

OEM – Trust our expertise

1-K Deepwell Plate

Eppendorf OEM: Bringing Innovation to Customization

Are you looking for deepwell plates that you can personalize with your brand name?
Or color-code for the various stages of your workflow?

Look no further: Our new **1-K Deepwell Plate 96/2000 μ L** brings all of these features together in one solution. Enhance your processes with our new customizable, cost-effective one-component deepwell plate.

Main product features

Quality design

Experience dependability, stability and reliability for optimal performance and sample safety.

Customization in mind

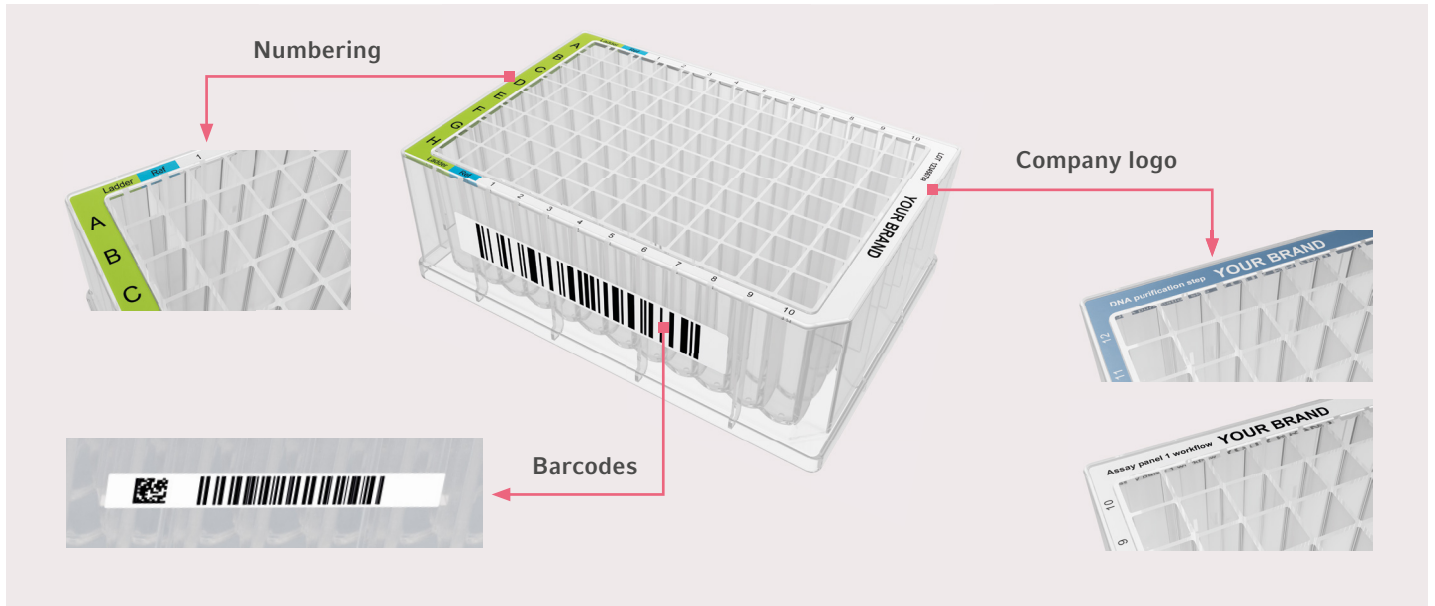

Add your brand logo, workflow identifiers, barcoding or color patterns. Packaging and purity levels are also available to meet your requirements.

Robust ink printing technology*

Our ink printing and chemical stabilization process ensures stability of custom markings without compromising product integrity and sample safety.

*It might get dissolved in some rare customer applications.

Deepwell Plates (96/2000 μ L) molded from one single component and printed from top with colored frames laser engraved / printed information, e.g.
