracy

Choose the Eppendorf Reference 2 mechanical pipette with ergonomic single-button operation and benefit from its high precision and accuracy with reduced operating efforts. Its smooth surface and full autoclavability guarantee efficient decontamination - making it the ideal companion when working under sterile conditions. Available as a single-channel pipette in fixed or variable volume, and as 8- and 12-channel pipettes - all with time-saving single-button operation. Once you have experienced this unique operating philosophy you will not want to change back!

Product features

- > Mechanical air-cushion pipette with outstanding precision and accuracy - operated with one button
- > With its innovative one-button operation, the Reference 2 allows fast and ergonomic handling with reduced operating efforts and active aerosol reduction. A clear haptic feedback helps to avoid accidental tip ejection
- > 4-digit display with magnifying window for quick and secure volume setting and identification (clearly visible from every angle), incl. volume lock

User-friendly temporary adjustment

For liquids other than aqueous solutions. Recommended settings are provided in the manual and you can easily and quickly reset to the manufacturer settings.

Exquisite stainless steel upper part

Equips the Reference 2 with outstanding robustness at potential impact sites. It includes quick volume setting and a secure volume lock.

Reagent reservoir Tip-Tub, autoclavable reservoir for the aspiration of liquids with multi-channel pipettes, 1 set = 10 reservoirs and 10 lids	0030 058 607
Grease for pipettes, incl. lint-free applicators, to relubricate the piston or cylinder in pipette lower parts	0013 022 153

Eppendorf Xplorer®/Eppendorf Xplorer® plus

Simple, fast and precise with untiring battery power – You deserve it!

People who give 100 % every day deserve the best tools and the best laboratory equipment. The Eppendorf Xplorer and Xplorer plus electronic pipettes are single-, 8-, 12-, 16- and 24-channel pipettes designed to aspirate and dispense liquid volumes from 0.5 µL to 10 mL, while eliminating many of the potential error risks associated with manual pipetting. With the Eppendorf Xplorer/Xplorer plus electronic pipette, your work achieves a new level of simplicity, precision and reproducibility. Also available as Move It® adjustable tip spacing multi-channel pipette (see page 32).

Product features

- > Electronic air-cushion pipette reaching new levels of simplicity, precision and reproducibility
- > Intuitive handling with multi-functional rocker featuring »up is up« and »down is down« functionality and selection dial for quick and easy selection of functions
- > Self-explanatory color display without submenus and with ergonomic angle for optimal readability in every position

Applications

- > Automated pipetting of liquids (**Pip**) for forward pipetting
- > Manual pipetting (**Man**) for volume determination
- > Pipetting and mixing (**P/M**) for automated mixing of samples
- > Dispensing (**Dis**) for manual filling of plates, gels, and reaction vessels
- > Automatic dispensing (**Ads**) for automated filling of plates, gels, and reaction vessels
- > Multi aspiration: Pooling supernatants from different vessels (**Spc**)¹⁾
- > Sequential dispensing and pipetting (**Spc**) for user-defined volume steps¹⁾
- > Reverse pipetting (**Spc**) for non-aqueous solutions¹⁾
- > Diluting (**Spc**) for preparation of dilution series¹⁾
- > Fix volume (**Fix**): Save up to 10 volumes for ease of operation¹⁾

¹⁾Xplorer plus only

Eppendorf Pipette Holder System

Well within reach: the Eppendorf Pipette Holder System helps you to organize your lab

Save valuable bench space with the Eppendorf Pipette Holder System! With space for up to six single- or multi-channel pipettes, you can easily store all of your Eppendorf pipettes and multi-dispensers within easy reach. Our flexible carousels, stands and wall mount devices fit all current Eppendorf manual liquid handling instruments as well as most of their predecessors.

- > Pipette Carousel 2: Rotatable holder with completely new design for all mechanical pipettes
- > Charger Carousel 2: Carousel with intelligent charging electronics, increased capacity for up to six instruments (charges four instruments at a time and all six in turn) and magnetic power connector for fast and easy connection

- > With Charger Stand 2, the Eppendorf Xplorer/Xplorer plus or Multipipette® E3/E3x is always fully charged and ready for use. Pipette Stand 2 carries one Multipipette M4.
- > Large rubber feet protect stands and carousels from liquids spilled on lab bench
- > Charger Stand 2 with cord wrap functionality for more convenience

- > Place your pipette and Multipipette where you need them: Mounted to a wall, on the shelf above your bench or inside a biological safety cabinet.
- > Pictograms on all holders for clear assignment in the lab
- > Pipette holders are downwards compatible for Eppendorf Research and Reference pipettes

The Perfect Fit – Eppendorf Pipette Tips

With respect to material, fit, design and operating forces, our pipette tips set new standards. The close environment of each sample should be adapted to its specific quality and purity needs. This can involve a specific purity level or the absence of certain substances, but also stability, reliability or geometry. The epT.I.P.S.[®] pipette tips from Eppendorf are designed to cover all of the specific needs of your samples.

Our epT.I.P.S. – Eppendorf Totally Integrated Pipetting System – have been developed to work in perfect combination with our pipettes. This results in reduced tip attachment and ejection forces while maintaining a complete seal between tip and pipette. Additionally, the universal nose cone design allows the tips to be used with pipettes from other manufacturers.

In the Eppendorf owned production facilities in the north of Germany, we can maintain the highest standards in the selection and processing of plastic materials. Ideal wetting properties, high transparency, and special certified purity levels are the visible expression of this production philosophy. Every tip is manufactured to match specifically to its respective Eppendorf pipettes, thus ensuring the maximum precision and reliability you have come to expect and to rely on.

Depending on their purity grade, epT.I.P.S. pipette tips from Eppendorf are available in a number of different packaging formats:

epT.I.P.S.[®] Standard

- > Original, high-quality Eppendorf pipette tips packaged in resealable bags
- > Available in sizes from 10 µL to 10 mL in Eppendorf Quality purity grade
- > epT.I.P.S. Standard 200 µL, 300 µL and 1,000 µL tips are also available color-coded yellow and blue

epT.I.P.S.[®] Box 2.0/epT.I.P.S.[®] Set

- > Contamination-free transfer of trays to stable working box
- > System optimized for use with multi-channel pipettes
- > Color-coded trays for simple identification of tips and pipette

epT.I.P.S.[®] Racks

- > Eppendorf Biopur[®] pipette tips in disposable Racks offer the highest biological purity grade
- > Ensured PCR clean, sterile, pyrogen-, ATP- and DNA-free
- > All pre-sterilized epT.I.P.S. and ep Dualfilter T.I.P.S. variants are available in Racks

epT.I.P.S.[®] Singles

- > Eppendorf Biopur[®] pipette tip, individually wrapped
- > Ensured PCR clean, sterile, pyrogen-, ATP- and DNA-free
- > For use in pharmaceutical and food industry, molecular biology and cell technology

epT.I.P.S.[®] Reloads

- > Reduced waste as compared with disposable racks
- > The refill trays can be autoclaved up to 121 °C, in packaging and without foil, for subsequent use
- > The refill system, depending on tip size, is packaged as either dual-sided or in stack form

Eppendorf Purity Grades for Tips

epT.I.P.S.[®], ep Dualfilter T.I.P.S.[®] and Combitips[®] advanced stand for highest quality and purity

The high precision and accuracy of pipette tips and Combitips is ensured by precise molding. Each lot of pipette tips and Combitips is subject to gravimetric measurement during final testing. Low wetting ensures reliable volume readings and minimal adhesion. Pipette tips and Combitips cylinders are made of PP (polypropylene). A relatively inert plastic characterized by low wettability as well as high dimensional and mechanical stability across a wide temperature range. For the Combitips advanced pistons, PE (polyethylene) is used. This is due to the fact that ideal running properties between two parts can only be achieved by using two different types of plastic. Our tips are available in a variety of purity grades (see table opposite).

Eppendorf Certificate

Certificate of Purity – PCR clean

This package contains a high quality consumable manufactured under the PCR clean Eppendorf Purity Standard.

The Eppendorf PCR clean consumables are produced in a class 6 (according to VDI 2083) and a class 100,000 (according to U.S. Fed. Stand. 209 D) clean room environment.

For this product Eppendorf certifies the following [1]:

- Free of detectable
 - Human DNA
 - DNase
 - RNase
 - PCR inhibitors

Quality control and subsequent certification is done by an independent laboratory (accredited by DAkkS). Lot-specific certificates are available on request or on the internet at www.eppendorf.com/certificates.

The certification comprises the following tests:

Human DNA Contamination Test

A PCR master mix is prepared using the QuantiTect[®] Sybr[®] Green PCR Kit (Qiagen[®]) and primer for the detection of human DNA. The primers amplify a 294 bp fragment present in more than 1x10³ copies per human cell. The master mix (15 µl) is added to 5 positive control vessels containing known amounts of human DNA (32, 16, 8, 4 and 2 pg in 10 µl H₂O) plus a negative control (10 µl DNA-free H₂O).

15 samples are rinsed one after another with DNA-free water. 10 µl of this solution is added to 15 µl master mix. PCR is done for 30 cycles.

The emittance of Sybr Green-induced fluorescence is detected in samples and controls. For the samples to pass certification, no fluorescence must be found corresponding to the negative control.

DNase Test

15 samples are rinsed one after another with DNA-free water. 17 µl of these solutions are mixed with 3 µl DNase-buffer containing 100 bp DNA-ladder in a DNase-free tube. A positive control is spiked with DNase, a negative control contains DNA-free water. All tubes are incubated for 24 h at 37 °C.

Pure quality

With the strictest control criteria, internally and externally monitored, we ensure the consistent high quality of our products – from lot to lot. Our consumables are available in a variety of purity qualities. Eppendorf Quality as well as more advanced purity grades:

“Sterile, Protein-free, PCR clean, Eppendorf Forensic DNA Grade, and Biopur[®]”. In addition to our internal process controls and general quality certificates, lot-specific certificates are provided by an external accredited laboratory for the Sterile, Protein-free, PCR clean, Eppendorf Forensic DNA Grade, and Biopur purity grades. This allows us to consistently meet our customer’s high demands when it comes to purity (www.eppendorf.com/purity). As a special service, we make the inspection certificate for each delivered lot available online (www.eppendorf.com/certificates).

¹⁾ For accurate details regarding resistance to centrifugation, please refer to the respective product pages. ²⁾ Lot-specific certificate can be downloaded from www.eppendorf.com/certificates. ³⁾ Only available in North America. ⁴⁾ According to ISO 18385. ⁵⁾ Testing showed conformity within the detection limits

epT.I.P.S.[®]

Description

epT.I.P.S. PipetteTips – Eppendorf Totally Integrated Pipetting System – the perfect combination with Eppendorf pipettes, resulting in reduced-force tip attachment and ejection with complete sealing.

Product features

- > epT.I.P.S. pipette tips can be used universally, including pipette models from other manufacturers
- > Available in purity grades of: Eppendorf Quality, PCR clean, Biopur[®]
- > Disposable Racks in slim new epT.I.P.S. design, reclosable, optimized for safe stackability, in sterility packaging compliant to DIN EN ISO 11607 - 1 and 2 and DIN EN 868-2 to 10

Applications

- > Pipetting liquids
- > Dispensing liquids
- > Mixing liquids
- > Filling plates and reaction vessels
- > Filling gels for electrophoresis
- > Phase extraction and removal of supernatants
- > For applications in 384-microplate format we recommend using 16- or 24-channel pipettes together with epT.I.P.S. 384

GELoader[®]

- > Special tip for gel electrophoresis, loading of polyacrylamide gels
- > Flexible long and narrow tips for handling of smallest volumes
- > GELoader tips and rack autoclavable

Microloader[™]

- > Extremely long, fine and flexible tip for filling of microcapillaries for microinjection and where additional reach is needed
- > Microloader tips and rack autoclavable
- > Highest precision and accuracy when used with Eppendorf pipettes for 0.5 to 10 µL (gray control button)

epT.I.P.S.[®] 384

epT.I.P.S. 384 pipette tips with innovative SOFTattach technology for 16- and 24-channel as well as adjustable tip spacing pipettes

epT.I.P.S. 384 micropipette tips with the innovative SOFTattach technology are optimized for use with Eppendorf Research[®] plus and Xplorer[®] plus 16- and 24-channel pipettes, as well as 20 µL and 100 µL Move It[®] adjustable tip spacing pipettes. Process 384-well plates manually with the highest level of tip tightness and alignment but extremely low operating forces.

Product features

- > epT.I.P.S. 384 pipette tips build a system together with the Research plus and Xplorer plus 16- and 24-channel pipettes as well as 20 µL and 100 µL Move It adjustable tip spacing pipettes for utmost safety and reliability
- > Designed for a cone distance of 4.5 mm
- > Innovative SOFTattach technology allows for reliable tip fit and tightness

The elastic forming grooves

As soon as the tips are attached, they adapt perfectly to the shape of the tip cone. This SOFTattach technology allows the user to achieve perfect tip tightness and safety.

ep Dualfilter T.I.P.S.[®] 384

Description

ep Dualfilter T.I.P.S. 384 with the innovative SOFTattach technology are optimally coordinated to the Eppendorf 16- and 24-channel pipettes Research plus and Xplorer plus, as well as 20 µL and 100 µL Move It adjustable tip spacing pipettes. Process 384-well plates manually with highest level of filter pipette tip tightness and coaxiality but extraordinary low operating forces.

Product features

- > ep Dualfilter T.I.P.S. 384 pipette tips build a system together with the Research plus and Xplorer plus 16- and 24-channel pipettes as well as 20 µL and 100 µL Move It adjustable tip spacing pipettes for utmost safety and reliability
- > Innovative SOFTattach technology allows for reliable tip fit and tightness while operating forces are reduced to a minimum
- > Fill a whole 384-well plate without loosening pipette tips

An extraordinary tip alignment

All tips are perfectly aligned, making it easy and safe to transfer up to 24 samples simultaneously to the 384-well plate.

ep Dualfilter T.I.P.S.[®]

Description

ep Dualfilter T.I.P.S. Filter Tips - The ultimate protection of pipette and sample against unintentional and unnoticed contamination by aerosols, drops and splashes.

Product features

- > Dual protection against aerosols¹⁾ and biomolecules
- > Dual protection for pipette and sample
- > Free of PCR inhibitor additives

The unmistakable blue and white filter layers are made of flexible, hydrophobic material to fit perfectly in the tip cone and retain practically 100 % of all aerosols¹⁾ and biomolecules. This unique filtering effect is achieved using various well-defined pore sizes in the two filter layers.

¹⁾ An aerosol is a colloid of fine solid particles or liquid droplets, in air or another gas.

ep Dualfilter T.I.P.S.[®] SealMax[®]

Description

ep Dualfilter T.I.P.S. SealMax Self-Sealing Filter Tips - The combination of the well known unique two-phase filter protection of sample and pipette with an innovative liquid and moisture barrier.

Product features

- > Reliable protection from liquids, aerosols¹⁾ and biomolecules
- > Certificate of filter efficiency of class ISO 25 E in accordance with DIN EN ISO 29463-5 available here
- > No PCR inhibiting additives

¹⁾ An aerosol is a colloid of fine solid particles or liquid droplets, in air or another gas.

epT.I.P.S.[®] LoRetention[®]

The "Pearl Effect" – a comparison of the amount of residual liquid when pipetting solutions that contain detergents:

1. Significant loss of sample using standard tips
2. Maximized recovery with epT.I.P.S. LoRetention

Description

The "Pearl Effect" - Maximum recovery and reproducibility with epT.I.P.S. LoRetention and ep Dualfilter T.I.P.S. LoRetention - No sample loss, reduced costs, improved results.

Product features

- > Ultrahomogenous surface for maximized reproducibility
- > Ultrahydrophobic surface for minimal sample loss
- > Significantly reduced foam formation during pipetting

epT.I.P.S.[®] Long

Description

epT.I.P.S. PipetteTips – Eppendorf Totally Integrated Pipetting System - the perfect combination with Eppendorf pipettes, resulting in reduced-force tip attachment and ejection with complete sealing.

Product features

- > Slim design of the extra long epT.I.P.S. and ep Dualfilter T.I.P.S. pipette tips
- > Always obtain high-quality results when pipetting from and into Eppendorf Tubes[®] 5.0 mL, conical tubes, cell culture flasks, deep wells and other deep vessels
- > The risk of touching the walls of deep vessels is minimized and cross-contamination is prevented

Multipette® M4

Aspirate liquid once and dispense up to 100 times without tip refill

Say goodbye to tedious, long serial pipetting tasks! The Multipette M4 pipette from Eppendorf is ideal for repetitive dispensing of volumes in long series without the need for repeated liquid aspiration. In combination with Combitips® advanced dispenser tips, even viscous or volatile liquids that are difficult to pipette are no problem for the Multipette. With hermetically sealed tips, the system also offers a high level of safety for handling of infectious, toxic or radioactive liquids.

Product features

- > Mechanical positive displacement multi-dispenser: fill the tip once and dispense up to 100 times without a refill
- > Automatic Combitips® advanced recognition eliminates time consuming volume calculations
- > Easy-to-read display guarantees stress-free and intuitive operation with a digital display of the dispensing volume

Applications

- > Repetitive dispensing of volumes in long series such as tube or plate filling, aliquoting reagents and kit usage
- > Safe dispensing of toxic, radioactive and other hazardous liquids
- > Precise and accurate dispensing of viscous solutions (e.g. glycerol) or liquids with high vapor pressure (e.g. ethanol)

Ordering information

Description	Order no.
Multipette® M4 , single-channel, incl. 1x Combitips® advanced 2.5 mL (green) tip and holder for Eppendorf Pipette Holder System or wall mounting, 1 µL – 10 mL	4982 000 012
Multipette® M4 Starter Kit , single-channel, incl. Combitips® advanced Rack, Combitips® advanced assortment pack (1 tip of each size) and holder for Eppendorf Pipette Holder System or wall mounting, 1 µL – 10 mL	4982 000 314
Pipette Holder 2 , for one Multipette® M4, for Pipette Carousel 2 and Charger Carousel 2 or wall mounting, sticky tape included	3116 000 147
Battery CR2032 , for Multipette® M4, 1 piece	4980 215 003

Multipette® E3/Multipette® E3x

Precise, safe, versatile and a dream to use over a long pipetting day!

These electronic dispensers combine easy handling during dispensing with a broad range of features! The Multipette E3x dispenser offers additional high-end applications, such as titration and aspirating of supernatants or sequential dilutions. In combination with the Combitips® advanced pipette tips, it is an essential lab tool for all kind of liquid handling.

Product features

- > Electronic positive displacement dispenser with several functions e.g. for dilution series, titration, automatic dispensing into microplates and vessel series
- > Automatic Combitips® advanced pipette tip recognition: Eliminates time-consuming volume calculations, avoiding incorrect dispensing volumes
- > Ergonomic one-button tip ejector: For one-handed operation and contact-free Combitips® advanced pipette tip ejection

Applications

- > Dispensing (**Dis**) or Automatic dispensing (**Ads***) for repetitive (*automated) dispensing of set volumes in long series such as tube or plate filling, aliquoting reagents and kit usage
- > Pipetting (**Pip**) for refilling of liquids
- > Sequential dispensing (**Seq**) to create dilution series¹⁾
- > Aspiration (**Asp**) for pooling of supernatants from different vessels¹⁾
- > Aspirate and dispensing (**A/D**) for pooling and volume determination with subsequent dispensing¹⁾
- > Titration (**Ttr**) for controlled dropwise dispensing and concentration determination¹⁾

Combitips® advanced

Description

Optimize your workflows involving plates or large series of other vessels with Combitips advanced dispenser tips and accurately and precisely pipette both viscous and volatile liquids. These positive displacement pipette tips are your consumable of choice for all Multipipette® multi-dispenser pipettes from Eppendorf and offer a variety of advantages in comparison to their predecessor Combitips plus. Available in nine volume sizes (0.1 mL – 50 mL), Combitips advanced have a maximum range of dispensing volumes with increments as low as 100 nanoliters depending on the Multipipette model used.

Product features

- > Combitips® advanced tips are the ideal consumable choice for all Multipipette® multi-dispenser pipettes from Eppendorf
- > The 9 volume sizes (0.1 mL – 50 mL) offer a maximum range of dispensing volumes with increments as low as 100 nanoliters depending on the Combitips® advanced used
- > Elongated Combitips® advanced in volumes 2.5 mL, 5.0 mL and 10 mL make it possible to reach the bottom of the most common laboratory vessels

Applications

- > Positive displacement principle (comparable to a syringe)
- > High-precision dispensing regardless of the physical properties of the liquid (like e.g. viscosity, volatility, density or temperature)
- > Prevents aerosol contamination with hermetically sealed piston for secure dispensing
- > Provides protection from radioactive and toxic substances
- > Quick dispensing of long series with precise, repeated dispensing of identical volumes (with Multipipette hand dispensers)

ViscoTip®

Easily master the highest viscosity liquids with your Multipipette® from Eppendorf!

The latest member of the Combitips® advanced dispenser tip family, ViscoTip positive displacement tips, are specifically designed and optimized for handling high viscosity liquids up to 14,000 mPa*s such as glycerol 99.5 %, Tween®, oils, creams, shampoos, nail polish - even honey. So, if you need to dispense high viscosity liquids and you want to do it with ease, turn to ViscoTip.

Product features

- > Specialized for liquids with a dynamic viscosity from 200 mPa*s to 14,000 mPa*s
- > For dispensing volumes from 100 µL to 10 mL in increments of 10 µL
- > Make life easier for your instrument: The new design of the tip means significantly lower operation forces are used, thus it speeds up work and reduces energy consumption

Applications

- > Positive displacement principle (comparable to a syringe)
- > For highly viscous liquids
- > Quick dispensing of long series with precise, repeated dispensing of identical volumes (with Multipipette hand dispensers)

Varipette® 4720

The large volume pipette for large bottles or tall, narrow vessels

Handle challenging liquid handling tasks with ease! The Varipette® 4720 is a large volume, positive displacement pipette that is optimized for lab work with viscous or volatile liquids. Ideal to safely aspirate liquids from large bottles or tall, narrow vessels when using the Eppendorf Varitips® S system (figures 2 & 3) or from beakers using the Varitips® P pipette tips (figure 1).

Product features

- > Mechanical positive displacement pipette designed for precise pipetting of liquids with high vapor pressure or viscosity
- > Volume range: 1 mL to 10 mL, adjustable in 10 µL increments for accurate volume setting via 4-digit volume display
- > Fast pipetting and convenient operation due to unique one-hand operation. Liquid automatically aspirates and dispenses by simply pressing the operating lever

Applications

- > Safe and precise pipetting of aqueous, viscous and volatile liquids

Eppendorf Top Buret

Continuous and pulse-free manual titration

The innovative Eppendorf Top Buret sets new standards in manual liquid titration. Its pulse-free dispensing technique means that exact volumes can be dispensed continuously, making titration simple, safe and precise. And with a user-friendly display and simple control features, this extremely sturdy digital bottle-top burette is really easy to use.

Product features

- > Bottle-top burette with continuous, pulse-free dispensing technology for manual titration
- > Digital display ranging from 0.01 mL to 999.9 mL, dosing rates: Model M: 2.5 mL per turn, Model H: 5 mL per turn
- > Recirculation valve with valve lever

Varispenser® 2/Varispenser® 2x

Safe and easy dispensing of liquids from bottles without compromise

Need a bottle-top dispenser for aggressive solutions such as acids, solutions or bases? The Eppendorf bottle-top dispensers Varispenser 2 and Varispenser 2x allow you to safely dispense liquids from a wide range of bottles without reagent waste and are ideal for conveniently dispensing aliquots from large supply bottles. Chemically resistant and autoclavable, their tight seal provides protection against caustic media.

Product features

- > Bottle-top dispenser with standard GL 45 thread for most common bottle threads in all sizes
- > Safety valve balls in discharge valve prevent leakage when discharge tube is not mounted
- > Air vent cap can be unscrewed for easy assembly of drying tube

Applications

- > Liquid dispensing directly from supply bottles or other big laboratory vessels containing aqueous liquids, lyes, acids, bases or solvents

Easypet® 3

Experience total control with the Easypet 3

Looking to simplify your manual liquid handling tasks in cell culture and other applications? The Easypet 3 electronic pipette controller from Eppendorf gives you precision and complete speed control, making it ideal for serial dispensing and resuspending bacterial or cell pellets. Easypet 3 can be used with all types of serological and volumetric pipettes from volumes of 0.1 – 100 mL.

Product features

- > Electronic pipette controller designed for use with serological and volumetric pipettes
- > Intuitive and convenient speed adjustment simply done with the tips of your fingers
- > Lightweight, well-balanced and ergonomic design that allows for fatigue-free pipetting

Applications

- > Liquid handling with serological and volumetric pipettes from 0.1 – 100 mL
- > Serial dispensing of aliquots of different volumes
- > Resuspension of bacteria or cell pellets
- > Aspiration of cell layer from e.g. Ficoll® gradient

Technical specifications	
Model	Easypet® 3
Weight	160 g
Rechargeable battery	
Capacity	1,100 mAh/3.7 V
Charging time	~3 h
Type	Lithium polymer
Channel type	single-channel
Number of dispensings	~2,000 (with a 25 mL pipette)
Operation	Electronic
Pipetting type	Air-cushion
Mains/power supply	
Input	100 V – 240 V AC ± 10 %, 50 Hz – 60 Hz, 0.5 A
Output	5 V DC, 1.0 A

Pipet Helper®

The mechanical pipette aid that allows inexperienced users to work like experts!

Make liquid handling tasks easier than ever with the Pipet Helper mechanical pipette aid from Eppendorf. Streamline lab applications such as assay preparation, petrochemical sample transfer, and preparing buffers for chromatography and fluids for fermentation. Ensuring high-precision manual aspiration and dispensing of liquids, the Pipet Helper is perfect also for less experienced users.

Product features

- > Lightweight mechanical pipette controller with reduced operating force
- > Easy maintenance and cleaning due to easy disassembly, few parts and fully autoclavable
- > Comfortable working because of the good balance and pleasing material

Eppendorf Serological Pipets

Designed to work in perfect harmony with your Easypet® 3 or Pipet Helper®

Eppendorf Serological Pipets are single-use serological pipettes made of ultraclear plastic. They are designed to aspirate and dispense liquids using mechanical or electronic pipette controllers such as the Pipet Helper® or Easypet® 3.

Product features

- > Clear and precise graduations for easy volume determination
- > Color-coding for easy identification of pipet sizes
- > Subunits with dispenser option to keep stored products safe

Automated Pipetting

Automated pipetting represents a natural progression in biological sample processing and gives superior accuracy and reproducibility compared to manual pipetting. It simplifies the process of liquid handling for academic research as well as industrial applications.

The *epMotion*® line of automated liquid handling systems from Eppendorf offer pipetting solutions for low, medium, and high-throughput workflows that can dramatically increase the consistency of your liquid handling tasks.

At Eppendorf, we also provide a wide range of consumables and accessories to extend the versatility and scalability of our *epMotion* workstations, ensuring that our automated liquid handling systems meet the specific needs of your laboratory.

Automated pipetting workstations

Increase the accuracy and precision of your pipetting with our *epMotion* range of robotic liquid handlers for low, medium, and high-throughput molecular biology applications. Our liquid handling robots can save you time and increase the reproducibility of your results.

Molecular biology methods and genomic workflows are our application focus. We offer easy-to-use, but powerful automated solutions for PCR and qPCR, nucleic acid purification, and next generation sequencing (NGS) library preparation.

Why lab automation?

www.eppendorf.com/choose-a-robot

Automate your NGS workflow!

Automated pipetting consumables & accessories

Ensure your workflow is as efficient as possible with our *epT.I.P.S.*® Motion range of pipetting supplies, designed for use with *epMotion* workstations. All our liquid handling consumables are available in a range of purity grades and are manufactured under strict compliance with ISO regulations.

Optimize your liquid handling workflow with accessories designed for use with *epMotion* workstations. These accessories extend the functions of our liquid handling robots and enable you to automate more of your protocol for consistent parallel sample processing.

epMotion® 5073t NGS Solution

Description

The epMotion 5073t NGS solution contains everything you need to begin automated NGS library preparation of up to 24 samples. It combines automated liquid handling and unique software features with all of the accessories and high-quality consumables needed for reliable low-to-medium-throughput NGS library preparation. By automating NGS library preparation with epMotion 5073t, you increase reproducibility and reduce pipetting errors and, in turn, improve your experimental data.

Easily operate liquid handling tasks via the MultiCon Desktop PC equipped with Windows 10. The intuitive software interface allows for fast and flexible method implementation and an integrated Eppendorf ThermoMixer® allows for upstream nucleic acid purification. Save valuable time for other laboratory tasks and data analysis!

Product features

- > Up to 24 samples for NGS library preparation with minimal user intervention
- > Three dispensing tools eliminate interruptions during NGS library preparation
- > TipHolder 73 and Gripper Tower allow the use of 5 x 96 tips on just two ANSI/SLAS positions

Applications

- > Sample or reagent transfer
- > Sample mixing and tempering
- > Assay set-up
- > Nucleic acid extraction
- > Dilution series, cherry picking and normalization
- > NGS library preparation

epMotion® 96 and 96xl

Description

The Eppendorf epMotion 96 is a 96-well plate robot offering fast and precise, parallel 96 channel microplate processing, in 96 and 384 well plates. The epMotion 96 is easy to use, and accessible for a wide range of applications like cell-based assays, ELISA, plate copying, 96-well plate handling and magnetic bead-based clean-ups. Its ergonomic design and intuitive handling makes the epMotion 96 a great tool for anyone in the lab who needs accurate and reproducible liquid handling in 96-well format.

Product features

- > Volume range: 0.5 – 300 µL (epMotion 96) or 5 – 1000 µL (epMotion 96xl)
- > Intelligent, preset applications available for aspiration, dilution, sequential dispensing, multi-dispensing
- > Ability to program multistep pipetting tasks for complex applications

epMotion® 5070/5070 PCR Solution

Description

The innovative epMotion 5070 is the most compact solution for accurate and reproducible automated pipetting of the epMotion family. With four worktable positions, it is a perfect match for routine applications. The 5070 PCR solution comes ready equipped with all accessories for hassle-free PCR and qPCR set up. Don't wait to achieve reproducible automated pipetting results.

Product features

- > 4 ANSI/SLAS worktable and unlimited virtual positions
- > Maximum pipetting accuracy from 0.2 to 1,000 µL
- > Calibrated 1-channel and 8-channel pipetting tools

Ordering information

epMotion® 5073l

Description

Why spend valuable time on challenging liquid handling procedures when you can achieve fast, accurate and reproducible PCR setup with the epMotion 5073l automated liquid handler? Perfect for medium-throughput setup for PCR, real-time PCR (qPCR), DNA/RNA normalization, cherry picking, dilution series and reformatting, the epMotion 5073l helps you perform pipetting tasks with ease and at speed!

Product features

- > 6 ANSI/SLAS microplate positions
- > Software assistants for simple, step-by-step application programming
- > Optical sensor ¹⁾ for detecting liquids, labware, tips

¹⁾ US patent 6,819,437 B2

epMotion® 5073t

Description

The epMotion 5073t automated liquid handling system allows you to perform fast and efficient nucleic acid purification (NAP) of 1 to 24 samples. It is also ideal for automating more complex, time-consuming liquid handling tasks such as DNA/RNA extraction. Save time and improve the reproducibility of your results with the epMotion 5073t!

Product features

- > 6 ANSI/SLAS microplate positions
- > Intuitive, drag and drop based software
- > Optical sensor ¹⁾ for detecting liquids, labware, tips

¹⁾ US patent 6,819,437 B2

epMotion® 5075l

Description

Don't stress yourself by doing complex pipetting tasks when you can perform fast, accurate and reproducible PCR plate setup with the epMotion 5075l automated liquid handler. The epMotion 5075l offers 15 worktable positions and is well suited for high-throughput preparation of plates for PCR or real-time PCR (qPCR), DNA/RNA normalization, cherry picking, dilution series, reformatting and immunoassays. Say goodbye to tedious pipetting steps!

Product features

- > 15 ANSI/SLAS worktable positions
- > Maximum pipetting accuracy from 0.2 to 1,000 µL
- > Automatic exchange of all tools (gripper, 1-channel and 8-channel)

Ordering information

Description	Order no.

epMotion® 5075v/5075vt

Description

Complex applications, such as nucleic acid purification or solid phase extraction, should not tie you to the workbench. With integrated vacuum filtration and a combined mixing and temperature control (only for 5075vt) in one system, the epMotion 5075v and epMotion 5075vt allow true walk-away automation of complex purification or extraction protocols. Increase your lab productivity and free up time for other tasks!

Product features

- > Same as 5075l
- > 12 SLAS/ANSI deck positions, including ThermoMixer (for 5075vt)
- > Integrated vacuum pump – silent operation, no tubing, wiring, or reservoirs to maintain

Ordering information

Description	Order no.

epMotion® 5075t NGS Solution

Description

Automating library preparation for NGS eliminates the risk of pipetting errors, provides reproducible results and increases your lab productivity. The epMotion 5075t NGS solution provides everything you need for reliable, accurate and precise automated NGS library prep as well as maximum NGS kit flexibility. Ideal for high-throughput and complex NGS workflows, the epMotion 5075t NGS delivers reproducible NGS results at speed and makes labor-intensive workflows a thing of the past.

Product features

- > Same as 5075t, plus
- > Industry-proven, large repertoire of manufacturer and customer qualified Next Generation Sequencing methods enables sequencing results comparable or better to those from manual preparation
- > Intelligent Tool Selection automatically decides which tools (single or 8-channel) to use for fastest run time – ideal when sample numbers change frequently or are not a multiple-of-8

Device Hardware Upgrades and Software

Description	Order no.
Thermal module , thermal module for heating or cooling (0 – 100 °C) thermo adaptors, thermoblock and thermoracks	5075 757 001
Work surface adapter , for raising the epMotion® worktable by 5.5 cm, 4 feet	5070 752 001
Device Hardware Upgrades and Software , Upgrade set to MultiCon, changes existing epMotion EasyCon to PC controller. Includes PC, keyboard, mouse, epBlue SW, PCR & Prep assistant, cables	5075 000 725
CleanCap upgrade set , UV lamp and HEPA filter system for decontamination and pipetting under clean air conditions, for upgrading an epMotion 5073 (SN>7000) with epBlue version >40.7, optionally available	5073 001 333
epBlue™ ID barcode and tracking software incl. manual barcode scanner , modular expansion of epBlue™ for barcode support. Incl. manual barcode reader with stand. Compatible with epBlue™ version 40.1 and higher	5075 002 701
epBlue™ GxP software , for use in supporting process environments (according to GLP, GMP, 21 CFR part 11), as configuration option or for pre-installed epMotion® MultiCon versions with epBlue™ version 40.1 to 40.7, with epBlue™ GxP software, corresponding firmware, certificates	5075 002 728
epMotion® Editor 40 , software CD ROM with instructions, used to create, edit and simulate application on a PC, compatible with epBlue™ version >40.x	5075 014 220
epMotion® Editor 40 , additional software license	5075 014 300
Enhanced Feature Set 1 , license for epBlue™ additional features: Calculated , samples; Automatic tool selection; Start at command; Email notification, requires service visit and epBlue >40.6	5075 000 964
Enhanced Feature Set 2 , license for epBlue™ feature: Normalization, requires Service visit and epBlue 40.8 or higher	5075 000 981

Dispensing Tools

**Description**

The dispensing tools for the epMotion Liquid Handling workstations are precision instruments for pipetting and dispensing of a variety of different liquids. They are available as single channel as well as multichannel tools, and they cover the volume range between 0.2 and 1,000 µL.

Product features

- > Highest accuracy from 200 nL to 1,000 µL
- > For various types of liquids
- > 1- and 8-channel dispensing tools

Description	Order no.
Holder for 6 dispensing tools	5075 774 003
Gripper , incl. holder, for transporting plates on the worktable and automatic operation of the vacuum manifold, additionally order Gripper Tower 5075 751 895 for 5073 with SN > 6000	5282 000 018
TS 10 single channel dispensing tool , 1-channel, 0.2 – 10 µL	5280 000 100
TS 50 single-channel dispensing tool , 1-channel, 1.0 – 50 µL	5280 000 010
TS 300 single-channel dispensing tool , 1-channel, 20 – 300 µL	5280 000 037
TS 1000 single-channel dispensing tool , 1-channel, 40 – 1,000 µL	5280 000 053
TM 10-8 eight-channel dispensing tool , 8-channel, 0.2 – 10 µL	5280 000 304
TM 50-8 eight-channel dispensing tool , 8-channel, 1.0 – 50 µL	5280 000 215
TM 300-8 eight-channel dispensing tool , 8-channel, 20 – 300 µL	5280 000 231
TM 1000-8 eight-channel dispensing tool , 8-channel, 40 – 1,000 µL	5280 000 258

epMotion® 96 Accessories

**Description**

The accessories for the epMotion 96 and epMotion 96xl increase the capacity for plates and reservoirs. Furthermore, tip trays, as well as an adapter for easy handling of 384 well plates, are available.

Description	Order no.
Loading frame for epMotion® 96	5069 072 005
Adapter 384-well plate for epMotion® 96	5069 073 001
Upgrade set 2-position slider for epMotion® 96	5069 074 008

epMotion® ReservoirRacks and Modules

Description

The Eppendorf Reservoirs are the perfect vessels for a 10 to 400 mL liquid range, and permit the use of single channel and multichannel dispensing tools. The tapered shape of the reservoirs allows utilization of the entire liquid volume with minimal residue. Moreover, the reservoirs may be temperature-controlled inside the racks to allow cooling or warming of liquids.

Our Reservoir Racks hold reaction vessels of different sizes, and allow tempering in order to protect valuable samples or carry out reactions directly inside the Reservoir Rack.

Ordering information

Description	Order no.
ReservoirRack , for presenting 10 mL, 30 mL and 100 mL reagent reservoirs. Up to 7 reservoirs or Reservoir Rack modules can be presented.	5075 754 002
Adapter sleeves , to retrofit the 1.5/2.0 mL thermoracks for use with 0.5 mL vessels, 25 pcs.	5075 772 000
Gripper Tower , enables positioning epT.I.P.S.® Motion Reload trays in the parking position of the gripper and holds the gripper when it is not in use; only for use with epMotion® 5073 as of serial number 6000	5075 751 895
Tip Tool , tool for exclusively transferring epT.I.P.S.® Motion from racks and trays to the ReservoirRack modules for tips, incl. wall mount for safe storage of the tool	5285 000 000
Reservoir Rack Module NGS , for use with epMotion® ReservoirRacks, for distributing samples and reagents for NGS-specific applications, space for 20 x ILMN tubes, 4 x Eppendorf Tubes® 5.0 mL, 4 x Eppendorf Tubes 1.5 mL	5075 751 917
Reservoir Rack Module PCR , for use with epMotion® ReservoirRacks, for distributing samples and reagents for PCR, space for 48 x PCR tubes 0.2 mL incl. 2 x strip adapters 0.2 mL, (alternatively, space sufficient for 16 index tubes and up to 32 x PCR tubes 0.2 mL), 12 x Eppendorf Tubes 1.5/2.0 mL, 1 x tube 5.0 mL	5075 751 933
Reservoir Rack Module Tips , for use with epMotion® ReservoirRacks, for providing up to 16 epT.I.P.S.® Motion per module and up to 7 modules per ReservoirRack (112 tips in total), set consisting of 7 modules	5075 751 950
TipHolder , for epT.I.P.S.® Motion Reloads	5075 751 399
TipHolder 73 , enables positioning epT.I.P.S.® Motion Reload trays above a rack of epT.I.P.S.® Motion and thus doubles the tip capacity in an ANSI/SLAS position reusable and autoclavable, epBlue 40.7 or higher required	5075 751 879
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 8 x PCR tubes 0.2 mL	5075 799 049
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 4 x Safe-Lock tubes 0.5/1.5/2.0 mL	5075 799 081
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 4 x Eppendorf Tubes® 5.0 mL	5075 799 340
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 4 x reaction vessels Ø 12 mm	5075 799 103
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 4 x reaction vessels Ø 16 mm	5075 799 120
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 4 x reaction vessels Ø 17 mm	5075 799 162
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 2 x reaction vessels Ø 29 mm	5075 799 189
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 1 x reservoir 10 mL	5075 799 421
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 1 x reservoir 30 mL	5075 799 146
ReservoirRack Module TC , for use in epMotion® ReservoirRacks, temperable, 1 x reservoir 100 mL	5075 799 260
epMotion® reservoir 10 mL , small-volume container for reagent presentation on the epMotion®, can only be inserted with the Reservoir Rack; production batch testing, certified, 10 mL, PCR clean, 10 x 5 reservoirs in the bag, polypropylene (PP)	0030 126 521
epMotion® reservoir 30 mL , large-volume container for reagent presentation on the epMotion®, can only be inserted with the Reservoir Rack; production batch testing, certified, 30 mL, PCR clean, 10 x 5 reservoirs in the bag, polypropylene (PP)	0030 126 505
epMotion® reservoir 100 mL , large-volume container for reagent presentation on the epMotion®, can only be inserted with the Reservoir Rack; production batch testing, certified, 100 mL, PCR clean, 10 x 5 reservoirs in the bag, polypropylene (PP)	0030 126 513
epMotion® reservoir 400 mL , large-volume container for reagent presentation on the epMotion®; production batch testing, certified, 400 mL, PCR clean, 400 mL, 10 reservoirs, PCR clean, autoclavable, polypropylene, polypropylene (PP)	5075 751 364
epMotion® reservoir 195 mL , low dead volume reservoir, single well with 96 cavities, PCR clean, 4 x 5 reservoirs, 195 mL, polypropylene (PP)	0030 126 556

epMotion® Thermoracks and Plate Accessories

Description

The Thermoracks, Thermoblocks and ThermoAdapters comprise versatile options for the cooling or warming of reaction vessels and plates of different formats. The gripper for plates and racks allows automated transport and stacking on the deck. A 96 well magnet adapter for applications using magnetic beads is also available, and it enables fully automated extraction and purification protocols and/or NGS library preparation using a diverse range of kits.

Ordering information

Description	Order no.
Thermorack CB , for up to 384 x 0.1 mL strip tubes in the Qiagen® Rotor-Gene®	5075 767 031
Eppendorf Magnum FLX® Magnet Adapter , universal ring magnet plate for rapid magnetic bead separation. Supports most 96-well plates (standard, PCR, deepwell)	5075 751 836
Thermorack Rotor/Tubes , for temperature controlled pipetting of Qiagen® Rotor-Disc® 72/100 and 20 tubes 1.5/2.0 mL	5075 751 526
Thermoblock PCR 96 OC , for temperature control and safe piercing of sealed, semi-skirted PCR plates with orientation control	5075 751 666
Thermoadapter for PCR , for temperature control of PCR plates, 96 wells, skirted	5075 787 008
Thermoadapter for PCR , for temperature control of PCR plates, 384 wells, skirted	5075 788 004
Thermoadapter Frosty , combination of height adapter and PCR-Cooler, for cooling skirted PCR plates	5075 789 000
Lid for Thermorack Rotor/Tubes , with adapter for placing the lid on the epMotion® worktable	5075 751 640
Thermoblock DWP 2000 , for 2 mL Eppendorf Deepwell Plates 96/2000	5075 751 330
Thermoadapter DWP 96 , for Deepwell Plates 96/1000	5075 751 054
Thermoadapter LC Sample , for MagNA Pure LC sample cartridge	5075 751 305
Thermorack , for 24 Safe-Lock tubes, temperable, 0.5/1.5/2.0 mL	5075 769 000
Thermorack , for 24 Safe-Lock tubes, temperable, 1.5/2.0 mL	5075 771 004
Thermorack TMX , for 24 Safe-Lock micro test tubes, 0.5 mL/1.5 mL/2.0 mL	5075 751 160
Thermorack TMX , for 24 Safe-Lock tubes, temperable, 1.5/2.0 mL	5075 751 186
Thermorack , for 24 Cryo tubes	5075 777 055
Thermoblock for PCR , for temperature control of 96 vessels 0.2 mL, 77 PCR tubes 0.5 mL or one PCR plate 96 wells, semi-skirted	5075 766 000
Thermoblock for PCR , for temperature control of PCR plate 384 wells, semi-skirted	5075 767 007
Thermoadapter for Microplate 96/V/U , for holding and temperature control of Eppendorf Microplates with V or U bottom	5075 751 577
CycleLock mats , 5 sealing mats, frame not included, PCR clean	0030 126 548
Elution plate adapter , for processing micro tubes in racks	5075 785 030
CycleLock Starter Set , 1 frame and 8 mats for automated sealing of Eppendorf PCR plates, can only be used with Mastercycler® ep, PCR clean	0030 126 530
Gripper , incl. holder, for transporting plates on the worktable and automatic operation of the vacuum manifold, additionally order Gripper Tower 5075 751 895 for 5073 with SN > 6000	5282 000 018
Modification kit TMX for 5075I , to modify a 5075I with Eppendorf ThermoMixer® to a 5075t (for units SN>4000)	5075 000 630

epMotion® Tube Racks, Adapters and Vacuum Modules

Description

Tube racks are specially designed for the respective dimensions of the reaction vessels, and they thus provide optimal support for plastic as well as glass vessels.

Ordering information	Order no.
Description	
PrepRack for 24 Eppendorf Safe-Lock Tubes 2 mL , for nucleic acid preparation	5073 751 006
Rack Smart , for holding one tube rack of SmartCycler™ reaction tubes	5075 790 009
Rack LC 20 µL/100 µL , for up to 96 × 20 µL or 100 µL LightCycler capillaries for use with Centrifuge 5804/5804 R or 5810/5810 R and other devices, set of 2	5075 795 000
Rack ILMN tubes , Rack for single tubes, 40 × ø 8.4 mm and 12 × ø 11.2 mm, transportable, autoclavable	5075 751 747
Rack for single test tubes , for presenting Eppendorf reaction vessels, glass or plastic tubes, not temperable	
Ø 17 mm × 100 mm max. length	5075 761 009
Ø 17 mm × 60 mm max. length	5075 775 000
Ø 16 mm × 100 mm max. length	5075 760 002
Ø 16 mm × 60 mm max. length	5075 776 006
Ø 15 mm × 100 mm max. length	5075 792 028
Ø 15 mm × 60 mm max. length	5075 792 044
Ø 14 mm × 100 mm max. length	5075 792 001
Ø 14 mm × 60 mm max. length	5075 792 060
Ø 13 mm × 100 mm max. length	5075 762 005
Ø 13 mm × 60 mm max. length	5075 792 087
Ø 12 mm × 100 mm max. length	5075 763 001
Ø 12 mm × 60 mm max. length	5075 792 109
Rack , for 24 HPLC tubes, Ø 12 mm × 40 mm max. length	5075 792 125
Rack , for 96 screw cap tubes, 1.5/2.0 mL	5075 791 005
Rack for 24 tubes , for 24 Safe-Lock tubes, no tempering	
0.5/1.5/2.0 mL	5075 751 453
1.5/2.0 mL	5075 751 275
Vac holder , adapter for Vac Frame	5075 778 009
Vacuum lid , lid for vacuum unit	5075 779 005
Silicone mat for Vac Lid	5075 793 008
Vac Frame 1 , 16 mm height, recommended for filter plates from 5Prime, Invitex	5075 784 009
Vac Frame 2 , 26 mm height, recommended for filter plates from MACHERY-NAGEL®, Promega® or QIAGEN®	5075 785 005
Anticontamination plate adapter , for vacuum processes with foaming solutions in multiwell plates, set of 10	5075 794 004
Vac Thermo lid	5075 796 007
CycleLock mats , 5 sealing mats, frame not included, PCR clean	0030 126 548
CycleLock Starter Set , 1 frame and 8 mats for automated sealing of Eppendorf PCR plates, can only be used with Mastercycler® ep, PCR clean	0030 126 530
Collection plate adapter MN , type for VAC station	5075 785 064
TMX expansion board VAC , order with 5075 000.628	5075 000 636
Elution plate adapter , for processing micro tubes in racks	5075 785 030

epMotion® Waste Disposal Accessories

Description

During the pipetting of liquids, waste, both liquid and solid, is generated. Solid waste mainly consists of pipette tips and reaction vessels. In order to dispose of both types of waste correctly, we offer variable options. For collecting solid waste we offer bags or boxes, and for collecting liquid waste a specialized reservoir.

In order to use waste bags of larger capacity inside an epMotion Workstation, it will be necessary to elevate the Workstation slightly by using a work surface adapter (5070 752.001).

Ordering information

Description	Order no.
Waste bag holder , for epMotion® 5070/5073/5075 waste position	5075 753 103
Liquid Waste Tub 400 mL , to mount in waste bag holder and waste container of epMotion®, with lid, autoclavable, working volume 400 mL	5075 751 720
Liquid Waste Tub, incl. lid , to mount in the waste box, autoclavable, working volume 115 mL	5075 751 500
Waste container with ring , for holding used pipette tips	5075 753 006
Waste bags bio-hazardous waste , for epMotion® 5070/5073/5075 waste position, up to 7 L volume, ideal for disposing of biologically hazardous waste, autoclavable, PP material, thickness 50 µm, transparent, 50 bags	5075 751 763
Waste bags , for epMotion® 5070/5073/5075 waste position, up to 7 L volume, ideal for disposing of non hazardous waste, autoclavable, PP material, thickness 50 µm, transparent, 50 bags	5075 751 780

epMotion® Height Adapters

Description

For the optimization of workflow processes, it may become necessary to adjust the heights of the vessels used (tip racks, plates and reservoir racks). Our height adapters are the ideal solution that will bring your work table to one level.

Ordering information

Description	Order no.
epMotion® height adapter , for leveling labware, enables faster plate processing	
85 mm	5075 751 003
55 mm	5075 752 000
40 mm, for pipette tips	5075 755 009

Temperature Control and Mixing

Every lab needs to heat, cool, and mix samples. Nucleic acid or protein purification and analysis, cell and tissue research or expression profiling – all of these applications require a thermal mixer.

An accurate temperature might be the first thing that comes to your mind when thinking about a thermal mixer. For us, temperature accuracy is a must, and we test each device separately after production to certify its performance.

The mixing performance is guaranteed by our proven ^{2D} Mix-control, ensuring even small volumes are mixed efficiently. If you are only looking for efficient mixing without temperature control, the MixMate® is your 3-in-1 choice – a vortex, plate, and tube mixer all in one package.

Additionally, your thermal mixer must be reliable, robust, easy-to-handle, and versatile. We enhance your vessel flexibility with 15 different Eppendorf SmartBlock™ thermoblocks – from 0.1 mL tubes or plates up to 50 mL Eppendorf conical tubes. Each SmartBlock can be easily attached with only one hand to the Eppendorf ThermoMixer® C, or Eppendorf ThermoStat™ C, and is individually certified for temperature accuracy. If you need enhanced capacity and a second incubation temperature for 1.5 mL tubes, we offer the SmartExtender – perform your heat-shock transformation in one device.

When working with cell lines, our Eppendorf SmartBlock cryo thaw offers a special program for smooth thawing of cell culture vials, and reagents: convenient, capable of handling multiple vials at once, reduced contamination, and reproducible.

Your samples can be protected from evaporation and condensation at the tube lid when using the ThermoTop®, which heats the sample from above. Your reaction happens where you want it – down in the tube.

Easy programming is a necessity. To increase your efficiency, each device has preprogrammed keys with the ideal parameters for efficient mixing of vessels, like a PCR plate, as well as preprogrammed temperature keys, like 37° C or 95° C.

We care about you and your safety, so we designed all of our devices with an isolating layer on the block that protects you from burning your fingers. All surfaces are smooth without edges and easy to clean and disinfect.

Use the Eppendorf ThermoMixer® C for heating, cooling and mixing of your samples. Multiple Eppendorf SmartBlocks enlarge your vessel flexibility from 384-well plates to 50 mL tubes.

The ^{2D} Mix-control ensures efficient mixing of even small volumes by a broad orbital movement.

Eppendorf ThermoMixer® C

More about ThermoMixer C

Please use the QR Code.
www.eppendorf.com/ThermomixerC

Description
 Eppendorf ThermoMixer C is for heating, cooling, and mixing almost any of your lab vessels. Reliable prevention of condensate formation in small vessels can be achieved with the heated lid Eppendorf ThermoTop (optional).

- Product features**
- > Mixing, heating, and cooling in one instrument for high flexibility
 - > All common vessels and plate formats from 5 µL to 50 mL by different Eppendorf SmartBlocks™ for standard applications
 - > Excellent 2D Mix-Control technology results in excellent sample mixing

	Plate type	96-well plates	384-well plates
Mixing of different buffers			
Buffer with detergent	PCR	30 s	30 s
		1,800 rpm	2,800 rpm
Buffer without detergent	PCR	1 min	30 s
		2,000 rpm	3,000 rpm
Buffer with high salt concentration	DWP	5 s	30 s
		1,400 rpm	2,000 rpm
Buffer with DMSO	MTP	5 s	5 s
		1,100 rpm	2,000 rpm
Mixing of viscous solutions			
Genomic-DNA	PCR	30 s	1 min
		2,000 rpm	3,000 rpm
Resuspension of pellets			
Bacteria cell pellets	DWP	30 s	2 min
		2,000 rpm	2,000 rpm

Eppendorf ThermoMixer C provides enough mixing power to handle also challenging mixing tasks. Most samples are efficiently mixed within less than a minute independent of vessel geometry or sample properties. For more informations see AppNote 130.

Description
The ideal device to accurately set and maintain temperatures:
 The Eppendorf ThermoStat C is for heating and cooling almost any of your lab vessels. For additional condensation prevention of small volumes we recommend the Eppendorf ThermoTop (optional), a heated lid with condens.protect technology.

- Product features**
- > Heating and active cooling in all common vessel and plate formats from 5 µL to 50 mL for high flexibility
 - > Broad range of Eppendorf SmartBlocks enables high vessel flexibility
 - > Excellent temperature accuracy for safe sample handling

Eppendorf ThermoMixer® F

Product features

- > Heating and mixing in 0.5/1.5/2.0 mL reaction vessels (F0.5/F1.5/F2.0) or plates (FP)
- > Up to 1,500 rpm (F1.5/F2.0) or 2,000 rpm (F0.5/FP) for efficient sample mixing
- > Outstanding ^{2D}Mix-Control technology results in excellent mixing performance

Description

Doing a lot of routine mixing and heating?

These products are the perfect choice for mixing and heating established routine applications. The Eppendorf ThermoMixer F0.5/F1.5/F2.0 and FP have a fixed block for 0.5/1.5/2.0 mL tubes and plates, respectively. Reliable prevention of condensate formation in small vessels can be achieved with the heated lid Eppendorf ThermoTop (optional).

MixMate®

Description

Straight mixing required? The 3-in-1 mixer for plates, tubes, and vortex mixing. This high speed instrument provides complete mixing of your samples in seconds. Outstanding ^{2D}Mix-Control enables optimized mixing with anti-spill technology.

Product features

- > High-speed mixer (up to 3,000 rpm) for fast and efficient mixing of small volumes in all common vessel formats up to 50 mL
- > ^{2D}Mix-Control technology (planar mixing orbit without vertical movement) for controlled mixing and reproducible results in seconds
- > Anti-spill technology for controlled mixing movements without lid wetting and cross-contamination

MixMate provides enough mixing power to handle the most challenging mixing tasks. Most samples are efficiently mixed within less than a minute independent of vessel geometry or sample properties. For more information see AppNote 130.

ThermoTop®**Having non-regular enzymatic results after temperature incubation?**

The ThermoTop with condens.protect technology heated lid avoids condensation on tube lid and tube wall. It is compatible with Eppendorf ThermoMixer C/ Eppendorf ThermoStat C with SmartBlock plates and lab vessels up to 2 mL and Eppendorf ThermoMixer F 0.5/F1.5/F2.0/FP.

**Product features**

- > Efficient and reliable of condensation prevention for safe sample heating
- > Get stable reaction conditions for optimal enzymatic performance within your samples
- > Wireless connection with automatic recognition and operation for user-friendly handling

for 1.5/2.0 mL vessels, 0 °C	3880 001 026
for 1.5/2.0 mL vessels, -21 °C	3880 001 042

Eppendorf SmartBlock™**Description****Interchangeable in just seconds.**

These individually sensor-controlled SmartBlocks are your solution for maintaining accurate, uniform temperatures. A wide variety of these flexible thermoblocks for all common lab vessels support a broad range of applications - for use with Eppendorf ThermoMixer® C (heating/cooling and mixing) and Eppendorf ThermoStat™ C (heating/cooling).

**Eppendorf SmartBlocks for the following reaction vessels:**

- A. 24 lab vessels up to 12 mm in diameter
- B. 8 × 15 mL conical tubes
- C. 4 × 50 mL conical tubes
- D. Eppendorf Deepwell Plates 96/500 µL
- E. Eppendorf Deepwell Plates 96/1000 µL
- F. 24 × cryo tubes
- G. 8 × Eppendorf Tubes® 5.0 mL
- H. Lid for Eppendorf SmartBlock™ plates, PCR 96, PCR 384, DWP, 0.5 mL, 1.5 mL and 2.0 mL
- I. 384-well PCR plates
- J. 96-well PCR plates
- K. 24 × 0.5 mL vessels
- L. 24 × 1.5 mL vessels
- M. 24 × 2.0 mL vessels
- N. MTPs and Deepwell Plates
- O. 4 × 25 mL adapter for SmartBlock 50 mL

Product features

- > Optimized block design supports optimal temperature transfer to your sample to achieve excellent results
- > Eppendorf SmartBlock-specific calibration by integrated sensor technology maximizes temperature accuracy and homogeneity
- > Every Eppendorf SmartBlock is individually inspected in production for temperature accuracy and includes a serial-number specific certificate for documentation purpose

Limited to ThermoMixer C and ThermoStat C

Eppendorf SmartBlock™ 2.0 mL , thermoblock for 24 reaction vessels 2.0 mL, incl. Transfer Rack 1.5/2.0 mL	5362 000 035
Eppendorf SmartBlock™ 5 mL , thermoblock for 8 Eppendorf Tubes® 5.0 mL, 8 × 5.0 mL reaction vessels	5309 000 007
Eppendorf SmartBlock™ 15 mL , thermoblock for 8 conical tubes 15 mL	5366 000 021
Adapter 25 mL for Eppendorf SmartBlock™ 50 mL , Set consisting of 4 adapters and removal tool	5365 000 109
Eppendorf SmartBlock™ 50 mL , thermoblock for 4 conical tubes 50 mL	5365 000 028
Eppendorf SmartBlock™ 12 mm , thermoblock for 24 reaction vessels, diameter up to 12 mm, height 35 mm – 76 mm	5364 000 024
Eppendorf SmartBlock™ PCR 96 , thermoblock for PCR plates 96, incl. lid	5306 000 006
Eppendorf SmartBlock™ PCR 384 , thermoblock for PCR plates 384, incl. lid	5307 000 000
Eppendorf SmartBlock™ DWP 500 , thermoblock for Eppendorf Deepwell Plates 96/500 µL, incl. lid	5316 000 004
Eppendorf SmartBlock™ DWP 1000 , thermoblock for Eppendorf Deepwell Plate 96/1,000 µL, incl. lid	5310 000 002
Eppendorf SmartBlock™ plates , thermoblock for microplates and Deepwell Plates, incl. lid	5363 000 039
Lid , for Eppendorf ThermoMixer® F0.5/F1.5/F2.0 and FP, for Eppendorf SmartBlock™ 0.5 – 2.0 mL, plates, PCR 96, PCR 384, and DWP	5363 000 233
Transfer Rack 0.5 mL , for Eppendorf SmartBlock™ 0.5 mL	3880 000 305
Transfer Rack 1.5/2.0 mL , for Eppendorf SmartBlock™ 1.5 mL and Eppendorf SmartBlock™ 2.0 mL	3880 000 151

Tubes and Plates

It's Your Sample

Eppendorf Tubes®

- > Made of highest quality, virgin polypropylene (PP), free of biocides, plasticizers and latex
- > Produced with optimized, highly polished molds without the use of slip agents like oleamide, erucamide, stearamide
- > Produced with dyes free of organic additives and heavy metals
- > Designed and manufactured under ISO 13485 and ISO 9001 certified Quality Management System
- > Full traceability is provided for each product back to material lot

Disposable plasticware is used routinely in most life science laboratories. To achieve highest reliability and consistency for your experiments, Eppendorf has optimized materials and processes for the production of Eppendorf Tubes® to minimize the risk of interference. Especially chemical substances such as slip agents, plasticizers or biocides leaching out of plastic consumables are still frequently underestimated in the majority of life science applications.

However, increasing scientific evidence shows that this heterogeneous group of chemicals may significantly affect experiments and pose a likely source of error in various assay systems. They slow down evaporation, skew absorbance readings and lead to erroneous DNA quantification. Some of these slip agents have also been shown to negatively affect the outcome of biological tests like enzyme activity or receptor-binding assays.

Effective light protection in amber tubes

Numerous types of light-sensitive reagents and samples are often used in the laboratory routine. Once exposed to light, their quality, longevity or activity may rapidly decrease and therefore adversely affect subsequent assays and experiments. To avoid those difficulties, light-sensitive reagents and samples must be handled and stored in a manner that protects them from direct light exposure. Amber-colored laboratory plastic tubes reduce or completely block light transmission, and thus allow safe storage and handling of light-sensitive samples.

Light protection meets transparency

While providing good sample protection against high-energy light in the short wavelength UV/VIS spectrum, these tubes often come with a major drawback: They are opaque and therefore do not allow optimal sample visibility. Specifically for our 5 mL screw cap tubes and our conical tubes 15 mL, 25 mL and 50 mL we developed our amber material with an optimized degree of transparency to offer full control over the insertion depths of pipette tips and thus provide a clear advantage regarding sample visibility, handling and prevention of contamination.

Quality Begins on the Inside

Quality begins on the inside, then it works its way out.

Eppendorf Plates® are produced, handled, stored, and delivered according to our premium quality and purity standards – that is what our customers call the Eppendorf Quality. Our plates are manufactured from carefully selected and purest raw materials that comply with international criteria for maximum purity.

Fully automated production in clean room conditions excludes human interaction and possible contamination. Just examples for our quality process. With the particularly strict control criteria, internally and externally monitored, we guarantee the superior consistency of our products and your results.

www.eppendorf.com/appnote382

DNA LoBind – Recover your nucleic acids

When dealing with low concentrations of nucleic acids, sample adsorption to inner surfaces of vessels cannot be ignored. For example, in workflows including preparation and setup of PCR applications, loss of DNA on vessel surfaces can affect the performance of individual processing steps and can lead to misinterpretation of results. DNA LoBind Tubes maximize sample recovery of nucleic acids by significantly reducing sample-to-surface binding. They represent the ideal solution for preparing and storing samples containing low amounts of DNA. To minimize the risk of sample interference, the DNA LoBind properties are achieved without surface coating.

Applications

- > Preparation or storage of DNA and RNA samples
- > Forensic trace analysis
- > Preparing dilution series in quantitative qPCR
- > Sample preparation in next-generation sequencing
- > Creation of genomic or oligonucleotide libraries

www.eppendorf.com/appnote404

Protein LoBind – Get the most out of your applications

Protein preparation and storage represent critical steps in a wide range of laboratory applications. Unspecific adsorption of up to 90% of protein molecules or peptides to the polymer surface of the inner walls of tubes can significantly contribute to sample loss within 24 hours and artificially affect experimental results. Eppendorf Protein LoBind Tubes are specifically designed for use in applications where protein concentrations tend to be small and sample recovery is vital for assay results. A special, two-component polymer mix creates a hydrophilic surface that guarantees optimal recovery rates of valuable samples.

Applications

- > Preparation or storage of protein, peptide or antibody samples
- > Storage of virus stock solutions
- > Sample preparation in toxicology
- > Storage of cell suspensions
- > Enzymatic assays

www.eppendorf.com/purity

Eppendorf sample handling consumables stand for highest quality and purity

Our tubes and plates are available in a variety of purity grades (see table below) www.eppendorf.com/purity. The purity grades “sterile”, “PCR clean”, “Biopur®” and “Forensic DNA Grade” are certified by an ISO 17025 accredited external lab. As a special service, we make the lot-specific certificates available online (www.eppendorf.com/certificates).

¹⁾ For accurate details regarding resistance to centrifugation, please refer to the respective product pages. ²⁾ Lot-specific certificate can be downloaded from www.eppendorf.com/certificates. ³⁾ Individually packaged. ⁴⁾ Eppendorf sterile, RNase free, DNase free, DNA free. Testing showed conformity within the detection limits (human and bacteria DNA) ⁵⁾ According to ISO 18385. ⁶⁾ Testing showed conformity within the detection limits

Eppendorf Safe-Lock Tubes

Description

Eppendorf Safe-Lock Tubes are the result of 50 years of continuous improvement and development. The hinged Eppendorf Safe-Lock lid provides outstanding protection against unintentional opening during incubation and storage. Trust in the original Eppendorf Safe-Lock Tubes, because your samples deserve nothing but the best.

Product features

- > Hinged Eppendorf Safe-Lock lid prevents unintentional lid opening during incubation and storage
- > g-Safe®: Depending on Safe-Lock Tube variant (see manual) exceptional centrifugation stability up to 30,000 × g prevents sample loss due to tube breakage and provides extra safety when working with hazardous samples
- > Manufactured without the use of slip agents, plasticizers, and biocides – substances that have been shown to leach from plastic consumables into the sample and negatively affect bio-assay results

Eppendorf Tubes® 3810X

Description

The easy-open, easy-close design of the Eppendorf Tubes® 3810X provides convenient, ergonomic, and reliable one-handed operation. Whether sample preparation, centrifugation or storage – the Eppendorf Tubes® 3810X fit perfectly into your workflows!

Product features

- > Tube lid is easy to open and close for ergonomic operation
- > Polypropylene provides high resistance to chemicals, mechanical stress, and temperature extremes
- > g-Safe®: Exceptional centrifugation stability up to 30,000 × g prevents sample loss due to tube breakage and provides extra safety when working with hazardous samples

Light Protection as well as Transparency

The amber colored Eppendorf Tubes® 5.0 mL with screw cap combine effective protection of your sensitive samples from energy-rich light in the lower wavelength range with a high degree of transparency. You get full control on the insertion depths of pipette tips - often a source of contamination when handling solutions in intransparent tube formats.

Eppendorf Tubes® 5.0 mL

Description

Eppendorf Tubes 5.0 mL - the missing link! This product represents the perfect option for working with medium-sized sample volumes. It fills the gap between existing tube formats and enables the simple and safe processing of sample volumes up to 5.0 mL.

Product features

- > Ergonomic operation: Snap cap - simple, practical and ergonomic singlehand operation. Screw cap - flattened and grooved sides provide optimal grip and user-friendly handling.
- > Broad operating temperature range: Screw cap tubes: -86 °C – 100 °C. Snap cap tubes: -86 °C – 80 °C (when using the clip ≤ 100 °C)
- > Material: Exceptionally high-quality, transparent polypropylene, free of plasticizers, biocides or mold release agents, for reliable test results

Eppendorf Conical Tubes 25 mL

The Next Level – Eppendorf Conical Tubes 25 mL!

The latest member of the big Eppendorf Tube Family fills the gap between the volumes of traditional conical tubes of 15 mL and 50 mL. Optimized height, outstanding quality and specifications make these conical tubes ideally suited for cell biology e.g. for pooling media from T75 flasks, bacteria culture in midi prep size or overlapping applications like buffer preparation, storage and transport.

Coming soon! Now also available in Amber for UV-light sensitive samples and in DNA LoBind and Protein LoBind.

Product features

- > Reduced height gives easy sample access even with low-volume pipettes and tips – reduced risk of cross-contamination between pipette and tube
- > Single-handed opening and closing through SnapTec® cap version for fast liquid extraction and addition
- > Centrifugation stability up to 17,000 x g¹⁾ for both tube variants - SnapTec® cap and screw cap

¹⁾ Please note the Instructions For Use for details (www.eppendorf.com/manuals): "Eppendorf Conical Tubes 25 mL, snap cap" and "Eppendorf Conical Tubes 15, 25 and 50 mL"

Applications

- > Cell culture applications, optimal for pooling, e.g. pooling media from 3 x T75 flasks (25 mL)
- > Sample preparation in microbiology and molecular biology labs, e.g. bacteria culture in midi prep size, cloning, DNA extraction when working with a relatively high amount of biological starting material (in botany)
- > Storage and transport of samples and solutions up to 25 mL
- > Preparation of master mixes and buffers

Please use the QR Code to get more Informations

www.eppendorf.com/conicals

Improved sample processing

Greater diameter and lower height than 15 mL conical tubes enable better sample access and faster resuspension of pellets after centrifugation.

Single-handed operation

Supports optimized and faster handling of sample solutions, especially in multi-step protocols.

A Full System of Components

Centrifugation

Centrifuges with rotors for 50 mL conical tubes, e.g. 59xx series and 58xx series: Two adapter variants for snap cap (order no.: 5820 733 004) and screw cap (order no.: 5820 734 000) 25 mL tubes enable usage in 50 mL rotors and buckets.

Heating and Mixing Eppendorf ThermoMixer® C and Eppendorf ThermoStat C:

Adapter for 25 mL tubes ensures compatibility with Eppendorf SmartBlock 50 mL. (order no.: 5365 000 109)

MixMate:

Tube Holder 25/50 mL, for 4 x 25/50 mL conical tubes. (order no.: 5353 040 156)

Sample Storage

Single Tube Stand: Ideally suited for weighing samples on the balance and for handling individual samples. The viewing slit enables observation of the filling level at any time. (order no.: 0030 119 860)

Tube Rack 25 mL:

Eppendorf Racks for 50 mL conical tubes can be used with the new 25 mL tubes. (order no.: 0030 119 835)

Storage box made of polypropylene: Lower height allows space-saving storage for up to 9 x 25 mL tubes in 3.5 inches Eppendorf Storage Boxes. (order no.: 0030 140 729)

Eppendorf Conical Tubes 15 mL and 50 mL

Description

No Compromise! The Eppendorf Conical Tubes 15 and 50 mL meet the highest demands of diverse laboratory applications. Their excellent quality and specifications make them ideally suited for cell biology applications as well as for sample preparation protocols in microbiology and molecular biology laboratories. New! Eppendorf Conical Tubes SnapTec® 50 for one-handed sample handling.

Product features

- > Premium USP class 6 raw material and no use of slip agents, plasticizers, and biocides during manufacturing ensure highest sample integrity, high g-Safe® centrifugation stability, and optimal sample and pellet visibility.
- > Cap with flattened and grooved sides supports a user-friendly ergonomic handling, enables a stable upright positioning, and minimizes contamination risk.
- > **New!** Eppendorf Conical Tubes SnapTec® 50 for fast opening and closing in routine multistep protocols

Applications

- > Convenient and safe cell culture applications
- > Sample preparation in microbiology and molecular biology labs
- > Storage of samples and solutions with larger volumes
- > Preparation of mastermixes and buffers

Whether centrifugation, mixing, or other applications – the Eppendorf Conical Tubes 15 and 50 mL will complete your workflows in an excellent way.

Light protection as well as transparency – two benefits in one tube.

Eppendorf Microplates

Description

Experience a new dimension of transparency - the Eppendorf Microplates! It has never been this easy and reliable to pipette, control and recover samples with a polypropylene microplate. A wide plate variety in line with high robustness and precision is representing the optimal solution for your application needs.

Product features

- > Unmatched, transparent polypropylene (PP) for improved sample visibility
- > OptiTrack® Matrix: up to 30 % faster sample identification and fewer pipetting errors via high-contrast alphanumeric labeling
- > RecoverMax® well design: Optimized well geometry for minimal remaining volume and excellent mixing properties

Eppendorf Assay/Reader Microplates

Description

Elevate the sensitivity of your assays with the Eppendorf Assay/Reader Plates to a higher level! The plates offer an excellent signal-to-noise ratio, resulting in an extremely low detection limit. Whether fluorescence or chemiluminescence - select the optimal plate for your assay!

Product features

- > Black Eppendorf Microplates offer an excellent signal-to-noise ratio – for clear signals even with low-concentration samples
- > White Eppendorf Microplates are optimized for highest sensitivity in the detection of luminescence signals by maximizing reflection
- > Solid black and white assay plates are made of polypropylene resulting in high resistance to chemicals, mechanical stress, and temperature extremes

Eppendorf Deepwell Plates

Description

Eppendorf Deepwell Plates 96 and 384 are high performance plates fulfilling highest requirements of all manual and automated applications. They combine innovative features, like the OptiTrack® matrix, with thoroughgoing quality for which Eppendorf consumables are globally known as a premium standard.

Product features

- > OptiTrack® matrix: up to 30 % faster sample identification and fewer pipetting errors via high-contrast alphanumeric labeling
- > RecoverMax® well design: Optimized well geometry for maximum sample recovery and excellent mixing properties
- > Minimized remaining volume and high uniformity from well to well

Protein LoBind® Plates

Description

Eppendorf Protein LoBind Plates are specifically designed for use in proteomics or other fields of protein research, where protein concentration tend to be very small and sample recovery is vital for assay results. Significantly more protein can be recovered for downstream analysis and enzymes remain active.

Product features

- > Eppendorf LoBind material ensures excellent sample recovery for improved assay results
- > Free of surface coating (e.g., silicone) to minimize the risk of sample interference
- > Lot-certified PCR clean purity grade: free of human DNA, DNase, RNase and PCR inhibitors

Eppendorf Tube and Cuvette Racks

- > Made from high quality polypropylene (PP):
 - > Ensuring dimensional stability across a broad temperature range (-86° C to 121° C)
 - > Providing chemical resistance
- > The racks are UV-light resistant
- > Six different formats always offer the optimal choice for all common tubes and cuvettes

Eppendorf μ Cuvette® G1.0

One droplet is the limit?

The μ Cuvette G1.0 is in your range: Only 1.5 μ L of a sample is needed. The optical path length of only 1 mm enables a light path that is 10x shorter than the light path on standard cuvettes: Measure high nucleic acid and protein concentrations.

Product features

- > Microvolume measuring cell for measuring 1.5 – 10 μ L sample volumes
- > Concentration determination of nucleic acids and proteins, amongst other target analytes
- > Measurement of highly concentrated samples without prior dilution

Ordering information

Description	Order no.
Eppendorf μ Cuvette® G1.0, Microvolume measuring cell for Eppendorf BioPhotometer® and BioSpectrometer®	6138 000 018

Eppendorf UVette®

Working with very low amount of samples?

The UVette is a disposable UV/Vis cuvette with a light transmission of 220 nm to 1,600 nm for spectrophotometer and photometers. As an example of Eppendorf's expertise in the production of high quality consumables, the UVette offers superb purity, convenience and precision for photometric analysis. The unique shape of the UVette combines two optical light path lengths to offer greater flexibility.

Product features

- > Suitable for measuring small volumes ($\geq 50 \mu$ L)
- > UV and Vis measurements from 220 nm to 1,600 nm
- > UV transparent plastic, free of fluoropolymers and other halogenated hydrocarbons

Ordering information

Description	Order no.
UVette® 220 nm – 1,600 nm, original Eppendorf plastic cuvette, individually packed, (including RNase-free, DNase-free) and protein-free, PCR clean, 50 – 2,000 μ L, 80 pcs.	0030 106 300
UVette® starter set, 80 UVettes and 1 universal adapter for light path height 15 mm, convertible to 8.5 mm, 50 – 2,000 μ L	4099 100 007

Eppendorf Vis Cuvettes

Description

The Eppendorf Vis Cuvettes are disposable cuvettes made of clear plastic with a light transmission of 300 nm to 900 nm. These cuvettes are perfect for applications outside of the UV range, such as colorimetric protein assays (Bradford, Lowry, etc.), determining of the optical density of bacterial cultures (OD600 methods), and kinetic and fluorescence measurements.

Product features

- > Two different cuvette sizes (semi-micro and macro) for a wide variety of volumes and applications
- > Disposable cuvettes made of clear plastic with a light transmission of 300 nm to 900 nm

Ordering information

Description	Order no.
Eppendorf macro Vis Cuvette, plastic cuvette for measurements in the Vis range, max. filling volume 4,500 μ L 1,000 cuvettes (10 boxes x 100 cuvettes)	0030 079 345
Eppendorf semi-micro Vis Cuvette, plastic cuvette for measurements in the Vis range max. filling volume 3,000 μ L	0030 079 353
Eppendorf Cuvette Rack, 30 positions, for glass and plastic cuvettes, polypropylene, numbered positions, autoclavable, 2 pcs.	0030 119 851

Centrifuges and Rotors

We introduced our very first centrifuge in 1964 as an integral part of the Eppendorf Microliter System, and revolutionized life science research practices worldwide. To this day, the Eppendorf name remains synonymous with creative design, innovative technology and reliable performance that stand the test of time.

The Eppendorf approach to product development is about listening to our customer's needs, understanding daily laboratory routines and anticipating future trends. The result is a comprehensive line of centrifuges that serve the multiple applications you encounter in your lab. Our goal is to provide you with a product solution that not only leaves you thoroughly satisfied but that is also fun to use. That is why Eppendorf centrifuges are designed to go beyond speed and capacity to offer you unparalleled ergonomic operation and superior temperature management. With this sound foundation and extensive experience, Eppendorf is proud to serve you as your expert partner in centrifugation.

Our Centrifuge Portfolio – Your Centrifuge Solution

From your personal 12-place microcentrifuge to compact and super-versatile benchtop centrifuges to high-speed floorstanding and ultracentrifuges, our united portfolio offers comprehensive solutions for all your separation applications in the areas of molecular biology, biochemistry, cell biology and material science.

Microcentrifuges

General purpose centrifuges Multipurpose centrifuges

Whether you wish to spin just a few tubes at a time or you require extra versatility for volumes up to four liters or high-throughput of tubes and plates, the Eppendorf benchtop centrifuge portfolio offers solutions for your daily separation tasks.

High speed centrifuges

Ultracentrifuges

Looking to process more than four liters per run? Do you need increased speeds up to 110,000 x g? In either case, you will find our high-speed floorstanding centrifuges are your best choice. For super-speed applications requiring up to 1,050,000 x g, our range of innovative and user-friendly ultracentrifuges provide the perfect solution.

Your challenges are multidimensional – so are our offerings

In your daily research work, you will encounter a variety of challenges. That's why we continuously work to understand your unique issues and provide you with tailored solutions to suit your needs, so you can spend more time focusing on your research. Our solutions go beyond the centrifuge itself to provide everything you need to ensure the best performance and best results every day.

CENTRIFUGES

Our high-quality devices offer innovative features to optimize your experience and your results.

SUSTAINABILITY

Sustainable production, energy-saving operation and an innovative cooling system are just some of the ways Eppendorf supports the environment.

SERVICE

Enjoy peace-of-mind and maximize your uptime with your choice of epServices.

ROTORS & ADAPTERS

A great variety of accessories ensure application flexibility – for your separation tasks of today and tomorrow.

CONSUMABLES

Protect your valuable samples by using only the best consumables tailored to your needs in format, size and purity grades.

DIGITAL PRODUCTS

Get everything you need for a connected and paper-free lab of the future.

With Eppendorf at your side, you can be sure to have the best equipment as well as the best team to support you. From our trusted sales representatives to our dedicated applications and technical support teams to our highly skilled service technicians – you will always find a helping hand when you need it.

MiniSpin®/MiniSpin® plus

Description

MiniSpin® and MiniSpin® plus are entry-level mini centrifuges that are powerful, easy-to-use and small enough to allow individual workstations to be equipped with a portable centrifuge.

Product features

- > Rotor capacity: 12 × 1.5/2.0 mL vessels, 2 × 8-tube PCR strips
- > Max. speed: 14,100 × g (14,500 rpm)
- > Extremely compact footprint

Special features for MiniSpin plus

- > Automatic rpm/rcf conversion
- > Extended time to 99 min or continuous centrifugation

www.eppendorf.com/minispin

Rotor F-45-12-11
> for 12 × 1.5/2.0 mL tubes

Rotor F-55-16-5 PCR
> for 2 × PCR strips

Centrifuge 5418 R

Description

Centrifuge 5418 R is a 18-place microcentrifuge that is specifically designed for low to medium capacity in 1.5/2.0 mL tubes and Microtainer®. The speed of up to 16,873 × g allows for standard molecular biology applications.

Product features

- > Max. rotor capacity: 18 × 1.5/2.0 mL vessels
- > Max. speed: 16,873 × g (14,000 rpm)
- > Small footprint and low access height of 23 cm

Adapter for BD Microtainer® and 0.5 mL tubes

- > The adapter can be used with every Eppendorf rotor for 1.5/2.0 mL tubes

www.eppendorf.com/centrifuge5418R

Rotor FA-45-18-11

- > for 18 × 1.5/2.0 mL tubes comes standard with unique Eppendorf QuickLock® aerosol-tight lid for fast and reliable locking

Adapter for 0.2 mL PCR Tubes

- > Ideal to spin down PCR Tubes after reaction setup. Adapter fits in any Eppendorf 1.5/2.0 mL rotor

Centrifuge 5420

Description

Centrifuge 5420 supports your spin column-based nucleic acid purification and gel-extraction workflows. This centrifuge offers 24-place capacity in an aerosol-tight rotor and speeds up to 21,300 × g in a small footprint.

Product features

- > Standard rotor for up to 24 × 1.5 and 2.0 mL tubes
- > Rotor option for up to 32 × 0.2 mL PCR tubes or 4 × 8-place PCR strips
- > Adapters for 0.2, 0.4 and 0.5 mL tubes as well as 0.6 mL BD Microtainer®

Rotor FA-24x2

- > Max. speed: 21,300 × g (15,060 rpm)
- > Max. capacity: 24 × 1.5/2.0 mL tubes
- > Aerosol-tight

Rotor F-32x0.2-PCR

- > Max. speed: 18,257 × g (15,060 rpm)
- > Max capacity: 4 × PCR strips or 32 × PCR tubes (0.2 mL)

Centrifuge 5425/5425 R

Description

Eppendorf microcentrifuges 5425 and 5425 R are true laboratory standards. These whisper quiet 24-place microcentrifuges offer an outstanding set of features for a broad range of molecular and cell biology applications in Eppendorf and PCR tubes from 0.2 to 5 mL. The refrigerated Centrifuge 5425 R provides precise temperature control for processing temperature-sensitive samples with its advanced cooling system.

Product features

- > Aerosol-tight Eppendorf QuickLock® lids for simple and safe handling
- > Outstanding software features (e.g. adjustable acceleration and braking ramps, 3 program buttons (only Centrifuge 5425), short function without continuous pressing of the key)
- > Extended rotor program (e.g. 5.0 mL rotor, swing-bucket rotor for PCR strips)

www.eppendorf.com/centrifuge5425/5425R

Main Features

Enhanced convenience

- > One push short-spin key – no need to hold key all the while

Improved ergonomics

- > Eppendorf QuickLock® rotors for ergonomic lid locking
- > Closes with only a 1/4 turn and takes repetitive stress of your wrist

Increased versatility

- > Swing-bucket rotor for divisible plates to speed up your PCR/qPCR setup
- > 10-place 5.0 mL rotor for screw cap and snap lid tubes

Rotor FA-24x2, aerosol-tight, incl. rotor lid, for 24 × 1.5/2.0 mL tubes	5495 500 006
Rotor FA-24x2-PTFE, aerosol-tight, incl. rotor lid, PTFE coated, for 24 × 1.5/2.0 mL tubes	5495 503 005
Rotor FA-10x5, aerosol-tight, incl. rotor lid, for 10 × 5.0 mL tubes (snap and screw cap)	5495 505 008
Rotor FA-18x2-Kit, aerosol-tight, incl. rotor lid, for 18 × 1.5/2.0 mL tubes or spin columns	5495 508 007
Rotor F-32x0.2-PCR, incl. rotor lid, for 32 × 0.2 mL PCR tubes or 4 × 8 PCR strips	5495 510 001
Rotor S-96x0.2-PCR, for 96 × 0.2 mL PCR tubes or 12 × 8 PCR strips, incl. buckets	5495 512 004
Adapter, for 1 PCR tube (0.2 mL, max. Ø 6 mm), for all 1.5/2.0 mL rotors, 6 pcs.	5425 715 005
Adapter, for 1 sample tube (0.5 mL, max. Ø 8 mm) or 1 Microtainer® (0.6 mL, max. Ø 8 mm), for all 1.5/2.0 mL rotors, 6 pcs.	5425 716 001
Adapter, for 1 vessel 1.5 – 2.0 mL, for all 5.0 mL rotors, 4 pcs.	5820 768 002
Adapter, for 1 cryo tube, for all 5.0 mL rotors, 4 pcs.	5820 769 009
Adapter, for 1 HPLC tube, for all 5.0 mL rotors, 4 pcs.	5820 770 007
Adapter, for 1 micro test tube (0.4 mL, max. Ø 6 mm), for all 1.5/2.0 mL rotors, 6 pcs.	5425 717 008

Centrifuge 5427 R

Description

Eppendorf Centrifuge 5427 R is a high-speed, refrigerated microcentrifuge for high-throughput research. It doubles your tube capacity compared to a standard 24-place microcentrifuge thanks to its 48-place double-row rotor, while maintaining safety and reliability.

Product features

- > Rotor capacity: 48 × 1.5/2.0 mL, 12 × 5.0 mL; Eppendorf QuickLock® rotor allows for fast and ergonomic lid locking
- > Max. speed: 25,001 × g (16,220 rpm)
- > High capacity 48-place rotor significantly increases productivity to save you valuable time

Coming soon!

We are working on an exciting innovation for our Centrifuge 5427 R, taking refrigeration to the next level. Curious to learn more? Then stay tuned and make sure to follow our social media channels or subscribe to our newsletter!

Centrifuge 5430/5430 R

Description

Combine the best of both worlds with Centrifuge 5430 and 5430 R. These high-speed centrifuges have the small footprint of a microcentrifuge and the versatility of a multipurpose centrifuge.

Product features

- > Max. rotor capacity: 48 × 1.5/2.0 mL, 6 × 50 mL, 2 × MTP
- > Max. speed: 30,130 × g (17,500 rpm)
- > Remarkable versatility with 12 different rotors

¹⁾ Exceeding the maximum tube length may reduce the loading capacity of the rotor. Please perform a manual swing-out test before starting the centrifuge run to make sure the tubes do not hit the rotor yoke.

²⁾ Please order adapter for 25 mL conical tubes screw cap 5820 734 000.³⁾ Please order adapter for 25 mL conical tubes snap cap 5820 733 004.

Description

Are you looking to improve your work environment? The 5702 family of low-speed centrifuges are quiet in operation, compact in design and provide six different rotor options to accommodate any type of tube and requirement for low to mid-throughput applications in clinical research and cell culture.

Rotor A-4-38 with round buckets

Rotor F-35-30-17, incl. 30 steel sleeves for 15 mL vessels, with 20 adapters for conical tubes and 30 rubber mats	5702 704 008
Rotor F-35-30-17, incl. 10 steel sleeves for 15 mL vessels, with 10 adapters for conical tubes and 10 rubber mats	5702 705 004
Rotor F-45-24-11, 45° angle, 24 places, max. Ø 11 mm, without lid	5702 746 002
Rotor F-45-18-17-Cryo, without rotor lid, without adapters	5702 747 009
Adapter, for 1 cryo tubes (max. Ø 13 mm) or sealable centrifugation tubes (Ø 12.2 mm), max. length 50 mm, for Rotor F-45-18-17-Cryo, 6 pcs.	5702 752 002
Adapter, for 1 HPLC vessel 1.5 mL, for Rotor F-45-18-17-Cryo, 18 pcs.	5427 708 006

Centrifuge 5804/5804 R and 5810/5810 R

Centrifuge Packages 58xx Family

Description

Whether you need a refrigerated or non-refrigerated centrifuge for low or medium throughput applications, one of these packages will definitely suit your requirements.

Cell Culture Centrifuge packages include

- > Centrifuge 5804/5804 R or 5810/5810 R
- > Swing-bucket rotor incl. buckets
- > Four adapters for 15 mL conical tubes (two sets of 2)
- > Four adapters for 50 mL conical tubes (two sets of 2)

Centrifuge packages for round-bottom tubes include

- > Centrifuge 5810/ 5810 R
- > Swing-bucket rotor S-4-104 incl. buckets
- > Four adapters for 13 mm (5/7 mL) round bottom tubes (two sets of 2)
- > Four adapters for 16 mm (10 mL) round bottom tubes (two sets of 2)

Eppendorf Conical Tubes 15 mL, 25 mL and 50 mL

The Eppendorf Conical Tubes are the optimal solution for sample preparation protocols in microbiology and molecular biology laboratories. Safe design and easy handling ensure best sample processing.

Premium USP class 6 raw material ensures

- > Highest sample integrity
- > High g-Safe® centrifugation stability
- > Optimal sample and pellet visibility

For more information go to chapter "tubes and plates" on page 104.

85 mL Oakridge tubes	-	-	-

Rotors for Centrifuge 58xx Family

Ordering information

Description	Order no.
Rotor FA-45-20-17 , incl. rotor lid, for 20 Eppendorf Tubes® 5.0 mL	5820 765 003
Adapter , for 1 vessel 1.5 – 2.0 mL, for all 5.0 mL rotors, 4 pcs.	5820 768 002
Adapter , for 1 cryo tube, for all 5.0 mL rotors, 4 pcs.	5820 769 009
Adapter , for 1 HPLC tube, for all 5.0 mL rotors, 4 pcs.	5820 770 007
Rotor FA-45-48-11 , aerosol-tight, incl. rotor lid, for 48 × 1.5/2.0 mL tubes	5820 760 001
Rotor F-45-30-11 , incl. rotor lid, for 30 × 1.5/2.0 mL reaction vessels	5804 715 004
Rotor FA-45-30-11 , aerosol-tight, incl. rotor lid, for 30 × 1.5/2.0 mL reaction vessels	5804 726 006

Model	Rotor F-35-48-17 ¹⁾	Rotor T-60-11	Rotor F-45-48-PCR
Max. capacity		60 × 1.5/2.0 mL	6 × 5/8 PCR strips (48 × 0.2 mL)
5804/5804 R	■	■	■
5810/5810 R	■	■	■
Aerosol-tightness	no	no	no
Max. RCF	5,005 × g	16,435 × g	15,294 × g
Max. speed	5,500 rpm	14,000 rpm	12,000 rpm
1.5/2.0 mL micro tube	–	60	–
Eppendorf Tubes® 5.0 mL and 15 mL conical	-/40	–	–

¹⁾ Please note that a software upgrade will be necessary for older centrifuges when using this rotor. Please contact your local Eppendorf organization or dealer for further information.

Ordering information

Description	Order no.
Rotor F-35-48-17 , for 24 × 15 mL conical tubes, incl. 24 steel sleeves and adapters	5820 771 003
Rotor F-35-48-17 , for 40 × 15 mL conical tubes, incl. 48 steel sleeves and adapters	5820 772 000
Rotor T-60-11 , incl. rotor lid, for 1.5/2.0 mL tubes, without adapter	5804 730 003
Adapter , for 10 reaction vessels 1.5/2.0 mL, for Rotor T-60-11, 6 pcs.	5804 731 000
Adapter , for 20 reaction vessels 0.4 mL, for Rotor T-60-11, 6 pcs.	5804 732 006
Rotor F-45-48-PCR , for 6 × 8, 6 × 5 PCR tube strips, 48 × 0.2 mL individual PCR tubes	5804 735 005

Adapter

- > PCR plate adapters are designed to support thin-walled PCR plate wells during centrifugation
- > Available for 96-well and 384-well PCR plates
- > Adapters can be used in all Eppendorf plate rotors

Cell culture flask adapter

- > Adapter to spin down cell cultures directly in a cell culture flask
- > Suitable for 25 cm² and selective 75 cm² flasks (please ask for details)
- > Adapters can be used in Eppendorf plate rotor A-4-81-MTP/Flex

IsoRack adapter

- > IsoRack adapters to support 0.5 mL and 1.5/2.0 mL IsoRacks during centrifugation
- > Adapters can be used in Eppendorf plate rotors A-2-DWP and A-4-81-MTP/Flex

Ordering information

Description	Order no.
Adapter , for 1 cell culture flask, for Rotors A-4-81-MTP/Flex	5825 719 000
Adapter , for 1 PCR plate (96 wells), for 96-well PCR plates, used in A-4-81-MTP/Flex, A-4-62-MTP, A-2-DWP-AT and A-2-DWP	5825 711 009
Adapter , for 1 PCR plate (384 wells), for 384-well PCR plates, used in A-4-81-MTP/Flex, A-4-62-MTP, A-2-DWP-AT and A-2-DWP	5825 713 001
IsoRack adapter , for 24 vessels in the IsoRack 0.5 mL, for Rotor A-4-81 (MTP), for 24 × 0.5 mL tubes in the IsoRack, 2 pcs.	5825 708 008
IsoRack adapter , for 24 vessels in the IsoRack 1.5/2.0 mL, for Rotor A-4-81 (MTP), for 24 × 1.5/2.0 mL tubes in the IsoRack, 2 pcs.	5825 709 004
CombiSlide Adapter , for 12 slides Combi Slide, for Rotors A-2-MTP and A-4-81 (MTP), 2 pcs.	5825 706 005

Rotor A-2-DWP

- > For use in Centrifuge 5804/5804 R and 5810/5810 R
- > Max. speed: 2,250 × g (3,700 rpm)
- > Rotor can handle up to
 - 2 × 4 MTP
 - 2 × 4 Cell culture plates
 - 2 × 2 DWP
 - 2 × 1 Filtration plate kits

Rotor A-2-DWP-AT

- > For use in Centrifuge 5810/5810 R only¹⁾
- > Max. speed: 3,486 × g (4,500 rpm)
- > Rotor can handle up to
 - 2 × 4 MTP
 - 2 × 1 DWP
 - 2 × 1 Filtration plate kits
 - 2 × 2 Cell culture plates

¹⁾ Please note that a software upgrade may be necessary for older centrifuges when using Rotor A-2-DWP-AT. Please contact your local Eppendorf organization or dealer for further information.

Ordering information

Description	Order no.
Rotor A-2-DWP , for Deepwell plates, incl. 2 buckets	5804 740 009
Rotor A-2-DWP-AT , incl. 2 buckets, 2 aerosol-tight caps and 2 plate carriers	5820 710 004

Rotors for Centrifuge 5810 and 5810 R

Rotor S-4-104

- > Medium capacity swing-bucket rotor with max. speed 3,214 x g (3,900 rpm)¹⁾
- > Broad range of adapters enables high versatility for tubes and bottles from 0.2 mL to 750 mL and plates
- > Aerodynamic round bucket design for up to 36 % energy savings compared to Rotor A-4-81

¹⁾ Please note that a software upgrade will be necessary for older centrifuges when using this rotor. Please contact your local Eppendorf organization or dealer for further information.

Rotors for Centrifuge 5810 and 5810 R

Rotor A-4-62

- > Swing-bucket rotor with max. speed 3,220 × g (4,000 rpm)
- > Rotor A-4-62 accommodates tubes and bottles from 0.2 mL to 250 mL as well as plates
- > Aerosol-tight caps¹⁾ for safe centrifugation of hazardous samples optionally available

¹⁾ Aerosol-tightness tested by Public Health England, Porton Down, UK.

Centrifuge 5910 Ri

Description

The refrigerated Centrifuge 5910 Ri combines high capacity and performance in a compact and ergonomic footprint. It comes with an intuitive touchscreen user interface and an advanced temperature management system.

Product features

- > Large 7-inch VisioNize® touch interface for super-fast parameter settings via unique favorites function
- > User management with multiple authorization levels and documentation features supporting GLP/GxP requirements
- > Swing-bucket rotors and adapters for tubes and bottles from 0.2 mL to 1,000 mL as well as all types of MTP, PCR or Deepwell Plates

Centrifuge 5920 R

Description

Centrifuge 5920 R is a large benchtop refrigerated centrifuge with exceptional performance and high capacity, making it a superior choice for high-throughput applications.

Product features

- > Swing-bucket rotors and adapters accommodate tubes and bottles from 0.2 mL to 1,000 mL
- > Plate rotor options for centrifugation of all types of MTP, PCR or Deepwell Plates
- > Fixed-angle rotors for high-speed molecular biology applications in tubes from 0.2 mL to 50 mL

Centrifuge Packages 5910 Ri

Ordering information

Description	Order no.
Centrifuge 5910 Ri, touch interface, refrigerated, High Speed Solution, with Rotor FA-6x50	*
Centrifuge 5910 Ri, touch interface, refrigerated, with Rotor S-4x750, incl. round buckets and adapters for 5 mL/15 mL/50 mL conical tubes	*
Centrifuge 5910 Ri, touch interface, refrigerated, with Rotor S-4xUniversal, incl. universal buckets and adapters for 5 mL/15 mL/50 mL conical tubes and plates	*
Centrifuge 5910 Ri, touch interface, refrigerated, Big Volume Harvesting Solution, with Rotor S-4xUniversal, incl. universal buckets and 1 L adapters (4x), Eppendorf 1 L bottles (4x)	*
Centrifuge 5910 Ri, touch interface, refrigerated, Versatility Solution, with Rotor S-4xUniversal, incl. universal buckets and adapters for 5 mL/15 mL/50 mL conical tubes, 175 – 250 mL bottles and plates	*
Centrifuge 5910 Ri, touch interface, refrigerated, with Rotor S-4xUniversal, incl. universal buckets, adapters for 5 mL/15 mL/50 mL conical tubes, 175 – 250 mL bottles and plates, adapters for 1000 mL bottles incl. 4 x 1000 mL bottles	*

Rotors for Centrifuge 5910 Ri

Rotor S-4xUniversal

- > High capacity swing-bucket rotor with max. speed 4,347 x g (4,500 rpm)
- > Broad range of adapters enables high versatility for tubes and flasks from 4 mL to 1,000 mL and plates
- > Universal bucket design accommodates both plates and tubes

Ordering information

Description	Order no.
Rotor S-4xUniversal, incl. universal buckets	5895 200 001
Caps, for Rotor S-4xUniversal, aerosol-tight, 2 pcs.	5910 750 005
Wide-neck bottle 750 mL, for Rotors S-4-104, S-4x750, S-4x1000, 2 pcs.	5820 708 000

¹⁾ Please perform a manual test to determine the actual loading capacity. ²⁾ Aerosol-tight caps compatible with MTP, DWP 96 500 µl, DWP 384 200 µl. Aerosol-tight caps not compatible with DWP 96 1,000 µl and 2,000 µl. ³⁾ Please order adapter for 25 mL conical tubes snap cap 5820 733 004. ⁴⁾ When used with aerosol-tight caps the max. capacity is reduced to 20 x 50 mL (5 x 50 mL per adapter). ⁵⁾ Please order adapter for 25 mL conical tubes screw cap 5820 734 000. ⁶⁾ Please note that these conical bottles need to be used together with a conical form insert provided by the manufacturer.

Universal Adapters for Rotor S-4xUniversal

Rotor S-4xUniversal brings outstanding versatility to those customers who need to spin a variety of vessels and plates. Three innovative universal adapters accommodate a selection of tubes, plates and bottles:

- > Adapter 1: 5.0 mL and 15 mL conical tubes, MTP/DWP
- > Adapter 2: 25 mL and 50 mL conical tubes, MTP
- > Adapter 3: 25 mL and 50 mL conical tubes, 250 mL bottles, MTP

For customers who need either stacking capability, higher speed or aerosol-tight centrifugation of certain plate formats, a separate plate carrier is available.

Universal adapter 1
Setup for deepwell plates and Eppendorf Tubes® 5.0 mL.

Universal adapter 2
Setup for microplates and 25/50 mL conical tubes.

Universal adapter 3
Setup for 25/50 mL conical tubes and 250 mL bottles.

Rotors for Centrifuge 5910 Ri

Rotor S-4x500

- > Medium capacity swing-bucket rotor with max. speed 3,220 x g (4,000 rpm)
- > Rotor S-4x500 accommodates tubes and bottles from 0.2 mL to 500 mL as well as plates
- > Aerosol-tight caps for safe centrifugation of hazardous samples optionally available¹⁾

¹⁾ Aerosol-tightness tested by Public Health England, Porton Down, UK.

Advanced Rotor Design

Cross section of Rotor FA-6x50 (6 × 50 mL conical) showing the light-weight design. All metal not needed for safety or performance is hollowed out to reduce weight and improve handling.

Low rotor weight

Eppendorf's fixed-angle rotors are among the lightest in the industry to improve handling and operational safety. Light-weight rotors cause less wear and tear on the motor and allow for faster acceleration and braking times.

250 mL conical tubes			

Eppendorf QuickLock® lids for ergonomic lid locking

Our aerosol-tight QuickLock rotors close with only ¼ of a turn. This not only saves you time during every day use, it also takes repetitive stress off your wrist.

Superior temperature control

Aluminum, with its high heat conductivity, allows fast pre-cooling and accurate temperature control in refrigerated centrifuges.

Perfect fit with Eppendorf Conical Tubes 15 mL and 50 mL

The Eppendorf Conical Tubes are characterized by an outstanding centrifugation stability of up to 19,500 × g¹⁾. This makes them suited for a broad range of applications.

¹⁾ Test conditions: Rotor FA-45-6-30 in Eppendorf Centrifuge 5810 R (using a suitable centrifuge adapter for 15 mL tube), sample: Saline solution (density: 1.0 g/mL), controlled centrifugation temp.: 25 °C, centrifugation time: 90 min (SnapTec® tube: 17,000 × g max.)

Rotors for Centrifuge 5910 Ri/5920 R

Rotor FA-6x250

- > Fixed-angle rotor for up to 6 x 250 mL bottles¹⁾
- > Ideal for the pelleting of microorganisms and mammalian cells
- > 12 different adapters for broad range of additional applications

¹⁾ To run this rotor, a software update is required for earlier centrifuges (5910 R & 5920 R). Please contact your local Eppendorf organization or dealer for further information.

Mobile Tables

Description

Is space a limited resource in your lab or are you looking for an ergonomic location for your Eppendorf tabletop centrifuge? The new Eppendorf Mobile Tables save precious benchtop space and provide the freedom and flexibility to use your Centrifuge 5804/5804 R, 5810/5810 R, 5910 Ri or 5920 R wherever you need it.

Product features

- > Designed for Centrifuge 5804/5804 R, 5810/5810 R, 5910 R/5910 Ri, 5920 R
- > Save precious benchtop space
- > Sturdy design for safe centrifugation

Ordering information

Description	Order no.
Mobile table for under bench storage (low design), fits under standard 90 cm lab bench with centrifuge lid closed for Centrifuge 5804/5804 R, 5810/5810 R, 5910 R, 5910 Ri and 5920 R	5921 000 010
Mobile table for ergonomic loading and unloading (high design), fits in any empty floor space for Centrifuge 5804/5804 R, 5810/5810 R, 5910 R, 5910 Ri and 5920 R	5921 000 012

Concentrator plus

Description

With its advanced heating technology, the Eppendorf Concentrator plus facilitates fast and efficient, gentle vacuum concentration of DNA, RNA, nucleotides, proteins and other liquid or wet samples. Its new coated lid provides superior chemical resistance against many acids and organic solvents.

Product features

- > Comes in 3 system configurations
- > Extremely quiet operation <50 dB(A)
- > Chemical-resistant, maintenance-free PTFE diaphragm pump eliminates the need for changing pump oil

Rotors for Vacufuge plus

Rotor F-45-48-11

- > Rotor for 48 x 1.5/2.0 mL microcentrifuge tubes
- > A spacer enables additional stacking (double capacity)

Rotor F-35-6-30

- > Rotor for 6 x 50 mL conical tubes
- > Rotor for 6 x 15 mL conical tubes
- > Also accommodates for 6 x 25 mL conical tubes

Rotor A-2-VC

- > For use with MTP, PCR and Deepwell Plates up to 27 mm high
- > A work tray with frame is available for PCR test plates and microplates without frames
- > Rotor can be autoclaved for 20 min. at 121°C

Rotor F-45-22-17

- > Max. load: 22 x 5.0 mL
- > Tube Options: Snap caps and screw caps
- > Tube diameter: 17 mm

Centrifuge CR22N – The Harvesting Specialist

Whether your work requires harvesting of biomass in volumes of up to 6 L per run, pelleting of cells, subcellular organelles or larger viruses, or extraction, precipitation, concentration and purification of nucleic acids in up to 50 mL tubes, the Centrifuge CR22N is the optimal solution to support your everyday centrifugation tasks.

- > Speeds of up to 48,000 x g (fixed-angle) or 11,500 x g (swing-bucket) support applications in genomics, cell biology and proteomics
- > Unique 1.5 L triangular bottle for easy and time efficient harvesting of cells, yeast and bacterial cultures (up to 15,100 x g)
- > 4 different kits (rotor plus suitable consumables) tailored to your applications – choosing the right one is now easier than ever
- > Large touchscreen interface for fast and easy operation
- > User management and documentation function supports labs working in a GLP/GxP environment
- > Self-locking rotor system for increased safety and convenience

Unique 1.5 L Triangular Bottle – Spinning Made Easy

Gain great flexibility and save precious time with our innovative triangular bottles:

- > No minimum filling level. Spin samples between 0 – 1.5 L without worrying about bottle stability
- > Reduces handling steps during the separation process such as balancing, supernatant harvesting, pellet recovery and cleaning of bottles after the run

Centrifuge CR30NX – The Multipurpose Solution

With high speeds up to 110,000 x g, this centrifuge reaches g-forces that cross into the range of ultracentrifugation, making it the optimal solution for laboratories with a broad application range. From harvesting of biomass via continuous flow to separation steps of small particles such as viruses, organelles, extracellular vesicles or nanoparticles, the outstanding versatility and performance of Centrifuge CR30NX covers them all.

- > 2-in-1 model: suitable for centrifugation steps with super-speed requirements (with vacuum function)
- > Unique 1.5 L triangular bottle for easy and time efficient harvesting of cell, yeast and bacterial cultures (up to 15,100 x g)
- > 8 different kits (rotor plus suitable consumables) tailored to your applications – choosing the right one is now easier than ever
- > Immediate rotor recognition and self-locking rotor system for highest level of user safety
- > Large touchscreen interface for fast and easy operation
- > User management and documentation functions support labs working in a GLP/GxP environment

Super-Speed Rotors – No Switching Needed

Choose from two rotors with max. speed of 110,000 x g:

- > Top-loading swing-bucket rotor for high-speed density gradient applications (e.g. rate zonal or Isopycnic centrifugation)
- > Fixed-angle rotor for cell fractionation (e.g. Virus-, viral particle or exosome pelleting)
- > With the self-locking rotor system and the immediate rotor recognition, you can toggle between applications in just a few minutes

Super-Speed Pelleting Kit 6 x 40 mL tube CR30NX, Rotor R25ST (swing-bucket) 6 x 40 mL incl. 50 x 40 mL high-speed round bottom tubes	5721 302 400

Ultracentrifuges - CP-NX Series

New

The CP-NX Centrifuge Series, the flagship of our ultracentrifuge portfolio, has been designed to make ultracentrifugation as safe and convenient as possible. With speeds of up to 803,000 x g (100,000 rpm), it is the optimal solution for nucleic acid, vesicle, organelle and virus isolation, as well as protein and nano-particle purification, just to name a few.

The centrifuge series consists of three models: Centrifuge CP100NX, CP90NX and CP80NX¹⁾, all of which share the same great range of user-friendly and innovative features along with a comprehensive rotor portfolio, making them your indispensable companion for all high- to ultra-speed applications.

The unique Automatic Rotor Life Management System (RLM) significantly increases the lifetime of the rotors by automatically tracking the exact run times on the internal rotor memory, making handwritten rotor logs a thing of the past. The self-locking rotor system eliminates the need to manually tighten the rotor, enabling quick and easy rotor exchange within seconds. The non-contact imbalance sensor ensures safe operation, while the possibility to balance samples by eye (up to 5 mm)²⁾ eliminates time-consuming sample balancing via scale.

The large touch display stands out with its intuitive, multilingual operation, offering three-level user management and documentation of runs. The additional option to pre-program up to 1,000 programs supports multi-user labs as well as laboratories working in GxP/GLP compliance.

¹⁾ The CP-NX models are available with max. speeds of 100,000 rpm (CP100NX)/90,000 rpm (CP90NX)/80,000 rpm (CP80NX), respectively. ²⁾ Except rotor P21A2

Micro-Ultracentrifuges - CS150FNX and CS150NX

New

With extraordinarily high speeds of up to 1,050,000 x g (150,000 rpm), plus fast acceleration and deceleration ramps and a broad range of rotors, our micro-ultracentrifuges ensure speedy separation of samples such as nucleic acids, proteins, cell organelles, viruses and nanoparticles in volumes between 0.2 - 30 mL.

Depending on the space available, you can choose between a floorstanding model (CS150FNX) with a very compact footprint or a benchtop model (CS150NX) with standard power requirements for flexible placement within the laboratory. Both devices have a low noise level of <45 dB(A), ensuring a stress-free work environment, even when working directly next to the device.

Additional features include a Rotor Management and the self-locking rotor system, which enables quick and easy rotor exchange within seconds. The innovative, non-contact imbalance sensor ensures safe operation, while the possibility to balance samples by eye (up to 5 mm)¹⁾ eliminates time-consuming sample balancing via scale.

The large touch display makes operation easy, while providing enhanced security and compliance with user-based access control and documentation of runs. The ability to pre-program up to 20 programs supports multi-user labs as well as laboratories working in GxP/GLP compliance.

¹⁾ Except rotor S140AT, S110AT, S80AT3, S50A

Whether your application involves genome editing, NGS library preparation, cloning, or virus detection, a PCR thermocycler is required. Traditional end-point PCR is utilized in virtually every molecular biology laboratory where the need for optimal performance, and fast, reproducible results is crucial.

Key features of a high-quality thermocycler include durability, versatility, speed and throughput. When choosing a cyclor based on such characteristics, it is additionally important to think about the block material and configuration. We offer multiple block configurations utilizing either a silver block with good heat conducting properties for increased speed or traditional aluminum blocks. We also offer a dual block for running your PCR reactions in parallel.

Depending on your lab's needs, you require different vessel types and a cyclor that is compatible with both tube and plate formats. Our cyclors utilize flexlid® technology that guarantees optimal pressure for a tight seal of your sample plates or tubes in the block for limited evaporation.

For added flexibility and efficiency, the 2D-Gradient of the Mastercycler® X50 enables you to optimize the annealing and denaturation temperature in a single PCR run. If you need support for further optimization of your PCR protocols, we have articles that explain different ways to improve your PCR.

Connect multiple thermocyclers to enlarge your capacity.

For high throughput or expanding labs, we also offer eco units that can be connected to one main cyclor. With the Mastercycler® nexus, up to 3 units can be connected, while with the Mastercycler® X50, up to 50 devices can be connected and conveniently controlled via the CycleManager® X50 software.

We also offer distinguished service plans to ensure the maintenance of your thermal cyclor assessing factors such as temperature block homogeneity. You may also use the temperature verification system TVS-T6 to check the block temperature of your cyclors for minimal device downtime.

PCR consumables

Modern molecular biology would be nowhere without clean, high-purity PCR consumables. At Eppendorf, the home of the Eppi®, we have over 50 years of experience in producing high-quality consumables that enable scientists to produce their best work.

The heart of our PCR consumables range is the Eppendorf twin.tec® PCR plate. It is available in a 96-well or 384-well format. The 96-well plates are offered in three different frame variants: unskirted, semi-skirted and, skirted to perfectly fit your instruments. The plates are also available in standard or LoBind® quality and with additional features, like low profile, and other variations to suit different applications. We also supply a range of PCR tubes, films, foils, tube strips, and cap strips.

Eppendorf twin.tec® plates are available in different colors.

Plate compatibility

CycleManager X50 software

Please use the QR Code.
www.eppendorf.com/cyclemanager-software

All PCR consumables are made of high-purity plastics and are 'PCR clean'. This means they are batch-tested and certified by an independent laboratory to be free of a range of common PCR contaminants, including DNA, DNase, RNase, and PCR inhibitors. Products that are labeled 'forensic DNA grade' fulfill the requirements for ISO 18385.

The plate portfolio also includes plates for real-time PCR with white wells and individually wrapped microbiology plates. Those plates are specially designed for these methods and research areas, helping you to achieve the best possible results.

Different frame formats of Eppendorf twin.tec® plates: unskirted (top), semi-skirted (middle) and skirted (bottom).

Mastercycler® X50

Description

The new Mastercycler® X50 elegantly combines speed, flexibility, and ease of use. With its intuitive touch screen offering precise fingertip control, the MC X50 PCR thermocycler enables easy PCR optimization in advanced molecular biology research and dependable standardization in routine PCR applications. It is also perfectly fitted for NGS.

Product features

- > Heating rate: up to 10 °C/s
- > Wide selection of blocks from a fast silver block to 384 well block
- > VisioNize touchscreen interface

Applications

- > Fast PCR
- > PCR optimization
- > Standard PCR
- > Incubation
- > Cycle sequencing

Mastercycler® nexus

Description

The versatile Mastercycler® nexus enables you to select the PCR consumables that best fit your assay. The nexus PCR cycler can accommodate 96-well PCR plates, 0.2 mL PCR tubes, 0.2 mL PCR tube strips, and 0.5 mL PCR tubes. With less than 40 dB[a] noise emission, the nexus is whisper quiet, while also being energy efficient.

Product features

- > Intuitive graphic programming
- > Small footprint
- > Universal block for ultimate flexibility

Applications

- > Standard PCR
- > Fast PCR
- > PCR optimization

Mastercycler® nexus X2

Description

The Mastercycler® nexus X2 is Eppendorf's solution for busy PCR labs. Two totally independent protocols can be run on the two blocks, so two PCR users can independently start and end their PCR reactions whenever they want. One of the assays can even have up to 64 samples. With less than 40 dB(A) noise emission, the nexus PCR cycler is whisper quiet and also very energy efficient.

Product features

- > Asymmetrically divided block for running different assays in parallel
- > Intuitive graphic programming
- > Universal block for strips, 0.1 mL, 0.2 mL and 0.5 mL PCR tubes

Applications

- > Standard PCR
- > PCR optimization

HeatSealer

Description

To obtain reliable assay results, PCR plates need to be sealed tightly in a reproducible manner – and the same is true for maintaining sample integrity during storage. The HeatSealers S100 and S200 are user friendly instruments for reliable plate sealing of different plate formats. In combination with our range of adapters, Eppendorf HeatSealers enable you to seal almost any plate.

CycleManager X50 Software

Description

Maximize your PCR efficiency. CycleManager X50 enables you to increase your throughput by managing up to fifty Mastercycler X50 simultaneously. Now there's no need for repetitive copying of PCR documentation and parameters, time-consuming searches for an available cycler, or checking the status of your runs on multiple cyclers. Address this bottleneck in your workflow and get full PCR control with CycleManager.

PCR Consumables and Sealing

Eppendorf twin.tec® PCR Plates

Choose Eppendorf twin.tec® PCR plates for confidence in every PCR assay. Twin.tec® plates offer purity, rigidity, color, and other simple, smart features can make your daily life a lot easier. The rigid polycarbonate frame works well in automation and high-throughput processes, and the different colors mean you can quickly organize the different steps of your workflow.

Eppendorf twin.tec® PCR Plates LoBind®

Get the most out of your PCR. Eppendorf's twin.tec® PCR plates LoBind® are specially designed to maximize the yield of your target molecules. LoBind wells are made of polypropylene, with low DNA binding properties, leading to reduced loss of target molecules and higher yields in PCR and other molecular assays.

PCR films and foils

Achieve reliable sealing on all your PCR plates. Eppendorf PCR films and foils ensure the sealing on your PCR plates is airtight. Choose the sealing material that works for your assay. For example, the Masterclear® real-time PCR film with its superior optical characteristics is the perfect fit for qPCR.

Eppendorf PCR Tubes

Since 1963, when Eppendorf invented the microcentrifuge tube, Eppendorf tubes have proven to be reliable companions in a scientist's daily work. Eppendorf PCR tubes are easy to open and provide tight sealing to prevent evaporation in PCR. With their thin, consistent wall thickness and smooth wall surface, they also ensure efficient heat transfer to the sample, speeding up your PCR.

PCR-Cooler

Say goodbye to unstable racks and ice buckets at your bench. The PCR racks are ideal for safe sample transport and storage while the PCR-Cooler is perfect for keeping your samples cold throughout your PCR setup without using ice. Suitable for 0.2 mL and 0.5 mL PCR tubes and for 96-well PCR plates.

Freezer

Cold Storage – Protect what Matters

How Much Effort Did You Spend on Your Sample?

Did you ever calculate the value within your freezer? All the hours, days, weeks, and months spent on your samples? More than 50,000 samples fit into large, standard ULTs (also known as ultra-low temperature freezer, -80°C). The value of every single sample differs – from simple buffers to high-value cell extracts, expensive enzymes, or very rare sample material.

When predominantly storing high-value samples which are a result of months of work – you reach a value in your freezer far beyond half a million €. Your ULT freezer is not limited to being a storage room for samples. This instrument is your assurance for long-term scientific success, it guards the results of your work.

Confidence in Quality

Eppendorf has a long-standing history of innovation and quality, and our freezer manufacturing process is no exception. Each Eppendorf ULT freezer is thoroughly inspected to meet our rigorous quality guidelines. The final inspection takes more than 24h and is based on manual and visual checks. This process is documented by an individual certificate, completed with serial number, provided as standard for your documentation. As your expert partner for reliable, high-quality, and efficient storage solutions, Eppendorf finely engineers each freezer with care, using only the highest quality materials to ensure a long lasting freezer that offers peace of mind and security. Performance data are based on external test runs of 3 units. Eppendorf freezers are designed to offer a longterm value over the lifetime of its ownership. You can entrust your valuable samples to our ULT freezers, and you can trust your investment in all finely-engineered Eppendorf instruments.

Our Part for Sustainability

- > ENERGY STAR® and ACT label (My Green Lab) partner
- > 100% renewable power usage in our production facility
- > Environmentally-friendly insulation with green foam, vacuum insulation panels („h“-version), and insulated inner doors for energy efficient storage
- > Green cooling liquids (Hydrocarbons: R170/ R290) with very low global warming potential (GWP) — for compliance with the European F-Gas regulation and US SNAP regulation
- > Experience at Eppendorf with green hydrocarbon-based cooling liquids for -80 °C applications in R&D, production, logistics, and service in the field since 2008
- > Low energy consumption combined with efficient cooling performance and long lifespan from Eppendorf ULT freezers that you can rely on

Digitalization of Cold Storage

Remember Your Last 2 a.m. Wake-up Call?

VisioNize® Lab Suite is your central software solution for effective monitoring and maintenance management to prevent sample storage emergencies. Benefit from 24/7 notification & monitoring for your ULT freezers and high-value stored samples

Independent Temperature Measurement Needed?

VisioNize sense for Eppendorf and non-Eppendorf freezers enables a second independent monitoring of your device and lab environment in VisioNize Lab Suite

Lost in Samples? Stay Organized!

Over many years, scientists collect thousands of samples – samples that are the results of years of hard work, samples of high value. Keep track of your samples with eLabInventory, the sample management software

CryoCube® F440 Series

Zero compromise

How often do you open your ULT freezer door every day? For how long? What are the crucial factors for maintaining a steady -80 °C? It's best practice to always open and close your freezer as quickly as possible when accessing samples. However, locating and removing the correct sample can take time.

The more time it takes, the more the temperature of your frozen samples increases as they are exposed to the warm environment.

The efficient and reliable compressor systems of CryoCube F440 series ULT freezers ensure sample protection by guaranteeing fast recovery and pull-down back to -80 °C.

The CryoCube F440h freezer is based on foam insulation enforced by vacuum insulation panels whereas the CryoCube F440n is based on foam insulation.

For daily usage

- > Space for up to 320 boxes (1.5 mL) for your daily sample storage, combined with efficient pulldown and recovery times back to -80 °C
- > Green cooling (hydrocarbon-based) and low power consumption of 6.8 kWh/ day for high levels of sustainability
- > Technical data based on external test house evaluation for independent validation

freezer-brochure](http://www.eppendorf.com/freezer-brochure)

Easy opening of your freezer requested? The CryoCube® ULT freezers have an ergonomic door handle for convenient opening and closing, following the PhysioCare Concept®

Filter cleaning needed for your ULT freezer? Just open the filter cover and insert a clean filter

Cleaning your ULT freezer? The inner insulated doors of the CryoCube® freezer can easily be removed

Reliable temperature measurement within your ULT freezer requested? All CryoCube® freezers have an integrated probe which is located in the middle compartment for a reliable temperature measurement

Doubled safety for the samples? The built-in temperature probe can be supported by the independent temperature measurement system of VisioNize sense

Cleaning needed? The CryoCube® F440 ULT freezer is equipped with 5 compartments and a stainless steel inner body for easy cleaning

CryoCube® F740 Series

Design the Freezer Around the Sample

The CryoCube® F740 freezer series is the smartest member of the Eppendorf ULT Freezer family. Combining the high-quality tradition of our previous freezers with an increased capacity, the CryoCube F740 series is designed to store more of your samples

securely while maintaining optimal energy usage. Fast pull-down and recovery time back to -80°C increase sample safety. The integration of the PhysioCare Concept® during development means that the CryoCube F740 is easier and more comfortable to use, supports an ergonomic workspace, and enables an optimal workflow in the lab.

Smart Control

Worried about the safety of your high value samples within your ULT freezer? With the Eppendorf ULT monitoring concept available on CryoCube F740hi/ hiw models, you can check the freezer performance whenever you want. All temperature data and all events are stored in the VisioNize touch interface. The handling experience is based on our PhysioCare Concept® combined with extensive user test sessions.

- > On-board data storage to keep track of freezer data
- > Direct connection to VisioNize Lab Suite for 24/7 monitoring and notification (option)
- > Quickly and easily adjust your setpoints with a single finger, even while wearing gloves
- > Event tracking for controlled environments
- > Electronic lock system for controlled access and higher sample safety

Easy overview required? Quickly review your important parameters on the home screen of the ULT freezer

Discover VisioNize Lab Suite

Please use the QR Code.

www.eppendorf.com/visionize

Decide what you need: 3-compartment/ shelves or 5-compartment/ shelves (CryoCube® F740 series only)

If you are in a hurry: Automatic vent port enables fast sample access (CryoCube® F440/ 570/ 740 series)

Keep it tight: Compact and flexible outer door seal for optimal insulation of the CryoCube® ULT freezer

Tailored alarm settings needed? The alarm system of the CryoCube® F740hi freezer can be easily adapted to your needs

Double safety: Gaskets at outer door as well as at inner door (CryoCube® F740 series + Innova® series)

Easy access to filter: Just flip down the cover of CryoCube® F740 series
Silence: Filter position reduces noise level of CryoCube F740 series

Chart Recorder paper (Type I), -50 to -100 °C, 60 pcs.	P0625-2110

Freezer Racks

Drawer or side access?

When using racks with drawers, only the drawer with the freezer boxes of interest is pulled out. All other boxes stay in the cold inner area of the ULT freezer. Eppendorf drawers are optimized for smooth movement at -80 °C for ergonomic handling.

When using side access racks, most of the storage boxes have to be pulled out of the cold inner area of the ULT freezer to access the samples. Racks for chest freezers can be equipped with locking rods to secure freezer boxes when pulling out the rack tower.

Rack without locking rod for Eppendorf chest freezer

Rack with locking rod for Eppendorf chest freezer

Drawer rack for Eppendorf ULT freezer

Side access rack for Eppendorf ULT freezer

Stainless steel or aluminum?

By standard, there are two types of rack materials available.

Stainless steel:

- > Stable/robust for longevity and higher capacity
- > For freezer boxes up to 136 mm x 136 mm for high flexibility regarding boxes
- > Special design for optimized cooling conditions and improved sample safety

Aluminum:

- > For freezer boxes up to 133 mm x 133 mm
- > Non-corrosive anodized aluminum for long-term use

3-compartment or 5-compartment?

The ULT freezer with 3 compartments/ shelves (e.g. Innova® U535) has higher compartments compared to the 5-compartment ULT freezer (e.g. CryoCube® F570 series). Racks of a 5-compartment freezer do fit into a 3-compartment freezer but not vice versa. To get the maximum capacity out of your ULT freezer, the CryoCube F740 series (3-compartment) can be equipped with "3-compartment MAX" racks. These racks only fit into the CryoCube F740 series 3-compartment instruments.

Stainless steel racks

Eppendorf Storage Boxes

In need of housekeeping?

The Eppendorf Storage Boxes are a complete system solution for sample storage. The outer footprint dimensions (133 mm) are compatible with common freezer rack systems. The different inner grids provide a perfect fit for all typical tube formats: cryogenic tubes, microcentrifuge tubes, conical tubes (5 mL, 15 mL, 25 mL, and 50 mL), and other laboratory vessels. This space-saving approach helps to optimize your storage and archiving of samples.

Product features

- > Made of polypropylene (PP) for high stability in freezing applications and smooth opening and closing
- > For freezing to -86 °C
- > High-contrast permanent alphanumeric marking of each location through laser labeling enables easy sample reference and minimizes risk of sample mix-up

Ordering information

Description	Order no.
Storage Box 10 × 10 , freezer box, for 100 cryogenic tubes w. int. thread, 3 pcs., height 53 mm, 2 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 508
Storage Box 9 × 9 , freezer box, for 81 screw cap (cryog.) tubes 1 – 2 mL, 3 pcs., height 53 mm, 2 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 516
Storage Box 9 × 9 , freezer box, for 81 screw cap (cryog.) tubes 3 mL, 2 pcs., height 76 mm, 3 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 540
Storage Box 9 × 9 , freezer box, for 81 screw cap (cryog.) tubes 4 – 5 mL, 2 pcs., height 102 mm, 4 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 567
Storage Box 8 × 8 , freezer box, for 64 tubes 1 – 2 mL, 3 pcs., height 53 mm, 2 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 524
Storage Box 5 × 5 , freezer box, for 25 tubes 5 mL, 4 pcs., height 64 mm, 2.5 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 532
Storage Box 5 × 5 , freezer box, for 25 tubes 5 mL screw cap, 2 pcs., height 76 mm, 3 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 613
Storage Box 5 × 5 , freezer box, for 25 tubes 15 mL, 2 pcs., height 127 mm, 5 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 583
Storage Box 3 × 3 , freezer box, for 9 tubes 25 mL, 2 pcs., height 89 mm, 3.5 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 729
Storage Box 3 × 3 , freezer box, for 9 tubes 50 mL and 4 tubes 15 mL, 2 pcs., height 127 mm, 5 in, polypropylene, for freezing to -86 °C, autoclavable, with lid and alphanumeric code	0030 140 591

Freezer Boxes and Dividers

Looking for basic freezer boxes for storage?

The white water-resistant cardboard boxes are optimal for organizing and safely storing your samples in the ultra-low temperature freezer (ULT) at -80°C. The freezer boxes fit into both models of ULT freezers, upright as well as chest lab freezers.

Freezer Cardboard Storage Boxes

- > White cardboard box with water resistant coating, designed to withstand ultra-low temperature
- > Available in 53 mm (2 in), 76 mm (3 in), and 102 mm (4 in) tall boxes
- > Compatible with box dividers 7 × 7 to 10 × 10 (dividers sold separately)

Freezer Boxes Dividers

- > Available in 7 × 7, 8 × 8, 9 × 9 and 10 × 10 configurations
- > Compatible with freezer cardboard storage boxes (sold separately)

Ordering information

Description	Order no.
Freezer Boxes Dividers	
7 × 7, 17.4 mm max. tube diameter, holds 49 tubes	D49
8 × 8, 15 mm max. tube diameter, holds 64 tubes	D64
9 × 9, 13 mm max. tube diameter, holds 81 tubes	D81
10 × 10, 11.8 mm max. tube diameter, holds 100 tubes	D100
Freezer Cardboard Storage Boxes, white	
53 mm tall	B50-SQ
76 mm tall	B75-SQ
102 mm tall	B95-SQ

Eppendorf SafeCode System

Safe sample identification needed?

»Stored vessels must be labeled« – naturally, every lab member agrees. In reality you always find some vessels in your freezer without any labeling or with non-readable labeling. Clear labeling is recommended to make reading as easy and as reliable as possible for everyone. Printed labels on vessels in plain writing are the minimum condition for safe reading. Barcodes or 2D datamatrix codes are one

step further towards a fast and safe sample identification. Vessels with up to a 3-level coding in different formats enable you to improve your processes. Smart labeling of your high-value samples is crucial for safe identification and ultimately for safe results. Manage your coded samples with sample management software like eLabInventory.

How can I get the ID-specific information for my SafeCode consumables?

Depending on the ID of the Eppendorf SafeCode consumable product, we provide further information like volume, lot numbers, certificates of quality, as well as further documents for your process documentation.

- > Start your process by scanning the SafeCode datamatrix code. Without a dedicated scanner, read the clear coding on the vial
- > Paste the captured code(s) into the box below
- > Receive all ID-specific information and further documents

A package of your dedicated files can be downloaded for documentation purposes.

If you have any further questions you may contact certificates@eppendorf.de

Eppendorf CryoStorage Vials

Scanning labels of 20 vials in a row?

The SafeCode system for Eppendorf CryoStorage Vials is based on a 3-level coding to enable safe sample identification. Up to 96 pre-labeled vials are pre-racked and pre-capped for convenient usage.

Product features

- > 3-level coding for safe sample identification
- > ECC 200 error correction function enables safe code reading with up to 30 % damaged codes
- > Temperature range: -196 °C (gas phase of LN₂) to +121 °C

Ordering information

Description	Order no.
Eppendorf CryoStorage Vial , 0.5 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 960 vials (10 racks × 96 vials), individually packed racks	0030 079 400
Eppendorf CryoStorage Vial , 1.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 960 vials (10 racks × 96 vials), individually packed racks	0030 079 418
Eppendorf CryoStorage Vial , 1.5 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 426
Eppendorf CryoStorage Vial , 2.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 434
Eppendorf CryoStorage Vial , 4.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 442
Eppendorf CryoStorage Vial , sterile, 0.5 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 960 vials (10 racks × 96 vials), individually packed racks	0030 079 450
Eppendorf CryoStorage Vial , sterile, 1.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 960 vials (10 racks × 96 vials), individually packed racks	0030 079 469
Eppendorf CryoStorage Vial , sterile, 1.5 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 477
Eppendorf CryoStorage Vial , sterile, 2.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 485
Eppendorf CryoStorage Vial , sterile, 4.0 mL, free of DNase, RNase, human DNA, endotoxin; external thread, pre-capped gray, with 2D SafeCode (DataMatrix/ECC200), linear and human readable code, 480 vials (10 racks × 48 vials), individually packed racks	0030 079 493

SafeCode Tubes

How often do you puzzle about tube labels while working at the bench?

A clean and stable label on the side or on the top of the vessel can make scientific life so much easier. Eppendorf microtubes and conical tubes are available with SafeCode - a well-designed barcoding system. Take advantage of the pre-labeled and durable 2-level coding of the SafeCode system (datamatrix code and clear

coding) to enable safe sample identification. The safe sample ID is supported by online information about the dedicated consumable. The tube range covers different volumes from 1.5 mL to 50.0 mL for a broad range of applications at the bench. This set of vessels expands your safe sample identification solution from the existing SafeCode CryoStorage Vials at -80 °C storage towards daily work at the bench.

Product features

- > 2-level coding for safe sample identification
- > ECC 200 error correction function enables safe code reading with up to 30 % damaged codes
- > Temperature range: -86 °C to +121 °C

Missing a handheld scanner? Barcoded tubes can be identified by mobile devices as well

Eppendorf RackScan

Scanning more than one sample in parallel?

The Eppendorf RackScan provides you different solutions to scan samples tubes with datamatrix (2D) codes. The Eppendorf RackScan b scans data from the bottom of the vessels. The instrument can be equipped with the „s“ accessory to read side-labeled barcodes. Data can be exported in different formats to downstream software applications.

Product features

- > Camera based instrument resulting in rapid imaging and decoding
- > Comfortable and easy plug-in system
- > Small footprint, ideal for benchtop (and integration)

Eppendorf RackScan s , code scanner for side reading of SBS racks and cryostorage boxes, accessory for the RackScan product family	6002 000 014
Eppendorf RackScan b , scanner (bottom reading) for 2D-coded tubes in SBS racks and cryostorage boxes, incl. software RackScan Analyzer	6002 000 006

Micromanipulation

Micromanipulation is ideally suited to address a wide range of experimental questions in the field of life sciences. In many instances, physical manipulation exposes cells to less trauma than other methods, like chemical transfection, thus contributing to the quality of your results.

With almost 40 years of cell manipulation expertise, Eppendorf is your expert partner for micromanipulation and microinjection in the life sciences. As a systems provider for a diverse range of applications, we can support you with a customized solution for your cell manipulation requirements.

Eppendorf offers a wide range of micromanipulation workstations for specific application profiles. Our cell manipulation systems are compatible with common instruments produced by the major microscope manufacturers, thus providing the flexibility to fit your micromanipulation system to the microscope of your choice.

Successful micromanipulation of cells requires precision, reliability, and fast sample processing. Our motivation is to consistently provide you with the best possible tools for your life science experiments - for cell manipulation and beyond.

Microinjection into oocytes, embryos and small organisms

- > Production of genetically modified animals using pronuclear and cytoplasmic injection (e.g. CRISPR & TALEN)
- > Applications in animal reproductive medicine (e.g. mouse ICSI)
- > Serial injection into fish embryos (e.g. Zebrafish, Medaka)
- > Injection into *C. elegans*, other worms, insects, etc.

Removal or cell transfer

- > Stem cell transfer
- > Nuclear transfer
- > Transplantation of cells
- > Selection and isolation of individual cells (e.g. biopsies)
- > Single cell picking

Other application examples

- > Semi-automatic microinjection into adherent cells
- > Injection into 3D cell culture or organoids
- > Positioning and selection of microparticles
- > Microdissection of chromosomes, etc.
- > Automatic dispensing of cell suspensions or solutions

CellTram® 4r Air/Oil

Description

Working with the CellTram 4r Air and CellTram 4r Oil is like taking a breath of fresh air. Our new manual microinjectors have been designed with special emphasis on excellent ergonomics, ease of use and highest precision. They cover a wide range of research applications and suit all personal working techniques.

1. Pneumatic system for oil-free manipulation and injection of cells (CellTram 4r Air)
2. Piston position scale enables setting of air volume and injection characteristics according to individual needs (CellTram 4r Air)
3. Improved oil-filling system for quick and clean re-filling (CellTram 4r Oil)
4. Coarse and fine drive for precise and intuitive sample control
5. Improved rotary knob design for better handling and easier cleaning
6. Capillary holder 4 with markings for easier positioning
7. New grip head 4 system for simple capillary change and higher user safety
8. Position indicators and marking for in/out to reduce risk of user errors
9. Stable, nonslip base plate
10. Highly reliable performance with minimal maintenance

Technical specifications subject to change.

CellTram 4r Air: Pressure responsiveness for various applications can be adjusted by different piston positions

CellTram 4r Oil: The new oil-filling system helps avoid oil-spilling and facilitates the filling process

Applications

- > ICSI of mouse and large mammals (e.g., equine, porcine...)
- > Holding of sensitive oocytes, embryos or small organisms
- > Piezo-assisted micromanipulation in combination with the Eppendorf PiezoXpert®
- > Transfer of cells or organelles (e.g., ES cell or iPS cell transfer into blastocysts or morulae)
- > Enucleation/nuclear transfer
- > (Xeno)transplantations
- > Removal of cells (e.g., for polar body biopsy, blastomere biopsy or trophectoderm biopsy)
- > Manual microinjection and dispensing of aqueous solutions
- > Single cell picking

Technical specifications

Model	CellTram 4r Air	CellTram 4r Oil
Cylinder volume	10 mL	1,000 µL
Max. pressure	3,000 hPa	20,000 hPa
Min. adjustable volume	< 100 nL	< 1.5 nL
Pressure generation	Cylinder/piston system, air-filled	Cylinder/piston system, oil-filled
Volume change per revolution	60 µL/600 µL (fine/ coarse rotary knob)	1 µL/10 µL (fine/ coarse rotary knob)

Eporator®

**Description**

The Eppendorf Eporator is a compact instrument designed for fast and controlled electroporation of bacteria, yeasts and other microorganisms. The instrument features an intuitive operation and user-friendly programming of standard methods. Experimental data can easily be exported and documented using its USB port.

Product features

- > Faster sample handling – simple one-button operation
- > Maximum safety via integrated cuvette holder
- > Compact, space-saving design

TransferMan® 4r

**Description**

Successful cell manipulation requires precision and fast sample processing. Eppendorf's new flagship micromanipulator, the TransferMan® 4r, is designed to ensure optimal results for any of your micromanipulation requirements. Together with our complete portfolio of cell manipulation products, it forms an ideal system to fully support your cell manipulation applications.

Applications

- > Micromanipulation of oocytes and early embryos
- > ES and iPS cell transfer
- > Nuclear transfer
- > Pronuclear and cytoplasmic injection (e.g., CRISPR/Cas, TALEN)
- > Selection of individual cells (e.g., biopsies, single cell picking)
- > Positioning and selection of microparticles
- > Microdissection of chromosomes, etc.

Product features

- > Unique DualSpeed™ joystick for precise and instantaneous movement control
- > Maximum stability ensures vibration-free work
- > One Joystick for all 3 axes (X, Y, Z) movements and in axial direction (X/Z)

Ordering information

Description	Order no.
TransferMan® 4r, micromanipulator with DualSpeed™ joystick for direct and dynamic movement control, 100 – 240 V/50 – 60 Hz, For research use only.	*

InjectMan® 4

Electronic coupling with the FemtoJet® 4 - for fast, serial (>20 cells/min) and minimally invasive (axial direction) injections

Description

Minimal lesion hole size for high cell survival rates are key in your DNA/RNA, protein or fluorescent dye microinjection experiment? Or you want to speed up your serial adherent cell injections to ~20-30 cells/min? The InjectMan® 4 electronically coupled with the FemtoJet® 4i/x supports you with easy (semi-automatic) microinjections into adherent cells, smaller organisms (e.g. zebrafish) and embryos in the early stages of development.

Applications

- > Semi-automatic microinjection into adherent cells
- > Serial microinjection into fish larvae, frog eggs, insect embryos, etc.
- > Injection into living plant cells, *C. elegans* and other roundworms and flatworms
- > Automatic dispensing of cell suspensions or solutions
- > Stable, drift-free positioning, e.g. for electrophysiology techniques

Product features

- > Maximum stability ensures drift-free work
- > Electronic coupling to FemtoJet microinjectors for fast serial semi-automatic injections with highest reproducibility
- > Selection and programming of advanced functions (e.g. axial movement, step injection)

InjectMan® 4 and TransferMan® 4r Accessories

Description	Order no.
Positioning aid, for universal capillary holder, capillary holder 4, 2 pcs.	5192 072 001
Spare parts kit, 1 slider (complete), 2 machine screws M2.5x6 (swivel joint), 2 set screws (angle head), 2 compression springs (knurled screw angle head)	5192 071 005
Headstage holder, for preamplifier	5192 073 008
Foot control, for FemtoJet® 4i/4x	5252 070 020
Connection cable, for connecting TransferMan® 4r/InjectMan® 4 to FemtoJet® 4i/4x	5192 082 007
Connection cable, for connecting Eppendorf micromanipulators with FemtoJet® and FemtoJet® express	5181 070 015
Connection cable, for connecting Eppendorf micromanipulators with PC or PiezoXpert®	5181 150 094
Y-cable FJ4, Y-cable for connecting FemtoJet® 4i/4x with a PC and TransferMan® 4r or InjectMan® 4	5192 080 004
Y-cable PX, Y-cable for connecting PiezoXpert® or a PC with TransferMan® 4r or InjectMan® 4 and FemtoJet® 4i/4x	5192 081 000

Microscope Adapters for Micromanipulation Systems

Microscope adapters

Eppendorf microscope adapters enable the simple installation of the TransferMan® 4r or InjectMan® 4 on all conventional inverted microscopes manufactured by Leica®, Nikon®, Olympus® and Zeiss®

Universal stand

The Universal stand can be used for mounting the TransferMan 4 and InjectMan 4 micromanipulators on upright microscopes and stereo microscopes independent of the microscope tripod used. With its magnetic foot the Universal stand can be firmly fixed to any ferromagnetic base (plate or table).

Find all available adapters here

Description	Order no.
Adapter Leica® 1 , for Eppendorf micromanipulation systems, for Leica® DMi8, DMi3000 B, 3000 M, 4000 B, 5000 B, 5000 M, 6000 B, DM IRB E, HC and DM IRE 2 microscopes	5192 301 000
Adapter Leica® 2 , for Eppendorf micromanipulation systems, for Leica® DM IL LED and HC microscopes	5192 302 007
Adapter Nikon® 1 , for Eppendorf micromanipulation systems, for Nikon® Eclipse® Diaphot 200, 300 and Eclipse® Ti-E, Ti-U, Ti-S, TE200, TE300, TE2000 microscopes	5192 316 008
Adapter Nikon® 2 , for Eppendorf micromanipulation systems, for Nikon® Eclipse® Ts2R microscope	5192 317 004
Adapter Nikon® 3 , for Eppendorf micromanipulation systems, for Nikon® Eclipse Ti2-E/-A/-U microscopes	5192 318 000
Adapter Olympus® 1 , for Eppendorf micromanipulation systems, for Olympus® IX50, IX51, IX70, IX71, IX80 and IX81 microscopes	5192 306 002
Adapter Olympus® 2 , for Eppendorf micromanipulation systems, for microscopes of Olympus® IX3 series (IX53, IX73, IX83) with standard illumination column	5192 307 009
Adapter Olympus® 3 , for Eppendorf micromanipulation systems, for microscopes of Olympus® IX3 series (IX53, IX73, IX83) with special illumination column IX2-ILL30	5192 308 005
Adapter Zeiss® 1 , for Eppendorf micromanipulation systems, for Zeiss® Axiovert® 200, Axio Observer A1, D1, Z1 and Axio Observer 3, 5 and 7 microscopes	5192 311 006
Adapter Zeiss® 2 , for Eppendorf micromanipulation systems, for Zeiss® Axio Vert.A1 microscope	5192 312 002
Universal stand , for mounting Eppendorf micromanipulators on upright microscopes and stereo microscopes independent of the microscope tripod used	5192 325 007
Adapter bridge , for mounting Eppendorf micromanipulators on microscope adapters for TransferMan® NK 2, InjectMan® NI 2 and PatchMan NP 2	5192 321 001

Antivibration Pad

Description

Do you (still) worry about capillary vibrations and cell safety? Antivibration tables offer good protection from external vibrations. However, if you are looking for cost-efficient basic, low-maintenance, or additional vibration protection, Antivibration Pads from Eppendorf are a solid choice. They are easy to install under the base of the microscope to protect your microscope and its components from external oscillations and vibrations.

Product features

- > Easy to install as a stand-alone or as an addition to your antivibration table
- > Five models available optimized for different weights below individual microscope basis
- > No gas supply or maintenance required

Ordering information

Description	Order no.
Antivibration Pad XS , weight range 4.5 – 6.0 kg	5181 301 009
Antivibration Pad S , weight range 6.0 – 8.0 kg	5181 303 001
Antivibration Pad M , weight range 8.0 – 10.0 kg	5181 305 004
Antivibration Pad L , weight range 10.0 – 12.5 kg	5181 307 007
Antivibration Pad XL , weight range 12.5 – 16.5 kg	5181 309 000

It is decisive to take into account the total weight of your microscope, including the mounted accessories, and the load distribution of the individual contact points.

PiezoXpert®

Description

Many cells require additional assistance for successful microinjection. Piezo-assisted injection methods such as Piezo-ICSI can significantly increase productivity and enhance yields for a variety of micromanipulation applications. The Eppendorf PiezoXpert® ensures gentle and effective penetration of the cell membrane, thereby improving the outcome of your cell manipulation experiments.

Applications

- > Piezo-ICSI (Intracytoplasmic Sperm Injection) in mouse, equine, porcine etc.
- > Transfer of embryonic or induced pluripotent stem cells into blastocysts or morulae
- > Enucleation/nuclear transfer
- > Blastomere biopsy from mouse embryos
- > Biopsy of equine embryos for Preimplantation Genetic Testing
- > RNA/DNA injection into fertilized oocytes of mammals

Product features

- > Fast and simple sample processing due to intuitive operation
- > Reproducible parameter setting
- > Program keys to save your experimental parameters

FemtoJet® 4i and FemtoJet® 4x

Typical Injection Volume	FemtoJet 4i	-->		FemtoJet 4x
Cell nucleus of adherent cells				
Cytoplasm of adherent cells				
Pronucleus of fertilized mouse oocytes				
<i>Caenorhabditis elegans</i>				
Fish embryos in early development phases				
<i>Xenopus laevis</i> oocytes				
Volume (liter, logarithm, measurement unit)	10 ⁻¹⁵	10 ⁻¹²	10 ⁻⁹	10 ⁻⁶
Unit	femtoliter	picoliter	nanoliter	microliter

FemtoJet 4i is suitable for applications that require lower volume ranges; FemtoJet 4x is better suited for applications that require higher volume ranges. Both feature the same injection time and pressure parameters.

Description

Eppendorf's electronic microinjectors FemtoJet 4i and FemtoJet 4x with their simple operation menu and a range of functionalities are perfectly suited for injecting small to intermediate volumes. Both the FemtoJet 4i and FemtoJet 4x, form the perfect system with Eppendorf micromanipulators, yet they integrate just as easily with non-Eppendorf micromanipulation systems. The electronic connection between FemtoJet 4i or 4x and TransferMan 4r or InjectMan 4 guarantees simple, rapid and reproducible microinjections into cells.

	FemtoJet 4i	FemtoJet 4x
Application - Volume range	Serial injections of small to intermediate volumes (femtoliters – 100 pL) for research purposes.	Injection of volumes 100 pL – 1 µL and more and/or longer series at higher, continuous pressures ("heavy duty" device)
Application	Reproducible and serial microinjection into adherent cells when combined with the InjectMan 4r or InjectMan NI 2 micromanipulator Pronuclear or cytoplasmic injection of RNA/DNA solutions into fertilized oocytes of mammals, when combined with the TransferMan 4r micromanipulator	Microinjection into small organisms and embryos in the early stages of development (e.g., <i>Drosophila melanogaster</i> , Zebrafish, etc.)
Pressure supply	Integrated compressor	External pressure supply (not included)
Semi-automatic serial injections	Electronic connection to Eppendorf micromanipulators	

Ordering information

Description	Order no.
FemtoJet® 4i , programmable microinjector with integrated pressure supply, 100 – 240 V ±10 %/50 – 60 Hz, including foot control	*
FemtoJet® 4x , programmable microinjector with external pressure supply (not included), 100 – 240 V ±10 %/50 – 60 Hz, including foot control	*
Capillary holder 4 , for mounting microcapillaries	5196 081 005
Capillary holder 4 slim shape , for flat angle injections, for microcapillaries with outer diameter 1.0 mm	5196 062 000
Injection tube , for universal capillary holder and capillary holder 4, 2 m	5252 070 054
O-ring set 4 , incl. 10 o-rings large, 10 o-rings small, 2 distance sleeves, o-ring removal tool for grip head set 4	5196 086 007
Hand control , for triggering inject function	5252 070 011
Grip head set 4 size 0 , for microcapillaries with outer diameter 1.0 to 1.1 mm (1 only)	5196 082 001
Grip head set 4 size 1 , for microcapillaries with outer diameter 1.2 to 1.3 mm (1 only)	5196 083 008
Grip head set 4 size 2 , for microcapillaries with outer diameter 1.4 to 1.5 mm (1 only)	5196 084 004
Grip head set 4 size 3 , for microcapillaries with outer diameter 0.7 to 0.9 mm (1 only)	5196 085 000
Grip head set 4 (slim shape) , for Capillary holder 4 slim shape incl. 6 O-rings and 2 distance sleeves, for capillaries with outer diameter 1.0 mm	5196 063 007
Y-cable FJ4 , Y-cable for connecting FemtoJet® 4i/4x with a PC and TransferMan® 4r or InjectMan® 4	5192 080 004

CO₂ Incubators

CO₂ incubators, service products, and digital lab management from Eppendorf

The CO₂ incubator is the home of your cells and a key device in every cell culture lab. Therefore, it is crucial that a CO₂ incubator provides **optimized and stable growth conditions** to ensure a high degree of reproducibility for your culturing results – even for sensitive cells. Fast atmosphere recovery rates after door openings without setpoint overshoot, uniformity of the atmosphere inside the CO₂ incubator chamber, and protection from vibrations and air turbulence are important features to consider and are all parts of the Eppendorf CO₂ incubator lineup. Eppendorf also offers various CO₂ incubator service products like IQ/OQ or preventive maintenance. These services are conducted by experienced Eppendorf service technicians to help you to **continuously achieve reproducible results and prepare for internal or external audits**. Furthermore, **comprehensive and centralized documentation** of incubation conditions (e.g. alarms and events), as well as **management of a device fleet** (e.g. customizable tasks or service reminders) are provided by our VisioNize® Lab Suite for a growing number of devices from Eppendorf.

In addition to optimized growth conditions, a CO₂ incubator must provide a **high degree of contamination protection and should be as easy to clean as possible**. Eppendorf CO₂ incubators achieve this with a fanless incubator design that leaves no space for contaminants to hide and omits the need for internal fan-associated HEPA-filters. Fast and easy cleaning are ensured by a deep-drawn, seamless incubator chamber, few internal parts that are disassembled and quickly cleaned, and integrated high temperature disinfection (HTD). Furthermore, options for additional protection like copper interior or segmented inner doors are available for selected CO₂ incubators.

Often underestimated, running costs of CO₂ incubators can add significantly to a cell culture lab's total expenses. Main factors include, for example, costs for regular replacement of internal parts like fan-associated HEPA-filters, costs related to gas consumption (incl. gas costs, labor costs for replacing cylinders, CO₂ incubator downtime during changes etc.), costs for lost lab space due to low usable space vs. footprint ratio, or costs for insufficient future flexibility. Eppendorf CO₂ incubators support cell culture labs to **reduce the running costs** and to **achieve corporate carbon footprint reduction goals**.

CO₂ Incubator Service

Qualification, regular maintenance, and calibration of your CO₂ incubator are key to ensure reproducible results and easy audits at any time. Our trained Eppendorf service technicians will help you to continuously achieve this - for example with preventive maintenance, IQ/OQ or extended warranty.

Smart cultivation with VisioNize® Lab Suite

Are you interested in monitoring your lab devices and receiving notifications e.g., for device alarms? A digital, connected lab offers even more. VisioNize Lab Suite offers everything you need as a lab manager or scientist to get started to digitally manage your lab for increased sample security, compliance needs and maintenance management. Gain access to a modular range of digital services and choose what works for your lab.

Inside Cell Culture Newsletter

You are experienced in cell culture and want to keep expanding your knowledge? Are you looking for resources to improve your trainings? Then our "Inside Cell Culture" Newsletter is just perfect for you.

CellXpert® C170i

Description

Cell culture incubator CellXpert® – Culture of Tomorrow

Are you looking for a 170 L class cell culture incubator that makes cleaning easy and delivers optimized growth conditions, even for your sensitive cells? A cell culture incubator that saves money, provides flexibility in your lab, and is produced according to the highest standards of quality?

CellXpert – a new family of Eppendorf cell culture incubators.

Product features

- > **Easy cleaning and disinfection:** Seamless chamber, easy disassembling in 40 s
- > **Effective contamination protection:** 180 °C High temperature disinfection (HTD) with protocol, no internal fan-associated HEPA filters necessary
- > **Uniform temperature:** Innovative heating concept with multiple temperature sensors at various locations - verified at 27 spots inside the incubator (German DIN 12880)

CellXpert® C170

Description

Looking for a CO₂ incubator with a highly uniform atmosphere, fast recovery, and effective contamination protection? A device that is easy to clean and use with a high useable volume to footprint ratio? Let us introduce CellXpert – a new family of Eppendorf CO₂ incubators and learn more about the CellXpert C170, the basic version of the C170i ...

The CellXpert C170i and C170 are stackable with CO₂ incubators of Thermo Scientific®, PHCbi (former Panasonic) and more with the Universal Stacking Kit

Product features

- > **Easy cleaning:** Seamless chamber, easy disassembly in 40 s
- > **Effective contamination protection:** 140 °C High temperature disinfection (HTD), no internal fan-associated HEPA-filters necessary
- > **Temperature uniformity:** Innovative heating concept with multiple independent temperature sensors – verified at 27 spots inside the incubator according to German DIN 12880 norm

New Brunswick™ S41i

Description

Are you looking for a CO₂ incubator shaker with integrated high temperature disinfection and significantly reduced gas consumption? Make cleaning easy and change CO₂ cylinders less often – with the fanless and stackable New Brunswick™ S41i.

Product features

- > Experimental flexibility: Perforated shelf allows for static incubation at the same time as shaking
- > Stable, uniform and vibration-free shaking: robust Innova triple eccentric drive
- > Saves gas and provides an optimal growing atmosphere: Smart gas control (0.2 - 20% CO₂)

Applications

- > Culturing of suspension cells requiring gentle agitation
- > Protein expression
- > Incubating adherent cells on the shelf included with the unit: adding a 2nd static shelf and using the shaking platform as a 3rd shelf
- > Adherent cells such as stem cells that require both incubation and periodic gentle shaking

Galaxy® 48 R

Description

Small CO₂ incubator – Galaxy® 48 R

Looking for an affordable mid-size to small CO₂ incubator for limited lab space, isolation experiments, quarantine of incoming cell lines during contamination/identity check, or for your personal cell culture workspace? The small CO₂ incubator with high usable volume Galaxy® 48 R from Eppendorf was designed specifically for this.

Nowhere to hide and easily cleaned:
Seamless chamber of Galaxy 48 R

Safety for your cells: Heated viewing window of the Galaxy® 48 R

Product features

- > **Small CO₂ incubator:** Total volume 48 L / 1.7 ft³ with high usable space vs. footprint ratio
- > **Applications:** Limited lab space, small sample numbers, cell line isolation/quarantine, personal workspaces
- > **More usable space inside, small footprint:** No fan inside, two devices stackable

Electronic CO ₂ and O ₂ gas analyzer, 1 piece	P0628-6831

Incubated lab shakers

If the growth atmosphere needs to be controlled (e.g. temperature and photosynthetic light) and medium or high throughput is needed, an incubated lab shaker is necessary. Usually, incubated lab shakers are grouped based on any of the following criteria:

Temperature control:

- > Cooling for a minimum of 4 °C
- > Heating for a maximum of 80 °C

- > Speed range (25 – 500 rpm)
- > Position in the lab (Benchtop, under bench or stackable floor models)
- > Stackability (2- or 3-fold)
- > Capacity and throughput: Vessel type, size and capacity
- > Mode of loading (front vs. top loading)
- > CO₂ control
- > Photosynthetic light

Eppendorf offers incubator shakers for all the criteria above.

Open-air orbital shakers

For shaking in ambient conditions, on the bench, or in a warm or cold room or heated chamber, open-air orbital shakers are used. Eppendorf offers six New Brunswick™ Innova® shaker models designed for reliable 24/7 shaking of flasks up to 6 L (depending on model), microplates and test tubes. Long-term vibration-free shaking at 25 to 500 rpm is supported by a robust cast-iron triple-eccentric counterbalanced lab shaker drive and a solid state, DC brushless motor.

A very versatile open-air lab shaker regarding orbit choice and different vessel types is the Innova 2300. It also offers an optional “quick-change” platform kit for frequent, tool-free platform changes and up to eight Innova 2300 open-air lab shakers can be fitted into a specialized racking system.

Lab Shaker Accessories

Eppendorf offers a wide range of accessories for lab shakers to provide full flexibility for your processes.

Lab shaker platforms

Different lab shaker platforms are available to provide you with the right balance between vessel capacity, vessel type flexibility, handling speed, and regarding necessary shaking speeds:

- > Dedicated platforms
- > Universal platforms
- > Sticky pad platforms

Universal platforms are the best choice when a high degree of vessel type flexibility is needed, e.g. to mix different vessel types and sizes. These platforms come with multiple screwing holes that allow virtually any

combination of lab shaker clamps and other accessories. Dedicated platforms are used when just one flask size will be used and high capacity is needed. Dedicated platforms come complete with clamps installed.

With sticky pad platforms or a sticky pad adapter kit (when using on a universal platform) virtually any vessel type with flat bottom can be attached. Specialized removable and reusable adhesive mats called sticky pads are necessary for this. Sticky pad allows shaking speeds up to 200 - 250 rpm (depending on orbit). For higher speeds, flask clamps are the preferred choice.

Flask clamps for lab shakers

Eppendorf flask clamps for lab shakers are made of a single piece stainless-steel construction (not spot welded or riveted) for added strength and safety. All flask clamps come with coiled wire springs for added safety and stability at higher shaking speeds. Flasks clamps for 2-, 2.8-, 4- and 6 L and

higher volumes come with an extra girdle for added security and noise reduction.

Available clamps for lab shakers:

- > Erlenmeyer flask clamps (10 mL – 6 L)
- > 2.8 L Fernbach flask clamps
- > 2 L Lauber Thomson flask clamps

Test tube racks and microplate racks for lab shakers

Eppendorf offers 18 different racks for various test tubes with diameters between 8 – 30 mm. Racks come with an adjustable angle (to optimize media oxygenation), tube height –support, and are made of stainless-steel with specialized inserts. These inserts help to retain tubes and prevent them from spinning in the shaker rack.

Two different racks for microplates are available: for stacks (three deep-well plates or nine standard plates) or single layers (five plates). In addition, universal lab shaker platforms are also compatible with microplate screening systems like the Duetz System.

Innova® S44i

Description

Do you need a stackable incubator shaker for the highest plasmid or protein yields in a small footprint to quickly reach your ambitious targets? The latest and most advanced incubator shaker from Eppendorf, the Innova S44i, can fit up to twice as many flasks as other shakers in the market and is ready to reliably support current high-yield expression protocols at high speeds, 24/7.

Product features

- > **For higher plasmid or protein yields:** Up to twice as many flasks as other shakers (e.g. 15x/12x 2.5 L UltraYield™ or 39/36x 1 L Erlenmeyer flasks on dedicated/universal platform); 2x/3x stackable
- > **Ready for high-speed expression protocols:** Up to 400 rpm (orbit 25 mm/1 in) in all devices of a triple stack
- > **True control with touch interface:** All setpoints and current values are visible at a glance; Restrict access to change settings with user management

Applications

- > Grow bacteria, yeast, fungus, photosynthetic organisms
- > Plasmid DNA production and protein expression
- > Process optimization and media development
- > Media screening and optimization
- > Seed cultures for bioprocess scale-up
- > Biofuel research
- > Food quality testing

Eppendorf X-Drive: The five eccentric mounting points for the shaker platform are precisely engineered to ensure long-lasting, repeatable performance for years to come. The four shafts in the corners and Balance Master Technology support precise vibration-free shaking on every point of the platform, including the periphery.

Glide up door: saves lab space and makes cleaning easier

All parameters at a glance

The Innova S44i is also available with a photosynthetic LED light bank for the growth of algae or plant cells.

New Brunswick™ Innova® 44/44R

Description

Are you looking for a reliable high-capacity stackable incubator shaker? The Innova 44/44R is one of our most popular shakers – its capacity for flasks up to 5 L in volume, the space-saving glide up door, multistep programming, the reliable Innova triple-eccentric drive, and the cost saving potential (up to \$2300 / 1900€ over ten years because it does not require internal HEPA-filters) make it a smart choice.

Product features

- > **Applicational flexibility:** Accommodates flasks up to 5 L, sticky pad platform for flat bottom vessels, orbits 25 or 51 mm (1 or 2 in), optional: photosynthetic light bank and humidity monitoring
- > **Saves money and lab space:** Up to \$2300 / 1900€ in ten years – no internal HEPA-filter that must be replaced annually for optimal performance, 2x/3x stackable in a small footprint
- > **Reliable 24/7 with high loads:** Innova triple eccentric counterbalanced drive (three weight-supporting shafts; please do not confuse with “triple counterbalanced” drives that usually come with only one weight support), max. load 15.5 kg/34 lb

New Brunswick™ Innova® 43/43R

Description

Are you looking for a large-capacity console incubator shaker for easy handling of large shake flasks? Have a look at the Innova 43 which offers peace of mind 24/7 with the famous heavy-duty Innova triple eccentric drive.

Product features

- > **Applicational flexibility:** Accommodates flasks up to 6 L, sticky pad platform for flat bottom vessels, orbits 25 or 51 mm (1 or 2 in), optional: photosynthetic light bank and humidity monitoring
- > **Saves money:** Up to \$3800 / 3200€ in ten years – no internal HEPA-filter that must be replaced annually for optimal performance
- > **Reliable 24/7 with high loads:** Proven and tested Innova triple eccentric counterbalanced drive (three weight-supporting shafts)

New Brunswick™ Innova® 42/42R

Description

Are you looking for a highly-versatile stackable incubator shaker that comes with Innova reliability? The Innova 42/42R is one of our most popular shakers because of its cleanability, variety of options (like a static cultivation shelf, a culture drawer to protect Agar plates from evaporation, UV germicidal or photosynthetic light), and flexibility of placement in the lab.

Product features

- > **High capacity in a small footprint:** for example, 4x 5 L or 2x 6 L flasks on universal platform; device footprint 4731 cm² /733 in² (63.5 cm/25 in width, 74.5 cm/29.3 in depth)
- > **Ergonomical and safe interface handling:** Top mounted controls and display make bending down unnecessary during handling, avoids accidental parameter changes, and can be reached easily even in a double stack
- > **Easy to clean:** Spill diverter and drainable built-in spill pan with rounded corners protect the drive from accidental spills (can be used as a water reservoir to reduce sample evaporation); airflow UV-germicidal light optional

New Brunswick™ Innova® 40/40R

Description

Do you need a compact benchtop orbital shaker that offers high visibility and quick access to flasks with a volume of up to 3 L? The Innova 40/40R is an easy-to-program orbital shaker that comes with the famous Innova triple eccentric drive to provide 24/7 reliable operation for decades.

Product features

- > Triple-eccentric counterbalanced drive in cast iron housing provides vibration and trouble-free operation for years
- > Compact benchtop model – fits easily on the bench and holds flasks up to 3 L
- > Clear cover allows easy viewing of the cultures and lifts easily to access all samples

New Brunswick™ Excella® E24/E24R

Description

The Excella 24 is a value priced benchtop orbital shaker and the basic version of the Innova 40 – it comes with no programmability, and a simpler shaker drive.

Product features

- > Heavy-duty uniecentric counterbalanced drive provides long life, vibration-free, quiet, and dependable operation
- > Versatile accessory platform (sold separately) accommodates flasks up to 3 L as well as test tube racks and microplate holders
- > User-friendly keypad with simple LED display is clearly visible and easy to use

Open Air Shakers

Description

The New Brunswick open air shakers specifically designed be used at full capacity in a 24/7 environment. A wide variety of platforms, clamps and test tube racks provide for a number of different workstreams. The cast iron triple-eccentric counterbalanced drive is specifically designed to support high-speed applications and heavy workloads – the design has stood the test of time for over 70 years and continues to enable scientists today.

Product features

- > Triple-eccentric counterbalanced drive in cast iron housing provides vibration and trouble-free operation for years
- > Quiet operation provides a favorable work environment
- > Shaking speeds between 25 – 500 rpm (± 1 rpm) provide versatility for culturing a wide range of cell types

New Brunswick™ Innova® 5050/5051 Racking Systems

Description

Save space and stack Innova 2300 open air shakers. Model 5050 consists of a sturdy, stainless-steel rack to hold up to 4 Innova 2300 shakers. Innova 5051 rack extension can be added to support an additional 4 shakers, bringing the total number to 8 Innova 2300 shakers.

Product features

- > Includes electrical strip to power multiple shakers
- > Maximum speed 400 rpm for 2.5 cm (1 in) orbits and 300 rpm for 5.1 cm (2 in) orbits
- > Larger flasks can be accommodated by removing adjustable-height shelves

Bioprocessing

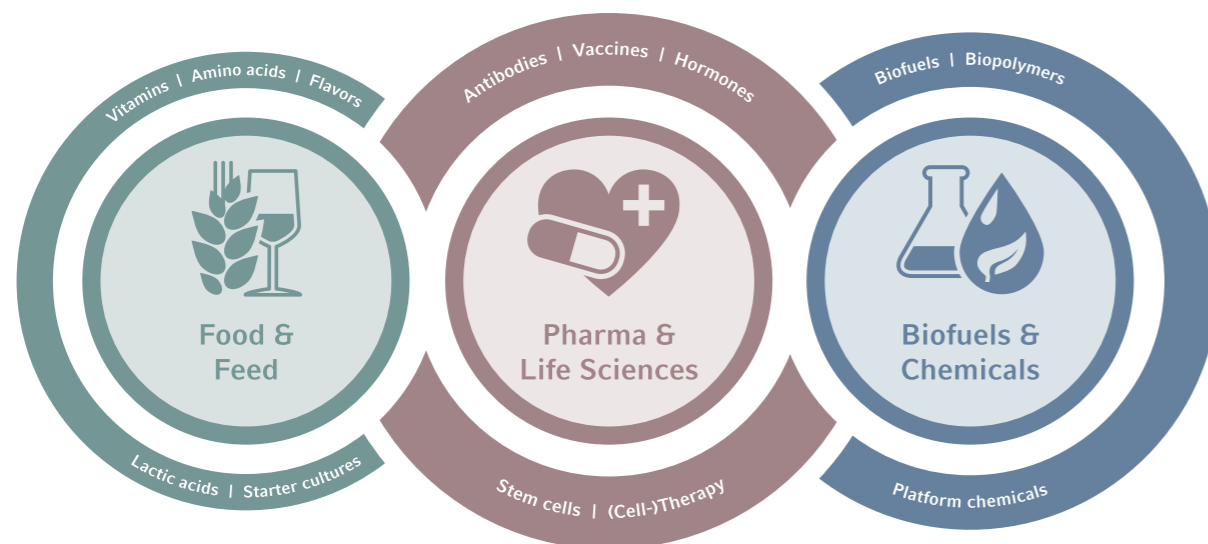

»Heal, fuel, and feed the World.«

Stephen Sherwin

Bioprocess engineers develop and produce a multitude of products and ingredients available today. Their applications are diverse, and the products can be found in pharmaceutical, chemical, and nutrition industries. Stephen Sherwin, former chairman of BIO association put it aptly: "Heal, fuel, and feed the world".

Our Eppendorf bioprocess solutions are successfully used in these industries and in applied research for decades. By exploiting the strong synergies in bioreactor technology and polymer

manufacturing, Eppendorf has emerged as a global player and valuable resource to its customers. With an integrated portfolio comprising software, instruments, consumables, and services, we can satisfy the demands of bioprocess development through production. In that way and in line with our corporate mission, we contribute to the efforts of Eppendorf customers worldwide to improve human living conditions.

Vaccines

Driven by epidemic events and by governmental vaccination programs, there is a rising demand for development of new vaccines. Eppendorf bioprocess equipment helps companies in setting up flexible processes that help balancing costs and shortening time-to-market.

Besides standard impellers, Eppendorf offers specialty impellers which can facilitate perfusion processes: for example our packed-bed impeller. It uses Fibra-Cel® disks as a solid support material for growth of adherent mammalian, animal, and insect cells, when secreted proteins are desired.

Antibodies/Hormones

Improved cultivation techniques such as perfusion and new possibilities in data handling and automation enhance development of antibodies, therapeutic proteins, and active ingredients. Eppendorf offers single-use solutions for small and bench scale cell culture applications. A full portfolio of vessels covers a working volume range of 100 mL - 40 L, offering unmatched scalability. The single-layer polymer design mitigates issues related to leachables and extractables.

From small scale to pilot/production, Eppendorf can provide the bioprocess solution you need.

The SciVario® twin provides full flexibility. With changing in the type of cells or process, the system can easily be adapted to your needs, now and in the future.

The BioFlo® 720 provides a powerful controller with advanced options for pilot/production scale Single-Use processes. Scale Up Assist and Auto Calibrate of DO sensors make it also easy to use!

Stem Cells

Stem cell-based technologies are promising approaches for therapy and drug discovery. For commercialization, researchers are evaluating standardization of their cultures and efficient scale-up. Eppendorf customers rely on our bioprocess solutions for controlled cultivation of induced pluripotent stem cells (iPSCs), mesenchymal stem cells (MSCs), and others.

Researchers at Ncardia®, Netherlands rely on the DASbox® Mini Bioreactor System to develop a process for scaling up their production of iPSC-derived cardiovascular cells.

Find this and more research examples at www.eppendorf.com/stem-cell-bioprocessing

Academic Customers

No matter which area you are doing research in: We understand that universities and other publicly funded institutes are facing special challenges, such as frequently changing staff and often limited budgets. With flexible hardware and intuitive software tools, Eppendorf bioprocess systems support the various stages of discovery – from understanding a metabolic pathway to developing a commercially viable bioprocess. Specialists from Eppendorf will recommend equipment that meets the user's needs and budget.

SciVario® twin

**Description**

The SciVario twin is a next-generation bioprocess controller that evolves together with you. In a fast-changing field like the modern biotechnology, working with a system that supports your needs now – and in the future – is indispensable. With an intuitive user-interface and highly innovative hardware and software it enables flexibility for process optimization and a readiness for the digital age.

Applications

- > Research and development in cell culture and microbiology
- > Lab scale fermentation of aerobic and anaerobic bacteria, yeasts and other or filamentous fungi
- > Cultivation of mammalian and human cell lines
- > Special applications such as biofuel/biopolymer development
- > Media optimization
- > Clone and cell line screening, strain characterization

Product features

- > Customizable and flexible thanks to the innovative bay-drawer concept for further extension & reconfiguration
- > Integrated digital sensor technology (Mettler Toledo ISM® and Hamilton ARC®), supporting analog sensors for pH and DO and optical DO sensors
- > Optional PreSens® optical DO sensor technology for BioBLU Single-Use Bioreactors

SciVario® twin

0.2 – 3.8 L working volume (autoclavable)
0.25 – 40 L working volume (single-use)

- > Variable speed pumps for accurate liquid addition and operation in batch and fed-batch mode
- > Wide range TMFC to allow for individual mixing of air, N₂, O₂, and CO₂ to headspace and/or submerged aeration

- > Parallel operation of two glass and/or BioBLU Single-Use Bioreactors, in any combination of vessel types, independently run or in parallel
- > Suitable for cell culture and microbial fermentation

- > Compact design, 16-40 cm of benchspace needed per vessel
- > Cable management guides for a clean and tidy setup

- > VisioNize® touch: intuitive and exciting new user interface supporting efficient and intelligent process control
- > Compatible with DASware® control software

DASbox® Mini Bioreactor System

DASbox® Mini Bioreactor System
60 – 250 mL working volume (autoclavable)
65 – 250 mL working volume (single-use)

[www.eppendorf.com/
DASbox](http://www.eppendorf.com/DASbox)

Product features

- > 4-fold parallel system expandable to up to 24 vessels
- > Suitable for glass and/or single-use vessels, that can be used in any combination
- > Vessels can be run independently or in parallel
- > Suitable for cell culture and microbial fermentation
- > Compact mini bioreactor system: requires only 7 cm (3 inches) bench space per bioreactor
- > Optimal tool for DoE and scale down approaches
- > Agitation control supporting overhead-driven Rushton, marine-type or pitched blade impellers
- > Innovative liquid-free temperature control system needs no cooling agent supply and supports independent temperature control for each bioreactor
- > Accurate monitoring and control of pH, DO, and level
- > Variable speed pumps for accurate liquid addition and operation in batch, fed-batch, continuous, and cyclic perfusion mode
- > 4 mass flow controllers per bioreactor allow for individual mixing of air, N₂, O₂, and CO₂ to headspace and/or submerged aeration
- > Novel liquid-free Peltier exhaust condenser with easy to handle slide in – slide out activation and deactivation
- > DASware® control Software for advanced process control
- > Compatible with DASware Software Suite for interconnectivity and bioprocess information management

DASGIP® Parallel Bioreactor Systems

DASGIP® Parallel Bioreactor Systems
200 mL - 3.8 L working volume (autoclavable)
250 mL - 1.25 L working volume (single-use)

[www.eppendorf.com/
DASGIP-Parallel](http://www.eppendorf.com/DASGIP-Parallel)

Product features

- > Parallel operation of up to 16 glass or single-use bioreactors
- > DASGIP Bioblock for advanced and user-friendly temperature control
- > Suitable for cell culture, microbial fermentation, and phototrophic cultivation
- > Modular design of control units allows for flexible system configurations that meet the demands of specific applications
- > Control of agitation, pH, level, and DO (including customizable cascade modes) in each bioreactor
- > Variable speed pumps for accurate liquid addition and operation in batch, fed-batch, continuous, and cyclic perfusion mode
- > Optical absorbance measurement for online calculation of e.g. OD₆₀₀ or cell dry weight
- > TMFC individual gas mixing of air, N₂, O₂ and CO₂
- > Online calculation of OTR, CTR and RQ
- > DASware control software for advanced process control
- > Compatible with DASware Software Suite for interconnectivity and bioprocess information management

BioFlo® 120

BioFlo® 120
0.4 – 10.5 L working volume (autoclavable),
0.25 – 40 L working volume (single-use)

[www.eppendorf.com/
BioFlo-120](http://www.eppendorf.com/BioFlo-120)

Product features

- > Flexible software platform for universal control of both microbial and cell culture applications
- > Auto Culture modes offer process control at the touch of a button
- > Compatible with BioBLU® Single-Use Bioreactors for fermentation and cell culture applications
- > Precise temperature control provided through interchangeable heat-blanketed or water-jacketed vessels
- > High precision thermal mass flow controller (TMFC) for automatic gas flow control
- > Automatic gas mix for four independent sparge gas supplies
- > Available analog input/output connection for direct integration of accessories (i.e. scales, variable-speed pumps, etc.)
- > Integrated Mettler Toledo® Intelligent Sensor Management (ISM) platform
- > Compatible with DASware Software Suite or BioCommand for bioprocess information management

BioFlo® 320

BioFlo® 320
0.6 – 10.5 L working volume (autoclavable),
0.25 – 40 L working volume (single-use)

[www.eppendorf.com/
BioFlo-320](http://www.eppendorf.com/BioFlo-320)

Product features

- > Interchangeable autoclavable and BioBLU Single-Use Bioreactors
- > Integrated Mettler Toledo Intelligent Sensor Management (ISM) platform
- > Control up to eight systems from a single user interface
- > Universal control for both microbial and cell culture applications
- > Field-upgradable TMFC drawers for sparge and overlay gas
- > Enhanced software package with new cascade and time profile features
- > Built-in optical pH sensing technology for use with the BioBLU Single-Use Bioreactors
- > DeltaV™ compatibility available through DeltaV Discovery and DeltaV ProPlus PAS
- > Up to six integrated pumps capable of operating in variable-speed mode
- > Eight independently controlled process gas supplies
- > Validation packages available for GMP regulated processes
- > Compatible with DASware Software Suite or BioCommand for bioprocess information management

New Brunswick™ BioFlo®/CelliGen 510

Product features

- > SIP bench and pilot scale reactors designed to meet the needs of R&D through production
- > Modular design allows for complete system flexibility
- > Add or remove components pre- or post-delivery
- > Multiple impeller and gas flow options
- > Integrated skid design with mobile table option to simplify transport
- > Features intuitive RPC control software and touchscreen interface
- > Optional Allen Bradley® PLC
- > Integrated load cell for online vessel volume monitoring
- > Fully automated SIP sequence for sterilization
- > Flush mounted vessel ports for enhanced vessel design and drainability
- > Validation packages available
- > 7 additional analog input/output connections for local integration of ancillary equipment
- > ASME-rated pressure vessel

BioFlo® 510
Bench- and pilot-scale SIP fermentor and bioreactor
10.75 - 32 L working volume

www.eppendorf.com/BioFlo-510

New Brunswick™ BioFlo® 610

Product features

- > Pilot production system without the traditional cost or footprint
- > Modular design allows for complete system flexibility
- > Add or remove components pre- or post-delivery
- > Multiple impeller and gas flow options
- > Integrated mobile skid simplifies transport
- > Features intuitive RPC control software and touchscreen interface
- > Integrated load cell for online vessel volume monitoring
- > Fully automated SIP sequence for sterilization
- > Flush mounted vessel ports for enhanced vessel design and drainability
- > Validation packages available
- > 7 additional analog input/output connections for local integration of ancillary equipment
- > ASME-rated pressure vessel

BioFlo® 610
Pilot Scale SIP Fermentor
16 – 100 L Working Volume

www.eppendorf.com/BioFlo-610

New Brunswick™ BioFlo® Pro

Product features

- > Large scale industrial system supporting operation in accordance to cGMP and GAMP® guidelines
- > Modular design with over a hundred options allows for high level of customization pre and post delivery
- > Multiple impeller and gas flow options
- > NEMA-4 (IP65) rated control cabinet with industry-standard Allen Bradley® PLC
- > Open piping skid allows for easy accessibility
- > Fully automated SIP sequence for sterilization
- > Clean-in-Place (CIP) options available for vessel and piping
- > Flush mounted vessel ports for enhanced vessel design and drainability
- > Validation packages available
- > ASME-rated pressure vessel

www.eppendorf.com/BioFlo-Pro

BioFlo® Pro
Large-scale SIP fermentor
45 – 1,200 L working volume

BioFlo® 720

Product features

- > Compatible with Thermo Scientific™ HyPerforma™ 5:1 bioreactors from 50 L to 2,000 L
- > High performance Mass Flow Controllers capable of up to 500:1 turn-down allowing multiple vessel sizes to be run from the same controller
- > Suitable for analog & digital sensors (Mettler-Toledo® ISM and Hamilton® ARC)
- > Available with dual sparge, overlay and CO₂ stripping options
- > Field-upgradeable options for future expansion of the system
- > Documentation packages available to help qualify the system for use in cGMP environments¹⁾
- > Intuitive software tools such as Auto Calibrate and Auto Inflate reduce preparation time, maximizing system efficiency
- > Integrated Scale Up Assist software simplifies the workflow and calculations necessary to scale up and scale down
- > Flexible choices for SUBs and Bioprocess Containers (BPCs)
- > Mobile enclosure with a small footprint (0.7 m²/7.55 sq ft) fitting through a standard lab door
- > Watson-Marlow peristaltic pumps for flow rates in a range of 1.2 mL/min - 3.3 L/min

¹⁾ BioFlo 720 is not a medical device as defined by the Food and Drug Administration or other regulatory authorities.

BioBLU® Single-Use Bioreactors – Dependability through Proven Design

Single-use simplicity

With renowned polymer expertise, Eppendorf is proud to offer the largest portfolio of rigid walled stirred-tank single-use bioreactors – in small and bench scale, to be operated with parallel DASbox Mini Bioreactor System, DASGIP Parallel Bioreactor Systems, SciVario twin or BioFlo bench-scale systems.

BioBLU c Single-Use Bioreactors for cell culture applications

Single-use solutions for small and bench scale cell culture applications. A full portfolio of vessels covers a working volume range of 100 mL – 40 L, offering unmatched scalability. The single-layer polymer design mitigates issues related to leachables and extractables.

BioBLU 5p Single-Use Bioreactor with packed bed

For the cultivation of adherent cells and for perfusion processes we offer the BioBLU 5p packed-bed bioreactor. It utilizes the proprietary Eppendorf packed-bed impeller design and is pre-loaded with Fibra-Cel® disks. Providing a shear-free environment, it is a premium choice in a wide variety of applications, including the production of secreted products and stem cell culture.

BioBLU f Single-Use Bioreactors for microbial applications

Single-use solutions for small and bench scale fermentation applications, covering a working volume range of 65 mL – 3.75 L. Fermentation processes have high mass transfer and heat removal requirements. Proven stirred-tank design, powerful overhead drives featuring Rushton-type impellers, and effective cooling make it possible for the BioBLU f Bioreactors to achieve these demands.

Eppendorf Bioprocess Software – Much More Than Just Bioprocess Control

Eppendorf offers BioCommand and DASware control Supervisory Control and Data Acquisition (SCADA) software packages for advanced bioprocess control. The comprehensive DASware software suite provides next-generation bioprocess management.

DASware software suite

Next-generation bioprocess management

A suite of smart and flexible software solutions to accelerate bioprocess development, with DASware control for parallel bioprocess control. The DASware licences enable interconnectivity of bioreactors with external lab-devices, comprehensive data- and information management, Design of Experiments (DoE) and remote control of bioprocesses. DASware can be used with any Eppendorf benchtop bioreactor solution.

DASware control

> Advanced process monitoring, control, and data logging - for parallel cultivation with individual control of each bioreactor

DASware connect

> Integration into process control systems and legacy corporate historians facilitating company-wide access to all relevant bioprocess data

DASware design

> Applies the Design of Experiments (DoE) concept via a full factorial DoE builder or by importing DoE designs from third-party DoE tools

DASware analyze

> Seamless integration of external lab devices to the bioreactor allows for process automation and feedback control loops

DASware discover

> A comprehensive and user-friendly information management solution for bioprocessing

BioCommand software

> The ability to monitor, control, and log data from your fermentation and cell culture processes. Three distinct packages provide the tools needed for research, optimization, and if needed, the security and audit trails to support your regulatory requirements.

epServices
for premium performance

Supporting You for 75 Years

Eppendorf Services

Eppendorf began in 1945 as a medical instrument repair workshop on the grounds of the University Hospital Eppendorf in Hamburg, Germany. Today, more than 500 factory-trained and certified service specialists across the world provide in-house or on-site service solutions, ensuring reliable uptime and providing peace of mind regarding regulatory compliance and the quality of your results.

Application and Training Services

Keep pace with new trends, methods and technologies by receiving training and application support from our global team of scientific product and application specialists. Acquire basic knowledge, or develop more advanced skills needed for your workflows and routine maintenance within scientific research, healthcare and industry.

Our dedicated Applications and Technical Service teams are here to support you!

Get all information about the Eppendorf epServices portfolio!
www.eppendorf.com/epServices

Your Needs - Our Solutions

From service agreements to on-demand services, Eppendorf has you covered. Choose the options that best suits your uptime requirements and budgetary needs, while ensuring national and international compliance to all relevant norms and regulations.

We take care of your equipment during its full life cycle in your lab, so you can concentrate on achieving the reliable results you need in your research and routine lab work.

Pipette Service Done Right

Since we released the first piston stroke pipette in 1961, we continue to manufacture and service pipettes with a passion for improving user results. Our highly qualified technicians go through an intensive training and must pass rigorous exams to become certified before servicing pipettes. We maintain over 5000 pipette manufacturer specifications and conform to the manufacturer standard when their specifications are tighter than ISO 8655 standards, if requested. In our major markets, ISO 17025 accredited calibration processes are available. As your liquid handling expert partner, we can help you meet your regulatory needs.

Your Instruments - Our Services

How much effort does it cost you to take good care of your lab instruments to ensure valuable uptime, and prove that they are delivering reproducible results? For your peace of mind, we offer a comprehensive service portfolio, so you can be assured of reliable and optimal working equipment in compliance with regulatory requirements. Trust in Eppendorf as your service partner.

Knowledge Base

Various Application Notes, Short Protocols, FAQs, and videos are available on our website.

Simplify Your Service Processes

We accompany you every step of the way - from the installation and maintenance of your lab instrument or software to the support for your quality and regulatory audits.

Choose from the following service options:

- > Service agreements from cost-efficient to all-inclusive care packages for an easy service process
- > On-demand service solutions for individual service needs

Our Service Agreements - Your Advantages

With our basket of Service Agreement solutions we take the load off your shoulders by simplifying your ordering and budgeting process for various services saving you costs by:

- > Assuring continuous productivity
- > Maintenance for a long service life
- > Including repair costs - fully or partially
- > Discounting on additional services

Benefit from assured premium performance for your peace of mind!

Eppendorf Service Agreements

Services Agreement	AdvancedCare	PremiumCare
Full preventive maintenance	For assured instrument reliability and uptime 1/year	For assured instrument reliability, uptime and financial plannability 1/year
Software update (during annual maintenance, if applicable)	■	■
Priority support ¹⁾	■	■
Parts, labor, travel on repairs	20 % discount	included
Discount on additional services (e.g. IQ/OQ)	10 %	10 %

¹⁾ Subject to local business conditions, and based on a "best effort" practise. For more information please contact your local service organization.

Extended Warranty Agreements

For your peace of mind, we offer Extended Warranty agreements covering all repair costs and optional maintenance after the standard warranty period.

Services Agreement	Extended Warranty	Extended Warranty plus
Full preventive maintenance	Purchased one time within the standard warranty period. Valid for one year following the standard warranty period.	Purchased within the standard warranty period. Valid following the standard warranty period.
Software update (during annual maintenance, if applicable)	-	1/year
Priority support ¹⁾	-	■

Discount on additional services (e.g. IQ/OQ)	-	10 %

¹⁾ Subject to local business conditions, and based on a "best effort" practise. For more information please contact your local service organization.

Installation Service

The installation of your Eppendorf instrument and software will be performed by our manufacturer trained and experienced service technicians. They will support you with the correct instrument settings in your environment, and will provide the initial operational instructions.

Qualification Services

Installation Qualification and Operational Qualification Services GxP compliant

Are you working in a regulated environment? We now offer specifically created and revised Installation Qualification and Operational Qualification services including GxP compliant documentation. These documents support the complex GxP standards and regulations reducing your administrative

workload, and provide you with qualified assurance that your instrument is installed and is operating in accordance with manufacturers' specifications.

Be prepared for your internal and external audits with our GxP supporting documentation!

Installation Qualification & Operational Qualification Services	IQ/OQ GxP	OQ GxP
Check of delivery status, and installation environment	■	
Installation incl. configuration and functional checks	■	
Detailed IQ report	■	
Test of alarm functions	■	■
Verification of instrument parameters (e.g. temperature, speed)	■	■
Detailed OQ report	■	■
Handling of deviation list	■	■
Signed approval by customer and service technician	■	■

Maintenance Services

Preventive Maintenance Services

How much do you rely on keeping your instrument in good working order? Our professional cleaning and maintenance services are aimed at the prevention of unexpected downtimes and failures by early detection of problems. Keeping your instrument in perfect working order will not only extend their service life, but also increase your productivity.

Services include:

- > Cleaning (external and internal)
- > Maintenance
- > Exchange of wear and tear parts
- > Comprehensive functional check
- > Software updates
- > Evaluation of stored data
- > Documentation
- > Dated service sticker to confirm Eppendorf Service

Ensure reliability and save your resources!

Calibration Services

Calibration and Verification Services

Assuring the precision and accuracy of your instrument is maintained according to specifications is your first step to reliable results.

Eppendorf offers calibration, verification and adjustment services for:

- > epMotion® 5073/5075 (temperature, speed)
- > Centrifuges (time, speed, temperature)
- > Thermocycler (temperature)
- > Biological Shaker (speed, temperature)
- > CO₂ Incubator (temperature, CO₂, O₂, rH)
- > ULT Freezer (temperature)
- > Photometry (wavelength, temperature i.a.)
- > Temperature control- & Mixing instruments (temperature)

Repair Service

For the most productive long life and highest uptime of your Eppendorf instrument, we can provide complete and thorough technical support. Our qualified service staff

ensure timely and accurate resolutions are provided with professional guidance and care worldwide. For any technical support please contact your local service organization.

Application Support

You can expect the highest standards of support for your products and applications from Eppendorf. Our highly trained

scientific support staff is available in all time zones to assist you with any questions concerning our products.

Training Webinar

The Eppendorf Training Center has been providing high-quality webinars and training courses since 1997 at various locations and in several languages. Contents are constantly being updated to always include the latest insights into the scientific fields. We work with small groups to ensure optimal attention and sufficient hands-on time for our participants.

Download your decontamination form to return goods:

Pipette Calibration Service

Preventive Maintenance, Calibration and Adjustment Services

Pipettes are precision instruments with parts subject to normal wear and tear leading to imprecision over the time. Therefore, regular maintenance and calibration are fundamental to their precision and accuracy. Calibration services performed by highly trained and certified Eppendorf Calibration Service Technicians build the foundation of your reliable and reproducible results with your downstream applications.

Our newly, clearly designed calibration service portfolio includes a thorough check of the pipette internally and externally, ensuring that wearable parts like O-rings are replaced in a timely manner.

We offer a range of transparent and modular service options

- > We maintain every pipette's conformity according to ISO 8655
- > ISO 17025 accredited certification in 19 countries

ISO 8655

ISO 8655 lays out the standard criteria by which a pipette should be calibrated and what error limits should be used at each volume. ISO 8655 criteria includes measurements at 3 volumes, 10 measurements at each volume, and controls for room environment.

Manufacturer Standard

In addition to ISO 8655 specifications, many manufacturers make pipettes that work within a tighter set of error limits than required by ISO 8655. It is important to calibrate using manufacturer error limits to ensure the pipette works according to manufacturer specifications.

ISO 17025

The ISO 17025 accreditation certifies the high level of competence and compliance with strict quality rules. ISO 17025 criteria include a traceability chain for measurement equipment, measurement uncertainty values, and approved quality standards.

We ensure our stringent and validated procedures are followed to the highest standards possible, for Eppendorf and other brand pipettes.

epMotion® 96 Service

epMotion 96 Service

The Eppendorf epMotion 96 is a semi-automated electronic pipette system for fast and precise parallel 96-channel microplate processing. The reliability of the electronic parallel pipetting system movement is the prerequisite for high precision and reproducibility of the results across the whole 96- or 384- well plate. Maintaining and verifying your system's accuracy and precision on a regular basis is thus highly recommended to make sure your system still dispenses according to the specification.

Preventive Maintenance services include:

- > Cleaning and lubrication of dispensing head
- > Checking and exchanging of 96 O-rings from cones
- > Software/firmware update if applicable
- > Leak Test (50 µL + 300 µL)
- > Gravimetric Test - systematic error (50 µL + 300 µL) - Photometric Test - random error (2 volumes)
- > Service check list
- > Dated service sticker to confirm Eppendorf Service
- > Calibration Report

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. volume)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

96 x confidence by verified performance!

epMotion® Service

epMotion Service

epMotion and its dispensing tools are precision instruments. As such, they should be regularly maintained and calibrated to ensure continuing high accuracy, precision and reproducibility.

Preventive Maintenance services include:

- > Cleaning (external and internal)
- > Maintenance, instrument calibration software update
- > Exchange of CAN bus cables/O-rings of dispensing tools
- > Comprehensive functional check
- > Evaluation of stored data
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Calibration services for dispensing tools

How do you know that your experimental data are correct? Your first step to reliable results is to ensure your dispensing tools are calibrated based on ISO 8655, assuring the:

- > Accuracy and precision of the dispensing tool
- > Reproducibility of the dispensed volumes
- > Optimization of sample yields

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. temperature, vacuum, speed, volume)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Keep your process in motion with regular maintenance and calibration services!

epMotion® Application Implementation

Automated Pipetting – Difficult Application?

Are you having trouble with a protocol or are not sure how to optimize your automated application? We are happy to advise and assist you with your application. Eppendorf offers various application support services for epMotion users with low to high throughput experiments. Our network of highly skilled and extensively trained In-Field Automation Specialists are available for comprehensive application training and support after installation of your epMotion as well as during the setup of your own advanced methods.

Application Implementation

Eppendorf will provide the on-site support to program your epMotion methods for a single application as well as optimize all liquid classes needed for the application to the best of the instrument's capability. An initial in-house feasibility test is performed. Upon completion of the method on the customer's epMotion, the application will be approved by the user. Optimization to the maximum level of performance!

For your next level of performance!

Your advantages

- > Well trained Application Specialist will get you started with your methods in less time than without professional help
- > Approved reliability of your programmed method
- > Shortening your protocol setup times and reducing your personnel costs
- > Reducing waste of valuable samples
- > Improving productivity with optimized utilization of the deck capacities and the operation of the system

**All systems go -
At all times

Centrifuge Service

Centrifuge Service

Regular service of centrifuges and rotors in either an operational or a disassembled state ensures a safe working environment. Functional inspections assure that all manufacturer specifications are met.

Preventive Maintenance services include:

- > Cleaning of external and internal parts
- > Checking of
 - > stability, housing, lid latch, display and keypad
 - > temperature sensors and speed sensor
 - > rotor and imbalance detection
- > Software update, if required
- > System test run
- > Evaluation of stored data
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Relax while your samples are spinning safely!

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (temperature, speed)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Rotor Assurance Plans

Rotors and buckets are subject to normal wear and tear during regular operation. Microscopic cracks can be detected early during a qualified inspection, which will allow the rotor to be exchanged before serious damage has occurred. If none or very few surface changes are identified, the rotor can be used according to instructions.

Service for our High-Speed Floorstanding and Ultracentrifuges is now available by Eppendorf (including former Himac Centrifuges). See pages 318 - 319.

Mastercycler® Service

Mastercycler Service

Your cycler should be regularly maintained, and followed by a temperature verification. The exact adherence to defined temperatures is crucial for reproducible results.

Preventive Maintenance services include:

- > Cleaning of external and internal parts
- > Checking of
 - > housing, accessories and internal parts
 - > electrical connection (incl. mains power)
 - > LED, display and keyboard, touchscreen
 - > USB-interface
 - > thermoblock
 - > heated lid
 - > fan(s)
- > Software update if required
- > Verification of temperature
- > Evaluation of stored data
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Keep operating – with absolute confidence

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. temperature)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Temperature verification services

Temperature verification of selected well positions and adjustment of the cycler block temperature if necessary is highly recommended to assure instrument consistency and accuracy. The temperature verification from Eppendorf is a very accurate and precise method, meeting all documentation and detection requirements in the lab.

ULT Freezer Service

ULT Freezer Service

Reliable and efficient performance can be expected for years of smooth operation from any of our ULT Freezers. Our services are designed to check, validate, and promote reliable freezer performance according to specifications.

Preventive Maintenance services include:

- > Cleaning and inspection of air filter, heated vent/condenser
- > Checking of
 - > environment, electrical supply and fittings
 - > CO₂ /LN₂ backup system
 - > independent temperature monitoring system
 - > compressor operating temperature
 - > condition and function of inner door/lids, cooling fan
 - > motor, bearings, blades, insulation, accessible cooling
 - > circuit pipes, and accessible electrical wiring
- > Operation of
 - > freezer lid gas strut (chest freezer)
 - > display and function keys
 - > chamber temperature sensors and alarm
 - > RS232/RS485 communication port
- > Alignment of door handle/sealing of outer door (upright freezer)
- > Verification and adjustment of operating parameters
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Protect your priceless samples!

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. temperature)
- > Basic IQ/OQ report

Multi-Temperature Mapping for Ultra-Low Temperature Upright Freezer

Regular verification with the help of an external, calibrated multi-channel temperature verification system inside your ULT freezer provides you with security of reliable long-term sample storage.

Our factory-trained and certified service technician will perform an on-site temperature mapping study including a full report stating:

- > Minimum, maximum and average temperature of each location
- > Full log of raw data of each measurement
- > Temperature profile graphic for duration of measuring period
- > All relevant calibration certificates

Norms, standards and best practices such as ISPE-Controlled Temperature Chamber Mapping and Monitoring, IEC 60068 - Environmental testing, or Vaisala – 5 Rules of Sensor Placement in Validation/Mapping Applications recommend a temperature mapping of 9 or 15 probes after installation, and subsequently every two years, or when changes are made to the system.

A probe holder system (9 and 15 probes) is used to ensure comparable results between different measurements and units

Your advantages

- > 24 hours, 365 days a year reliable storage for temperature-sensitive samples
- > Comparable annual temperature distribution results in one or multiple freezers
- > Audit proof documentation

This service is only available in selected countries. Please contact your local Eppendorf service organization for further information.

Example of a Multi-Temperature Mapping with 9 probes inside an ULT upright freezer

CO₂ Incubator Service

CO₂ Incubator Service

CO₂ incubators feature complex, dynamic control systems to maintain user-defined culturing parameters for optimized cell growth and proliferation. To ensure reproducible results and to protect your precious cultures from undesirable variables, we check and validate your incubator performance.

Preventive Maintenance services include:

- > Checking of
 - > installation environment
 - > electrical/gas supply and fittings
 - > door seals and door hinges
 - > all chamber gas, temperature, humidity sensors
 - > security of incubator shelf and racking systems
 - > sensor covers
 - > humidity trays
 - > wiring system, PCB's, display, and controller
- > Testing of alarm functions
- > Replace in-line gas filter(s) and auto-zero filter
- > Validation/adjustment of operating parameters within specifications
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Qualification service include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. temperature, CO₂, speed, alarm)
- > Basic IQ/OQ report

For CellXpert®:

- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Our service culture for peace of mind!

S41i Incubator Shaker Service

S41i Incubator Shaker Service

The versatility of the S41i Incubator Shaker supports simultaneous culture of adherent and suspension cultures. The smallest deviations in the culturing environment can result in undesirable outcomes. To ensure reproducible results and to protect your precious cultures from undesirable variables, we offer a range of maintenance and qualification services.

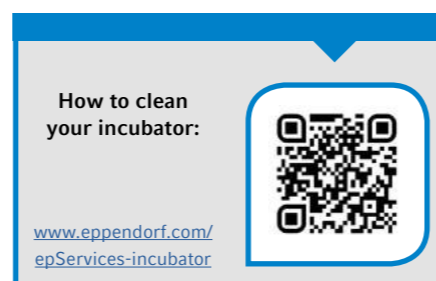

Preventive Maintenance services include

- > Checking of
 - > electrical/gas supply and fittings
 - > chamber CO₂, temperature sensors
 - > security of shaker platform(s) and flask holders
 - > security of incubator shelf and racking systems
 - > humidity trays
 - > shaker drive belt
 - > platform support boot seals
- > Replace
 - > in-line CO₂ filter and auto-zero filter
- > Validation/adjustment of operating parameters within specifications
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. temperature, CO₂, speed, alarm)
- > Basic IQ/OQ report

Achieve reliable culturing results with optimized performance of incubating and shaking systems!

Biological Shaker Service

Biological Shaker Service

Biological shakers are required to be in continuous use for years. Small and short term variations in shaker operation can influence culturing outcomes, with negative effects on yields and/or cell expression. Ensure consistent, reliable shaker performance with our shaker services.

Preventive Maintenance services include:

- > Cleaning of condenser
- > Lubricate non-sealed shaker bearings, as appropriate
- > Checking of
 - > installation environment
 - > electrical/gas supply and fittings
 - > any door/lid open sensors
 - > security of doors/lids, handles, door struts and hinges
 - > security of shaker mechanism
 - > shaker drive motor, and circulation fan
 - > shaker drive belt; adjust belt tension as necessary
- > Validation/adjustment of operating parameters within specifications
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. rpm, temperature, alarms)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Care for your shaker – optimize your cultures!

Photometry Service

Photometry Service

To optimize photometric and fluorometric precision, accuracy, and linearity, your instrument should be routinely checked and adjusted by a qualified Eppendorf Service Technician.

Preventive Maintenance services include:

- > Cleaning of housing and cuvette shaft
- > Checking of
 - > housing (incl. stability) and cuvette shaft
 - > internal parts, light path, keyboard, display
 - > printer output and USB port
- > Software update
- > Setting number of flashes
- > dsDNA Test - 260 nm (Biophotometer plus)
- > Self Test (Biospectrometer/Biophotometer D30)
- > Photometer Test (wavelength systematic error/precision and photometric accuracy/fluorescence)
- > Temperature verification/adjustment
- > Evaluation of stored data
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. wavelength, temperature)
- > Detailed IQ/OQ report

Stay tuned to the right wavelength!

Photometer Test

You are also able to verify photometric and wavelength accuracy and the respective precision using the Secondary UV-VIS Filter Set. In the event your instrument does not conform to specifications, you must have it checked and properly adjusted by a trained service technician. The filter sets themselves must be inspected every two years as their spectral properties can change over time. Your filter set must be tested, maintained and certified directly by the manufacturer at Eppendorf's plant.

Check how to clean and maintain your Eppendorf μ Cuvette

[www.eppendorf.com/epServices- \$\mu\$ Cuvette](http://www.eppendorf.com/epServices-μCuvette)

Temperature Control and Mixing Service

Temperature Control and Mixing Service

Slight deviations in temperature and mixing frequency of your samples can affect their reaction conditions leading to non-reproducible results. To guarantee you the precise function of the instrument we offer manufacturer designed maintenance and qualification services.

Preventive Maintenance services include:

- > Cleaning of housing, accessories, internal parts
- > Checking of
 - > housing, plate holder, accessories, internal parts
 - > electrical connection
- > Function checking of
 - > LED, display and keyboard
 - > vortex sensor
 - > overload protection
 - > detection of ThermoTop, SmartBlock, thermoblock
 - > mixing, heating, cooling, vortexing
 - > fans
- > Evaluation of stored data
- > Service check list
- > Dated service sticker to confirm Eppendorf Service

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. heating, cooling, mixing, vortexing, timer)
- > Detailed IQ/OQ report
- > Handling of deviation list/management
- > Signed approval by customer and service technician

Temperature Verification

Temperature verification of selected well positions is highly recommended to assure instrument consistency and accuracy.

Care for your samples with our mix of services!

Cell Manipulation Service

Cell Manipulation Service

Our entire application and service team demonstrates a passion for helping you achieve success with your cell manipulation work. We will ensure that your instruments are in good working condition by professional maintenance and qualification service including the exchange of parts due to wear and tear.

Preventive Maintenance services include:

- > Cleaning of housing, internal assemblies
- > Checking of
 - > stability
 - > keyboard, display
 - > leak-tightness (CellTram[®]/FemtoJet[®])
 - > contacts (Electroporator)
- > Exchange of oil (CellTram[®] Oil/vario)
- > Software upgrade
- > Testing of motor module (Micromanipulator)
- > Testing of system
- > Analysis of error statistics
- > Service check list
- > Dated service sticker to confirm Eppendorf service

Qualification services include:

- > Checking of
 - > delivery status, and environment
 - > installation incl. configuration and functions
- > Testing of alarm functions
- > Verification of instrument parameters (e.g. motor)
- > Basic IQ/OQ report

Getting to the heart of your cells with precise and accurate instruments and services from Eppendorf!

Service and Support for High-Speed Centrifuges and Ultracentrifuges

High-Speed centrifuges

Ultracentrifuges

High-Speed Centrifuge and Ultracentrifuge Service

High-Speed and Ultracentrifuges are now supported by Eppendorf. Our qualified staff ensures timely and accurate solutions are provided with professional guidance and care. Maintain and qualify your laboratory instruments on a regular basis with our service agreement options and on-demand services for many years of productive and reliable operation. See page 136 for more detailed information.

Save time by ensuring uptime and reproducible results!

Agreement	AdvancedCare	PremiumCare	1 Year Extended Warranty ¹⁾	1 Year Extended Warranty plus ²⁾

Bioprocess Performance Plans

Bioprocess Performance Plans

Bioprocess systems include several sophisticated technologies. Peak performance requires smooth interplay of the subsystems and fully functioning consumable parts. Regular maintenance by qualified engineers helps to ensure reliable operation, while deferring it can cause unreliable results, expensive repairs, and prolonged downtime. Eppendorf Bioprocess Performance Plans help you to maintain the optimal performance of your equipment over years of frequent use.

Download the bioprocess catalog

www.eppendorf.com/catalog

You will find details and ordering information for all Bioprocess Performance Plans in the Bioprocess Catalog 2022!

Order Numbers for Different Mains Voltage Versions

The following products are available in the listed mains voltage versions. For mains voltage versions for which no separate order number is listed, the valid order numbers

are also those listed in the first column or in the product description. The versions marked n.a. are not available. Order-related production is marked with *

Declaration:
