

Efficiency Meets Fidelity

SafeCode Barcoded Plates

»Keep it Scanned, Keep it Safe.«

Plates are integral to the workflow in your laboratory. Your samples and assets depend on vessels that will not let you down. But this goes beyond construction and ergonomics; you need vessels that will stand up to abuse and scrutiny of everyday labors and long-term storage. SafeCode barcoded plates are your solution to those »little problems« that transform into major issues.

Take advantage of reliable sample ID and safe sample inventory databases.

Documentation of every step required?

- > Pre-labeled off-the-shelf consumables for immediate use
- > Reliable long-term labels for safe sample ID
- > Have all relevant experimental data accessible for easy documentation

Require reliability?

- > Eppendorf has been manufacturing sample vessels for decades and now your favorite plates just got better
- > All the dependability of Eppendorf meets the added security of digitalization

The screenshot shows the eLabInventory software interface. On the left is a 'Navigation' pane with a tree view of storage units: -20 freezer, -80 freezer Archive, -80 Freezer I, tower A (expanded to show box 1, box 2, box 3, box 4), tower B, tower C, tower D, Cell line freezer, Fermentator, Media Shelf, N2-Vet, Plasmid collection, and Safety Cabinet big lab. Below this is a 'Legend' with color-coded icons for Antibody (blue), Cell Line (red), Chemical (green), Compartment cell (orange), Custom Sample Type (yellow), and Demo Sample Type (grey). The main area displays 'My Lab - 80 Freezer I - tower A - box 1' with a 'List View' and 'Box View' toggle. The 'Box View' shows a 9x9 grid (A-I, 1-9) representing the plate layout. Each cell in the grid contains a colored circle with a number, corresponding to the legend. For example, cell A1 is blue with '1.1', cell B2 is red with '2.2', and cell C3 is green with '3.3'.

Lost in samples and processes?

- > Barcode reading for safe sample identification
- > Easy sample management with eLabInventory software
- > Reliable process documentation with eLabJournal software

Eppendorf plates

- > Made of high-quality, virgin polypropylene (PP) free of biocides, plasticizers, and latex
- > Produced with optimized, highly polished molds without the use of slip agents like oleamide, erucamide, or stearamide
- > Designed and manufactured under ISO 13485 and ISO 9001 certified Quality Management System

Clearly Coded

Eppendorf SafeCode system

»Vessels must be labeled« – naturally, every lab member agrees. In reality you often find vessels in your laboratory without any labeling or with non-readable labeling. Clear labeling is recommended to make reading as easy and as reliable as possible for everyone. Printed labels on vessels in plain writing are the bare minimum for reliable reading. Barcodes or 2D datamatrix codes are one step further towards a fast and safe sample identification.

- > Pre-labeled barcoded plates with 3-level-coding in different formats enable you to improve your processes
- > Benefit from digitalization at Eppendorf: download all relevant, ID-specific documentation for your plate, like certificates, drawings, lot numbers, and supplier order numbers using the Eppendorf DataPort on www.eppendorf.com
- > For even more convenience: manage your barcoded vessel and your sample with sample management software like eLabInventory or eLabJournal

Smart labeling of your high-value samples is crucial for safe identification and ultimately for safe results.

Eppendorf DataPort

Do your auditors and Q-departments insist on transparency and comprehensive documentation? Crucial data about your vessels, like **Lot Number**, **Order Number**, **Certificates**, etc., are available via the **DataPort on the Eppendorf website**. Download comprehensive data sets - sorted by lot numbers - for import into your database or use the automatic integration in eLabInventory or eLabJournal.

eLabInventory

Digitize your sample storage with eLabInventory

- > Stores any type of samples, specimens, and materials for high flexibility
- > Intuitive user interface includes visual inventory browsing for easy handling
- > Barcode labeling and scanning for high-throughput
- > Fully customizable data records for samples, storage locations, and equipment
- > Import/export to other formats for data flexibility
- > Documentation security features to support 21 CFR part 11 compliance
