Certificate of Quality

Eppendorf Serological Pipets

Eppendorf Serological Pipets are developed and manufactured according to ISO 9001. Production Eppendorf Serological Pipets takes place in a controlled class 8 clean room environment according to ISO 14644-1.

The raw material used to produce the Eppendorf Serological Pipets complies with USP Class VI standards. Eppendorf confirms that Eppendorf Serological Pipets and the packaging materials comply to REACH regulation of the European Union EC No 1907/2006.

Material suppliers do not use or intentionally incorporate the following agents into the materials used for the production of Eppendorf Serological Pipets:

- Slip agents (including oleamide, erucamide, stearamides)
- Biocides (including di(2-hydroxyethyl)methyldodecylammonium salts (DiHEMDA))
- Plasticizers (including phthalates)
- Bisphenol A
- Latex

Eppendorf Serological Pipets have been tested for in-vitro cytotoxicity according to ISO 10993-5 and show no cytotoxicity.

For certification of absence of detectable DNA, DNase & RNase, and pyrogens as well as for sterilization, please refer to lot specific certificates of the respective product.

The Eppendorf Quality Management System is certified according to ISO 9001/13485/14001. This converts for our customers to a constantly high and reliable quality of products and processes covering the complete product life time.
