

Be Confident About Your Cell Culture Conditions

Get connected to VisioNize® Lab Suite

How can you ensure optimal cell growth conditions?

The demands in cell culture labs have increased and become more complex. This is especially true for process standardization and documentation, e.g. to increase reproducibility of results and prove constant growth conditions in audits and

publications. Monitor your incubators from anywhere with VisioNize Lab Suite and track all related device parameters such as temperature, O₂ and CO₂. Manage recurring tasks such as performance of disinfection cycles, cleaning routines, and splitting of cells.

VisioNize Lab Suite

Sign up for free!

Real-Time Monitoring

Monitor your incubators from anywhere and track parameters, e.g. temperature, O₂ and CO₂

Task Management

Plan and assign device-related tasks, e.g. high temperature disinfection, to ensure optimal device performance and cell-growth

Device Connectivity

Connect and monitor all your incubators including 3rd party with VisioNize sense monitoring kit*

Easy Data Access

Export parameter, event data and any user interactions

Alarm Management

Track all alarm acknowledgements with time-stamped data logs

Instant Notifications

Receive alarm and event notifications and quickly address any issues

Response-Based Alarm Escalation

Define escalation schemes to individual or multiple recipient groups based on lab presence.

Protecting your Samples

Ensure the safety of your samples 24/7

* Note: Only temperature monitoring. Available for North America and Europe.

Secure your samples with VisioNize Lab Suite for free!
