

Change notification: Article numbers for mechanical pipettes and pipette tips in South East Asia

Dear customers and partners,

Today, we want to inform you about upcoming changes in our liquid handling product portfolio.

New set of article numbers for mechanical pipettes and selected pipette tips

In order to have the same article number for all Eppendorf pipettes and pipette tips worldwide, the order numbers for mechanical pipettes and pipette tips will need to change in some countries. The article number change affects the South East Asia region from January 2022.

No change of form, fit, function

The article number change will have no effect on the products. The affected pipettes and pipette tips will remain technically identical and will be manufactured with the same premium quality our customers are accustomed to and expect from us. Eppendorf will continue to operate under an ISO 9001/ISO 13485 certified QM system.

Products affected & transition to new article numbers

The following product variants are affected:

- **Pipettes:** Eppendorf Research® plus, Eppendorf Reference® 2
- **Pipette tips:** epT.I.P.S.® Box, epT.I.P.S.® Set, epT.I.P.S.® Racks, epT.I.P.S.® Singles, epT.I.P.S.® Reloads, ep Dualfilter T.I.P.S.® SealMax, epT.I.P.S.® 384 Box, epT.I.P.S.® 384 Reloads

Please see the enclosed table for a full cross reference guide with all article numbers affected and their respective replacement numbers. Only the numbers listed will be changed, all other Eppendorf article numbers will remain the same. Please note that some products may have already been changed to the new order numbers in your market since 2018.

The transition to the new article numbers will happen from 01 January 2022. Please only use the new article numbers from then for ordering from Eppendorf. During a transition period, we will run down the stocks of pipettes and pipette tips with old article numbers. As a result, you may receive a mixture of pipettes and pipette tips with old and new article numbers.
