

Be Confident in Performance

Get connected to VisioNize® Lab Suite

How do you manage and track routine tasks or common maintenance cycles of your centrifuges? Are you planning your upcoming experiment and would like to book the serviced centrifuge in advance?

Optimize your processes and enhance your productivity by connecting your centrifuges to the VisioNize Lab Suite. The Eppendorf digital platform helps you to establish productive user habits in your lab and relieve you from the burdens of daily routines.

Real-Time Monitoring

Monitor your centrifugation run from anywhere and track the parameters, e.g. time, temperature, and speed

Task Management

Plan and assign device-related tasks, e.g. centrifuge maintenance to ensure optimal device performance. Tasks can be tracked retrospectively via Task History

Device Connectivity

Connect and monitor your Eppendorf centrifuges with the VisioNize box*. Up to three instruments can be connected for free**

Easy Data Access

Export parameter, event data and any user interactions

* The VisioNize box is required for the Eppendorf Centrifuge 5910 R, 5424 R, 5425, 5425 R and 5427 R.
 ** Additional device require extra device licences. Hardware and software upgrades are not included.

Alarm Management

Track all alarm acknowledgements with time-stamped data logs

Instant Notifications

Receive alarm or event notifications, e.g. program stops, user interventions or imbalance errors to react quickly

Response-Based Alarm Escalation

Define escalation schemes to individual or multiple recipient groups based on lab presence

Lab Equipment Booking

Check the availability and book a centrifuge prior experimentation. Booking details are shown on the device display and the last bookings can also be tracked on the device

Connect up to three centrifuges for free!
