

# Eppendorf Certificate

## Certificate of Quality

### Eppendorf Serological Pipets

The Eppendorf Quality Management System is certified according to ISO 9001, ISO 13485, and ISO 14001. This converts for our customers to a constantly high and reliable quality of products and processes covering the complete product life time. Products are manufactured in an class 8 clean room which meets the ISO 14644-1 specifications.

The raw material used to produce the Eppendorf Serological Pipets complies with USP Class VI standards. Eppendorf confirms that Eppendorf Serological Pipets and the packaging materials comply to REACH regulation of the European Union EC No 1907/2006 amended by Commission Regulation EC No. 552/2009.

Material suppliers do not use or intentionally incorporate the following agents into the materials used for the production of Eppendorf Serological Pipets:

- Slip agents (including oleamide, erucamide, stearamides)
- Biocides (including di(2-hydroxyethyl)methyl dodecyl ammonium salts (DiHEMDA))
- Plasticizers (including phthalates)
- Bisphenol A
- Latex

Eppendorf Serological Pipets have been tested for in-vitro cytotoxicity according to ISO 10993-5 and show no cytotoxicity.

For certification of absence of detectable DNA, DNase & RNase, and pyrogens as well as for sterilization, please refer to lot-specific certificates of the respective product. Lot-specific purity certificates can be downloaded on [www.eppendorf.com/certificates](http://www.eppendorf.com/certificates).
