Celebrating 75 Years of Supporting Scientists

This year marks the 75th anniversary of Eppendorf.

Supporting scientists in their research is something that we at Eppendorf are passionate about, and this mission is as valid and relevant today as when Eppendorf began.

Immerse yourself in more than seven decades of company history and discover important milestones, the first Eppendorf products and old friends in lab.

We also invite you to join us in looking closely at the topics of tomorrow. Share your biggest lab dream for the future with us to take part in our competition on page 16!

**TOMORROW
LAB since 1945.**

*Let us venture
into the future
of life science
together.*

1945

epServices – Supporting You For 75 Years

Did you know that...
...Eppendorf began as a small medical instrument repair workshop in Hamburg, Germany in 1945? Today, more than 200 service specialists across Europe provide sustainable solutions that you can rely on: maximized uptime and peace of mind.

**More about service
on page 9**

1961

The Legacy Continues

Did you know that...
...the first Eppendorf mixer was brought to the market in 1961 as part of the famous microliter system? Its ability to continually mix 24 micro reaction tubes at a set speed was revolutionary.

**More about mixers
on page 8**

1946

The Early Scientific Companion

Did you know that...
...the first New Brunswick shaker was developed in 1946 and soon used by Dr. Selman Waksman, who was awarded the Nobel Prize for Medicine for his discovery of streptomycin – the first antibiotic against tuberculosis?

**More about shakers
on page 12**

1961

Bye Bye Mouth Pipetting

Did you know that...
...Eppendorf developed the first industrially manufactured piston stroke pipette? In 1961, Eppendorf launched a revolutionary invention: the first piston-operated pipette, the »Marburg Pipette«. This alternative to mouth pipetting has changed scientific liquid handling forever.

**More about liquid
handling on pages 4-5**

1963

Pure Innovation

Did you know that...
 ...almost 60 years ago, in 1963, the first Eppendorf test tube was born? The Flextube 3810 has since revolutionized application processes across the board. Today, many laboratories worldwide benefit from the high quality of Eppendorf consumables.

More about consumables on page 6

1985

A Passion for Automation

Did you know that...
 ...Eppendorf drives the automation of laboratory products, and has done this since 1985? From the first spectral line photometer, to the first semi-automated workstation, Eppendorf has made users' lives easier. In 2003, Eppendorf introduced its first automated pipetting system – the epMotion® 5070.

More about automation on page 14

1997

Gradient Innovation

Did you know that...
 ...Eppendorf was the innovator of gradient thermal cycler technology with the introduction of the classic Mastercycler® gradient in 1997?

More about our Mastercycler® on page 7

1963

Laboratory Hero

Did you know that...
 ...since the introduction of the first Eppendorf centrifuge in 1963, as part of the Eppendorf Microliter System, our centrifuges have rotated so many times that even a dancer in Swan Lake would feel dizzy?

More about centrifugation on page 10

1993

The Next Big Step

Did you know that...
 ...with the introduction of the 5415 C, Eppendorf has put a new spin on centrifugation? By 1993, we had already manufactured 50,000.

More about centrifugation on page 11

2008

Environmental Innovations

Did you know that...
 ...ULT freezers use a lot of energy to keep your samples safe. In 2008, the (Eppendorf) New Brunswick HEF® U570 was one of the very first commercially available ULT freezers driven by green cooling liquids, significantly reducing the energy consumption of our ULT freezers!

More about freezers on page 15

Solving Your Challenges of Today and Tomorrow!

Every Eppendorf pipette is the result of nearly 60 years of piston-operated experience and we haven't stopped yet!

Let us continue to help you address the important questions in life science. Discover our latest product in the special offer below.

Get Ready to Move It®

NEW: Move It – adjustable tip spacing multichannel pipettes from Eppendorf

Do you find transferring liquids from tubes to plates time-consuming?

The new adjustable tip spacing pipette Move It accelerates and simplifies synchronous pipetting of a series of samples.

See more at:

www.eppendorf.com/move-it

A New Member of the Pipette Family: Move It®

Save 75 € (CHF 93) in our jubilee year
Be quick and become a tester of the Move It®!

Test it, keep it and get 75 € (CHF 93) off*

*Available for all models with a cone distance of 9 mm

The Future: Connect to Your Pipetting Network

Since our invention of the microliter system nearly 60 years ago, we've released almost 20 pipette innovations to support four generations of lab researchers – and our innovation continues today!

Evolve your electronic pipette with the VisioNize® pipette manager

How quickly can you set your parameters?
How accurate are your results? Connect to the VisioNize pipette manager and take your pipetting to the next level!

With VisioNize, new pipetting parameters and programs are instantly transferred to your device helping you to work faster and generate more reproducible results.

Add your own liquid type to the pipette manager in less than one minute! Our system connects multiple electronic pipettes, thereby not only improving speed and accuracy for a single user, but across your entire lab.

See more at:

www.ependorf.com/next-pipette-manager

The Legend – Today and Tomorrow!

Eppendorf Research® plus pipette 4-packs options – save 24%:

- > **Bundle 1:** 2.5/10/200/1000 µL single channel pipettes, including tips
- > **Bundle 2:** 10/20/200 µL single channel and 300 µL 8-channel pipettes, including tips
- > **Bundle 3:** 20/200/1000 µL single channel and 1200 µL 8-channel pipettes, including tips

Every bundle includes a pipette holder for 6 devices (Pipette Carousel 2).

Buy here:

www.ependorf.com/promotions

Total Sample Recovery is Not a Myth!

The LoBind® Solution

When biological samples are stored or incubated in standard vessels, over 90% of the sample can be lost within 24 hours as a result of binding to the plastic surface.

Optimize your storage conditions and improve your enzymatic assays with LoBind products, available as Protein or DNA LoBind. Maximize sample recovery to nearly 100% by virtually preventing sample binding to the vessel surface.

Your advantages

- > Reproducible results ensure peace of mind
- > No surface coating – eliminates risk of contamination
- > Stable vessel surface – ideal for long-term sample storage
- > Maximum recovery rates save and preserve your valuable sample

Available as tubes, microplates and deep well plates.

Sample Matters!

Choose the LoBind® solutions from Eppendorf

- > Protein LoBind® Tubes (1.5 mL, 5 mL, 15 mL, 50mL)
- > DNA LoBind® Tubes (1.5 mL, 5 mL, 15 mL, 50mL)
- > Protein LoBind® Deepwell Plate (96 well, 384 well)
- > DNA LoBind® Deepwell Plate (96 well, 384 well)

Order your free sample:
www.eppendorf.com/sample

Mastercycler® – An Innovation in PCR

Whilst PCR might now be routine, scientists still struggle to achieve reproducible results as a consequence of evaporation or temperature inaccuracy. Eliminate unwanted variables from your assays with a high-quality thermal cycler.

Mastercycler® X50 available either with silver or aluminum block, provides quick & easy intuitive programming via a touch screen display and offers a 2D-Gradient option, resulting in 96 different reaction parameters.

Press "Start" to
PCR with a
Mastercycler®

PCR Promotions – Save 25%

- > 25% off Mastercycler® X50s and X50a models
- > 25% off Mastercycler® nexus (including eco units)

Buy here:

www.eppendorf.com/promotions

Mastercycler® nexus provides maximum flexibility across a variety of block versions, accommodating 96 well PCR plates, 0.2 mL PCR tubes, 0.2 mL PCR tube strips and 0.5 mL PCR tubes.

Mastercycler® benefits include

- > Unmatched reproducibility and precision with minimal non-specific binding
- > Fast and efficient PCR in <40 min with up to 10°C/s heating rate
- > Ability to optimize sample annealing and denaturation temperatures in parallel with innovative 2D-Gradient (Mastercycler® X50)

See more at:

www.eppendorf.com/pcr

Heating | Mixing | Cooling

Eppendorf ThermoMixer® C benefits

- > Heating, mixing, and cooling in all common vessel and plate formats from 5 µL to 50 mL
- > Reliable prevention of condensate formation with Eppendorf ThermoTop® (*condens.protect*®)
- > Excellent 2^oMix-Control anti-spill technology, preventing lid wetting and cross-contamination within your sample plates

A Solution for Reliable NGS Library Prep

Bundle – Save more than 20%*
 Eppendorf ThermoMixer® C +
 Eppendorf SmartBlock™ PCR 96 +
 Eppendorf ThermoTop®

Buy here:
www.eppendorf.com/promotions

*based on individual items purchased separately

Why not combine with Eppendorf twin.tec® PCR plates?

- > Uniform well geometry and rigid design makes twin.tec plates ideal for use with epMotion®, magnetic-bead separation and PCR cyclers
- > Available as 96 and 384-well PCR plate to increase yield of transcript species in NGS library preparation

Your Lifelong Companion

Working non-stop in the lab, you need a device that you can trust.

Eppendorf centrifuges are recognized by lab workers around the world for their reliability. Whether you're working with high or low volume samples, we have a wide range of devices and rotors so that you can find your perfect partner.

Almost 60 years of experience...

In the 1960s, Eppendorf introduced the first microcentrifuge for laboratory applications, enabling work with even the smallest of sample volumes thus revolutionizing scientific research.

“Spins through all my ups & downs!”

Alisha,
proud user of a Centrifuge 5424 R.

Your
Constant
in the Lab

5424 R Promotion:

24-place microcentrifuge refrigerated bundle at 25% off

... and today's power of innovation...

Today, Eppendorf develops innovative, high quality centrifuges for a broad range of applications.

... for the laboratories of tomorrow

Our comprehensive line of microcentrifuges are designed to go beyond speed and capacity to offer you unparalleled ergonomic operation and superior temperature management.

See more at:

www.eppendorf.com/centrifugation

“Quality never fails!”

Benjamin,
proud user of a Centrifuge
MiniSpin® plus.

A Dedicated Partner

Do you have space for a new best friend?

Small enough to equip each workstation with a 'personal' centrifuge, the MiniSpin plus is a 12-place mini-centrifuge for quick spin downs.

- > Capacity: 12 x 1.5 / 2.0 mL; 2 x PCR strip
- > Soft-touch lid closure for ergonomic lid locking
- > Speed: up to 14,100 x g (14,500 rpm) – perfect for molecular biology separations

Small, Powerful and User-Friendly

Save space and money with MiniSpin® plus

- > Centrifuge MiniSpin® plus with rotor F-45-12-11 at 23% off
- > Centrifuge MiniSpin® plus (EU-IVD) with rotor F-45-12-11 at 23% off

Wellness for Your Cells – Eppendorf Incubated Shakers

Let your cells thrive in their comfort zone in an Eppendorf incubator shaker.

Reliability, longevity and decades of experience guarantee safe, efficient and optimized cell culture.

We have taken a step into the future with the Innova® S44i. The 5-Axis X-Drive, a new chamber layout, touchscreen programming and built-in connectivity allow you to benefit from renowned reliability, high capacity and new flexibility, today and tomorrow.

Working on protein expression, antibodies or vaccine development? Our incubator shakers are the devices of choice for reproducible high-yield results and the development of your crucial bioreactor inoculum for downstream processes.

Also discover our latest bioreactor, the SciVario® twin, on the next page.

More about shakers in bioprocessing:
www.eppendorf.com/bioprocess-shakers

Comfortable Choices to Help You Grow

Save **25%** on any incubated Innova® premium shaker including a universal platform!

Choose your best fit from

Innova® 40, 42, 43, 44 or S44i, with or without cooling and any orbit (S44i variant with PS-light excluded).

SciVario® twin: Innovative, Intuitive and Intelligent

A future-proof solution for all your needs

Designed for cell culture and fermentation bioprocesses with working volumes in the range of 0.2 - 3.8 liter, the SciVario twin is the first bioreactor control system for small- and bench-scale applications. The innovative bay-drawer concept of the system allows customization to your needs through standardized functional modules.

Our extensive past expertise has enabled us to develop a sustainable bioprocess controller, ready and equipped for your upcoming needs.

Flexible drawers and the installed hardware allow the system to support your needs, today and in the future.

Smart Communication

Your SciVario twin comes with VisioNize-onboard. Intelligent accessories integrate seamlessly into the VisioNize® Digital Lab Space and an intuitive user-interface minimizes risk during process setup.

Register with the VisioNize® Digital Lab Space and discover the advantages of intelligent communication.

Your benefits

- > Monitor your laboratory from any location
- > Increase productivity and avoid downtime of your lab equipment
- > Always keep track of your process in real-time
- > Respond quickly in case of issues

See more at:

www.eppendorf.com/scivario

Stimulating Growth. Cultivating Solutions.

As a pioneer in the field of modern biotechnology, we are bringing the digital age to your laboratory: **SciVario twin, your future-proof solution.**

Raising the Bar on (q)PCR

What are the demands of today's (q)PCR?

- > Are you worried about the need for increasing accuracy and reproducibility?
- > Do you have trouble preventing contamination?
- > Do you want to save on costs by scaling down your (q)PCR setup?
- > Are you struggling to increase sample throughput?

One effective way to tackle PCR challenges is moving toward automated pipetting by reducing the human factor. Our *epMotion*[®] 5070 automated liquid handling system with a new PCR adapter was designed to support you in overcoming all these challenges in just one smart step. **It's worth it!**

 See more at: www.eppendorf.com/automation

Automate Your (q)PCR Setup and Save Time and Money

Purchase an *epMotion*[®] 5070 PCR solution package and save up to 36% compared with individual purchases

- > Option 1: *epMotion*[®] 5070, EasyCon
- > Option 2: *epMotion*[®] 5070, MultiCon

Buy here: www.eppendorf.com/promotions

Do You Know Where Your Samples are?

Eppendorf – your expert partner for sample storage solutions!

We know that creating and managing a sample tracking system can be laborious. To save you time, Eppendorf has integrated high-quality tubes, barcode scanners, and sample-tracking into a seamless workflow.

Use Eppendorf SafeCode consumables, scanners, and software to benefit from:

- > Document a sample ID by simply scanning the code
- > Automatically combine sample ID with additional data, such as certificates, lot numbers and more
- > Store your data in a central, secure sample management system

Reduce processing time and enjoying peace of mind!

Add one of our industry leading -80°C freezers to complete your new streamlined sample tracking system.

See more at:

www.eppendorf.com/lost-in-samples

Complete Sample Storage Solutions

To start creating your own sample management solution, we are offering savings on our range of CryoCube® F740 -80°C freezers.

- > **Offer 1:** Special WhatsNext savings on the new CryoCube® F740h -80°C freezer
- > **Offer 2:** Receive worth more than **CHF 1'000** of racking free of charge when purchasing a CryoCube® F740h or F740hi
