Eppendorf Certificate

Certificate of Quality

Eppendorf Tubes®

All Eppendorf Tubes are manufactured in a controlled area and are subject to regular quality inspections within a statistical process control. Tests being performed are e.g. vapor tightness, lid-opening force, wall strength and centrifugal stability.

The Eppendorf Quality Management System is certified according to the international standards ISO 9001 and ISO 13485.

Eppendorf Tubes are made of virgin Polypropylene of highest purity and quality. Our material suppliers do not use or intentionally incorporate the following agents into the materials Eppendorf is using for the production of Tubes:

- Slip agents (including oleamide, erucamide, stearamide)
- Biocides (including di(2-hydroxyethyl)methyldodecylammonium salts (DiHEMDA))
- Plasticizers

During production of Eppendorf Tubes no slip agents, no biocides and plasticizers are used. The used raw materials for Eppendorf Tubes comply with FDA regulations 21CFR § 177.1520 "Olefin Polymers" and 21CFR § 178.2010 "Antioxidants and Stabilizers for Polymers" for food containers.
